## Week of April 08 – April 14, 2013

The following pages display the results from the USACE-NYD real-time website for the week of Monday, April 08 through Sunday, April 14, 2013.

There were no blasts this week in the S-AK-3 project area.

Dredge 55 operated in West-ELIZ all week.

We are currently relocating and performing maintenance on our station in preparation of the start of blasting in S-AK-3, and Bayonne, NJ. Regular weekly reports will commence as soon as possible.

We recorded background noise in the S-AK-3 project area. The maximum ambient vibration recorded was 0.035 in/s recorded at New York Container Terminal (NYCT) on April 10.

Ground vibrations at IMTT were all below 0.026 in/s. Ground vibrations at NYCT were all below 0.036 in/s. Ground vibrations at Elizabethport were all below 0.020 in/s.

Station 7 (IMTT) has been relocated to Elizabeth Marina (Easting: 660,330.0, Northing: 578,827.7) and is now Station 10.

In the meantime, all available data is available on the blasting website, which is available at all times by entering the following address into any web-browser
