AIM Summary of Proposed Compensatory Wetland Mitigation - New York

Facility	Area of Impact (acres) a/	Cowardin Class b/				Type of Mitigation (acres)		
		Scrub/Shrub and Emergent		Forested				
		Temporary Impact (Existing ROW)	Temporary Impact (Temporary Workspace)	Temporary Impact (Temporary Workspace)	Permanent Conversion (New ROW)	Restoration On-Site/ Seeding	Restoration On-Site/ Tree Planting	Off-Site Mitigation c/
Haverstraw to Stony Point Take-up & Relay	5.12	3.89	0.27	0.96	0.00	4.16	0.96	0.00
Stony Point to Yorktown Take-up and Relay	18.88	9.72	3.00	5.33	0.83	12.72	5.33	0.83
Southeast to MLV 19 Take-up & Relay	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00
PROJECT TOTAL:	**24.00**	**13.61**	**3.27**	**6.29**	**0.83**	**16.88**	**6.29**	**0.83**

a/ Area of Impact includes impacts associated with all areas within the construction workspace limits, temporary and permanent.
b/ Wetland types were assigned based on the National Wetlands Inventory ("NWI") classifications as described in Cowardin et al., 1979.
c/ Ratios for permanently converted forested wetland to other wetland types are anticipated to be 2:1 for wetland enhancement/creation and 10:1 for preservation.
