Repairs to Dikes

FACT SHEET

February 2012

DESCRIPTION: Repairs to the deteriorated portions of the cribbing piling system along the entire length of the branch dike and at the eastern end of the south dike.

AUTHORIZATION: The project was adopted in 1872 and modified in 1935 and 1965. The project consists of a channel, 14 feet deep, 100 feet wide, from deep water in the Hudson River to the Route 9W Highway Bridge 1.3 miles above the mouth, thence 12 feet deep, 100 feet wide to 3.5 miles above the mouth, with widening at bends. The project also includes two parallel channel dikes along the entrance channel to the creek approximately 350 feet apart and a branch dike extending northward from the downstream end of the north channel dike parallel to the flow of the Hudson River.

STATUS: Funds for construction are not included in the FY 2012 budget. Work has been deferred indefinitely until funds are made available.

OUTSTANDING ISSUES: Engineering and Design work associated with preparation of plans and specifications for the required repairs must be completed prior to initiation of construction.
