26 Federal Plaza
New York, New York 10278-0090**

EXECUTIVE SUMMARY

This Phase 1 Upland Site Assessment Report (Report) was prepared by the United States Army Corps of Engineers (USACE), New York District (NYD) for the Gowanus Canal and Bay Ecosystem Restoration Project (Project), in Brooklyn, New York. This Project was authorized by the United States House of Representatives Committee on Transportation and Infrastructure Resolution, dated 15 April 1999 (Docket Number 2596), to determine the feasibility of environmental restoration and protection relating to water resources and sediment quality within the New York Port District, including but not limited to creation, enhancement, and restoration of aquatic, wetland, and adjacent upland habitats. The Port District is centered on the New York–New Jersey Harbor, and is located within the Hudson–Raritan Estuary.

The Project area includes the Gowanus Canal, Channel, Bay, and immediate surrounding upland areas. The Gowanus Canal is located in a highly developed section of Brooklyn. The focus area for this Report is the Gowanus Canal and Bay and upland portions of properties immediately surrounding/adjacent to the watershed. The non-Federal partner for this study is the New York City Department of Environmental Protection (NYCDEP).

This Project also is the result of a Memorandum of Understanding (MOU), initiated in July of 2002, between the USACE-NYD and the United States Environmental Protection Agency (USEPA). The MOU was implemented to facilitate cooperation between the two agencies in addressing remedial, water quality, and environmental restoration activities pursuant to the Clean Water Act (CWA); Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA); Resource Conservation and Recovery Act (RCRA); and various Water Resources Development Act (WRDA) authorities. In addition, the two agencies agreed to designate eight demonstration pilot projects for the purpose of coordinating the planning and execution of urban river cleanup and restoration. On July 30, 2003, the EPA and USACE announced the acceptance of Gowanus Canal and Bay into the Urban Rivers Restoration Initiative (URRI) as one of these pilot projects.

This Phase I Environmental Site Assessment (ESA) was prepared as a first step in identifying potential sources of environmental contamination in the upland portions of the Project area. This information will assist the USACE/NYD in identifying potential environmental consequences associated with future Federal actions in accordance with requirements of the National Environmental Policy Act (NEPA). Federal actions could include implementation or planning of remedial, water quality, or restoration activities associated with the Project or funding participation in these activities.

Preparation of this ESA entailed the review of existing data and documents, and verifying and updating the existing data with ground truthing. The principal objectives of this investigation were the following:

- collect information about existing environmental conditions and current land use;
- identify any information gaps regarding existing environmental conditions; and,
- make recommendations concerning any future investigations that may be needed to address those gaps.

This ESA was prepared using elements of the American Society for Testing and Materials' (ASTM), Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, E 1527-00 (ASTM 2000) as guidance. Types of environmental records reviewed for each property were based these standards and on the availability of information sources for specific geographic locations within the study area.

The environmental records reviewed in connection with this ESA included those standard Federal and state records listed under Section 7.2.1.1 of ASTM E1527-00. An analysis of past land uses within the Project Area was completed based on a review of historic maps and internet sources. Sources reviewed with respect to the physical setting of the Project Area included U.S. Geological Survey (USGS) Topographic Quadrangle maps, and site-specific information obtained from existing environmental reports.

The Gowanus Canal and Bay watershed occupies an area of approximately 1,900 acres. The typical ground elevation ranges from 0 to 150 feet above Mean Sea Level (MSL). The Gowanus Canal, Channel, and Bay receive drainage from the north, south, east, and west and are the surface-water receptors within the Project Area. Land use in the immediate vicinity of the canal is predominantly industrial and commercial, however, residential development predominates within the watershed. Gowanus Canal has historically served as an industrial transportation center, although use of the canal declined in the 1950's with the construction of the interstate highway system.

Site reconnaissance was performed on 29–31 March 2004, with the assistance of representatives of the GCCDC and the USEPA. None of the industrial facilities within the Project Area were publicly accessible. Thus, reconnaissance was limited to general observations of major sites of interest, from publicly accessible streets and rights-of-way.

Historic maps and newspaper articles for the Project Area show that the Gowanus Canal was heavily industrialized by the end of the 19th Century. Major industrial facilities were engaged in refining, manufactured gas, distribution and (or) bulk-storage of petroleum, coal storage, and various chemical manufacturing. Untreated industrial and sanitary wastes were discharged directly into the Gowanus Canal for a period of at least 120 years.

Twenty-six (26) major industrial facilities (both operational and abandoned) were identified within the Project Area, based on the results of the database searches. Discharges of petroleum and other environmental contaminants have been documented at most of the facilities. For the purposes of this ESA Report, "major" facilities are those listed in the CERCLIS, CERCLIS-NFRAP, CORRACTS, RCRIS-LQG, NY VCP Brownfields, Former Manufactured Gas, MOSF-UST, or MOSF-AST databases.

Prior to implementation of any revitalization projects, the following additional work is recommended:

1. CERCLIS sites, including CERCLIS-NFRAP sites, have been investigated and interest in developing or conducting restoration projects on those sites will require researching the investigations performed for those sites.

2. The operational and regulatory histories of other sites targeted for restoration should be investigated in more detail, including interviews with landowners or facility managers and investigations of the interiors of any structures. The results of any previous environmental investigations should be compiled and analyzed.
3. For properties with waterfront on the Gowanus Canal or any of the underutilized properties listed in Section 5.5.5, it is recommended that targeted sampling of soils and sediments be performed for laboratory analysis hazardous, toxic, and radioactive (HTRW) compounds. The recommended laboratory analyses include USEPA Target Compound List (TCL) VOCs and semivolatile organic compounds (SVOCs); Priority Pollutant (PP) metals and pesticides; PCBs; and total petroleum hydrocarbons (TPHC). Field screening for VOCs and radioactive materials also is recommended.

1.0 INTRODUCTION

The U.S. Army Corps of Engineers (USACE), New York District (USACE-NYD), is partnering with the New York City Department of Environmental Protection (NYCDEP) to assess the feasibility of the Gowanus Canal and Bay Ecosystem Restoration Project (Project), Brooklyn, New York. This Project was authorized by the United States House of Representatives Committee on Transportation and Infrastructure Resolution, dated 15 April 1999 (Docket Number 2596), to determine the feasibility of environmental restoration and protection relating to water resources and sediment quality within the New York Port District, including but not limited to creation, enhancement, and restoration of aquatic, wetland, and adjacent upland habitats. This project also is part of a Memorandum of Understanding (MOU) initiated in July 2002 between the USACE-NYD and the United States Environmental Protection Agency (USEPA). The MOU was implemented to facilitate cooperation between the two agencies in addressing critical water quality issues, economic revitalization, and public use and enjoyment of urban rivers. As part of the MOU, the two agencies agreed to designate eight demonstration pilot projects for the purpose of coordinating the planning and execution of urban river clean-up and restoration. On July 30, 2003, the EPA and USACE announced the acceptance of Gowanus Canal and Bay into the Urban Rivers Restoration Initiative (URRI).

Prior to implementing any remedial, water quality, and/or environmental restoration activities, the USACE-NYD is required to prepare a Phase I Environmental Site Assessment (ESA) of the Gowanus Canal, Channel, Bay, and surrounding upland areas, in accordance with provisions of the National Environmental Policy (NEPA) that require Federal agencies to identify environmental consequences resulting from Federal actions. The USACE-NYD, under an existing IAG with the USEPA, Region 2, commenced the preparation of an ESA for the upland portions of the Project. This report is the ESA for the upland portions and properties immediately surrounding/adjacent to the Gowanus Canal and Bay watershed.

The first task of the ESA was to identify what relevant documents and data sources were readily available for use in conducting the ESA. This task resulted in a Literature Search document, provided with this report as Appendix A. The second task was to conduct data collection and analysis of real estate properties located in Gowanus Canal and Bay watershed. This document is the result of that data collection and analysis

1.1 PURPOSE AND OBJECTIVES

The purpose of this ESA was to identify any potential sources of ongoing contamination to the upland portions of the Project area. This entailed the review of existing data and documents, and verifying and updating the existing data with ground truthing. The principal objectives of this investigation were the following:

- collect information about existing environmental conditions and current land use;
- identify any information gaps regarding existing environmental conditions; and,
- make recommendations concerning any future investigations that may be needed to address those gaps.

1.2 SCOPE OF SERVICES

This ESA was prepared using elements of the American Society for Testing and Materials' (ASTM), Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, E 1527-00 (ASTM 2000) as guidance. The geographic limits of the Project area and the specific types of environmental record sources to be reviewed were determined based on availability of information sources for specific geographic locations within the study area.

The Project Area consists of the Gowanus Canal and Bay Watershed (Figure 1). The environmental records reviewed in connection with this ESA included those standard Federal and state records listed under Section 7.2.1.1 of ASTM E1527-00, and records available from the New York State Department of Environmental Conservation (NYSDEC). An analysis of past land uses within the Project Area was developed based on a review of historic maps and internet sources.

Site reconnaissance of the Project area was performed on 29–31 March 2004. Site reconnaissance was limited to general observations of major features of interest, which were made from publicly accessible areas (*i.e.*, streets and right-of-ways), because of the relatively large size of the Project area. Direct access was not obtained to any of the facilities under review.

1.3 REASON FOR PERFORMING PHASE I ESA

The reason for performing this ESA was to establish a base line of environmental data for the Project area to guide Phase II site characterizations and identify sampling needs prior to Project implementation.

1.4 SIGNIFICANT ASSUMPTIONS

An important assumption underlying this ESA was that the Gowanus Canal and Bay Watershed Project Area, as identified in Figure 1, encompasses all of the major sources of environmental contaminants likely to have affected the Gowanus Canal. This assumption is based on the premise that the facilities and land uses located closest to the canal are likely to have had the greatest effect on environmental conditions within the Project Area.

1.5 LIMITATIONS AND EXCEPTIONS

Environmental impairment of a property may result from activities such as illegal or unreported dumping, or the disposal or spilling of hazardous substances or materials that are a component to the operations of the facility. It should be noted that the presence of contaminants at a particular property may not always be apparent, and the completion of a Phase I ESA in accordance with ASTM-E-1527-00 cannot provide a guarantee that hazardous substances or materials do not exist. The scope of services executed for this Project does not constitute an audit for any of the following: regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, or high voltage power lines. Nor does it comprise a detailed

condition survey for radon, naturally occurring hazardous materials, lead-based paint, lead in drinking water, asbestos-containing materials, or other conditions of potential hazard. The above-mentioned conditions are as outlined in Section 12.1.4 (Non-Scope Considerations) of ASTM E1527-00.

1.6 SPECIAL TERMS AND CONDITIONS

This report has been prepared for the exclusive use of the USACE-NYD/USEPA. The USACE-NYD/USEPA will not be responsible for the use of this report by any other party, or reliance on or any decision to be made based on it without the prior written consent of USACE-NYD/USEPA. USACE-NYD/USEPA accepts no responsibility for damages, if any, by any other party as a result of decisions or actions based on this report.

This report presents an overview of issues of environmental concern, reflecting the USACE's best judgement using information reasonably available at the time of the site visit. The USACE has prepared this report using information understood to be factual and correct and shall not be responsible for conditions arising from information or facts that were concealed or not fully disclosed to the USACE at the time of the site visit.

The USACE did not conduct any intrusive investigations such as sampling, testing or monitoring. Detailed cost estimates associated with environmental issues discussed in this report, or activities required to bring the site into environmental compliance, were not required.

2.0 SITE DESCRIPTION

2.1 LOCAL AND LEGAL DESCRIPTION

As noted in Section 1.2, the overall Project Area consists of the entire Gowanus Canal and Bay watershed. The Phase I investigation however, was focused mainly on those properties located adjacent to the Gowanus Canal, Channel, and Bay. A formal definition of the properties of focus was developed using Geographic Information System (GIS)-compatible tax maps obtained from the New York City Department of City Planning. The Focus Properties were defined as those New York City Tax Lots (Lots) located immediately adjacent to Gowanus Canal, Channel, and Bay (or one city block, as appropriate). The result was a total of 122 focus properties, all of which are located in the Borough of Brooklyn. These focus properties are depicted on Figure 2.

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Gowanus Canal and Bay watershed is approximately 1,900 acres in size. The Gowanus Canal proper is within a highly developed urban area, bordered by residential communities such as Park Slope, Carroll Gardens, and Red Hook. The canal is impacted by poor water quality, contaminated sediments (such as heavy metals, PCBs, and PAHs), deteriorating bulkheads, extensive filling, little or no buffers, hardened shorelines, and odors that are the result of over a century of heavy industrial use. Gowanus Canal is connected to the Upper New York Bay and is thus a tidal waterbody.

2.3 CURRENT USE OF THE PROPERTY

There are more than 50 commercial and industrial facilities currently operating within the Project area. The industrial and commercial facilities operating within the Project area typically include petroleum and natural-gas distribution/storage facilities, stone crushing practices, scrap-metal recycling operations, and warehouses. Most of the commercial and industrial activity is concentrated near the Gowanus Canal. The remaining area within the Gowanus Canal and Bay Watershed is residential buildings and recreational facilities.

2.4 STRUCTURES, ROADS AND OTHER IMPROVEMENTS ON THE SITE

Transportation facilities in the Project area include an interstate highway (Route 278), local roadways, several subway stations, as well as numerous freight terminal and port facilities. The Project Area is served by sewer and water facilities maintained by the City of New York.

3.0 RECORDS REVIEW

3.1 STANDARD ENVIRONMENTAL RECORD SOURCES

The standard environmental record sources specified under Section 7.1.1 of ASTM E1527-00 were searched for records that were “reasonably ascertainable”, as defined under Section 3.3.30 of the Standard, using computerized database searches. The standard environmental record sources that were searched in connection with this ESA are described in Sections 3.1.1 and 3.1.2 of this report, and the results are discussed in Section 5.0.

The database searches were performed using the “Area Study” service available from EDR, in which records are searched relative to a geographic “corridor” specified by the client. The database searches included Federal and state databases as well as EDR proprietary databases. The properties of focus (Figure 2) were used to define the search corridor. The geographic search radius was 0.5 mile from the focus properties for all of the databases queried except the Federal National Priority Site List (NPL) and Resource Conservation and Recovery Act (RCRA) Treatment Storage and Disposal (TSD) List, for which a 1-mile search radius was used.

The results of the EDR DataMap™ Area Study (EDR Report) were supplemented with information obtained from a 1-mile-radius database search of the Gowanus Canal that was performed in June 2003 by Toxics Targeting, Inc. (Toxics Targeting 2003a and 2003b).

3.1.1 Federal Environmental Records Sources

The following Federal databases (maintained by the USEPA) were searched in connection with this investigation:

CERCLIS	Comprehensive Environmental Response, Compensation, and Liability Information System – listing of Federally regulated sites under CERCLA.
CERCLIS-NFRAP	Listing of CERCLIS sites where No Further Remedial Action is Planned.
CONSENT	Superfund (CERCLA) Consent Decrees.
CORRACTS	RCRA Corrective Action Activity database.
ERNS	Emergency Response Notification System database.
FINDS	Facility Index System – listing of USEPA regulated facilities and references to listings in other Federal databases.
FTTS	Listing of Federal administrative/enforcement actions against establishments regulated under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), the Toxic Substance Control Act (TSCA), or the Emergency Planning and Community Right to Know Act (EPCRA).

HMIRS	Hazardous Materials Information Reporting System.
MINES	Mine Master Index File.
MLTS	Material Licensing Tracking System.
NPL	National Priority List.
Proposed NPL	Proposed National Priority List.
Delisted NPL	National Priority List Deletions database.
NPL Liens	Listing of Federal Superfund Liens.
PADS	PCB Activity Database.
RAATS	RCRA Administration Action Tracking System database.
RCRIS-LQG	Provides information on facilities that are a Large Quantity Generator (LQG) of hazardous waste.
RCRIS-SQG	Provides information on facilities that are a Small Quantity Generator (SQG) of hazardous waste.
RCRIS-TSD	Provides information on hazardous-waste treatment, storage, and disposal (TSD) facilities regulated under the Resource Conservation and Recovery Act (RCRA).
ROD	Records of Decision database.
SSTS	Federally registered pesticide-producing establishments.
TRIS	Toxic Chemical Release Inventory.
TSCA	Records maintained under the Toxic Substance Control Act.

The results of the Federal database searches are presented in the EDR Report provided in Appendix B, and the relevant findings are reviewed in Section 5.0 of this report.

3.1.2 State Environmental Records Sources

The following state databases (maintained by the NYSDEC) were searched in connection with this investigation:

AST	Aboveground Storage Tank database.
CBS AST	Chemical Bulk Storage Database – ASTs.
CBS UST	Chemical Bulk Storage Database – USTs.
HSWDS	Hazardous Substance Waste Disposal Site Inventory.
LTANKS	Leaking Storage Tank Incident Reports.
MOSF/AST	Major Oil Storage Facilities register – AST.
MOSF/UST	Major Oil Storage Facilities register – USTs.
SHWS	Inactive Hazardous Waste Disposal sites in New York State.
SPILLS	Data collected on spills reported to the NYSDEC.
SWF/LS	Facility Register.
SWRCY	Registered Recycling Facility List.
SWTIRE	Registered Waste Tire Storage & Facility List.
UST	Underground Storage Tank database.

VCP Voluntary Cleanup Agreements.

The results of the state database searches are presented in the EDR Report provided in Appendix B, and the relevant findings are reviewed in Section 5.0 of this report.

3.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

3.2.1 NYSDEC File Review

Additional information regarding recognized environmental conditions within the Gowanus Canal and Bay watershed was obtained from a manual review of publicly accessible files maintained by NYSDEC. An initial Freedom of Information Law (FOIL) request was sent to the NYSDEC on 12 March 2004, requesting information concerning 350 properties bordering the Gowanus Canal and Bay. The NYSDEC assigned the request FOIL Identification Number R2-03-1529, and subsequently indicated that the request was too broad. The NYSDEC requested that subsequent requests include names and addresses of facilities to be investigated, and to limit the number of sites to two (2) per request (Appendix C). Subsequently, modifications to the FOIL request were filed on April 28, 2004, for 20 facilities located in the immediate vicinity of the Gowanus Canal and Bay. The FOIL request was distributed by the NYSDEC to the Hazardous Waste and Solid Materials (HWSM), Site Remediation, Spills, and Air Permitting Divisions. Response letters received from the NYSDEC were dated 20 February 2004, and 17 and 28 May 2004. An on-site file review was conducted in June 2004, at the NYSDEC Region 2 office located at 1 Hunter's Point Plaza, Long Island City, New York.

3.2.2 NYCDEP File Review

A written request was sent via certified mail to the Commissioners Office at the New York City Department of Environmental Protection (NYCDEP) on 27 April 2004, outlining the nature and purpose of this ESA, and requesting assistance in arranging for a file review in connection with the Gowanus Canal and Bay Watershed. According to the NYCDEP, the agency does not have any information relevant to the request.

3.2.3 Proprietary Databases

The database search performed by EDR included a search of a proprietary historical database of former manufactured gas (coal-gas) plants (MGPs). The information contained in the database consists of records compiled by EDR during the course of past investigations.

3.3 PHYSICAL SETTING SOURCES

Information concerning the topography of the project area, and its relationship to surrounding surface-water bodies, was obtained from the U.S. Geological Survey (USGS) Jersey City, NY-NJ and Brooklyn, NY Quadrangles.

3.4 HISTORICAL USE INFORMATION

Historical use information on the property was obtained principally from review of photocopies of historic maps provided by the Gowanus Canal Community Development Corporation (GCCDC) and an electronic search of the on-line archives of the New York Times, 1857 to current day.

4.0 SITE RECONNAISSANCE

Reconnaissance of the site was performed on March 29–31, 2004. The results are described below.

4.1 METHODOLOGY AND LIMITING CONDITIONS

Reconnaissance activities were limited to a general examination of major areas of interest and photographs of current conditions. Only sites observable from public ways were directly accessible at the time of the reconnaissance visit. Therefore, building interiors were not investigated, and exterior observations were limited to those that could be made from publicly accessible streets and rights-of-way.

4.2 GENERAL SITE SETTING

The general site setting in the immediate vicinity of the waterfront was characterized by intensive industrial and commercial activities, however, the remainder of the watershed was commercial and residential use. Heavy vehicle traffic was observed throughout the Project Area.

4.3 EXTERIOR OBSERVATIONS

The entire shoreline of Gowanus Canal was lined with bulkheads in different levels of disrepair. Domestic refuse, construction debris, and other discarded items were observed within and adjacent to the Gowanus Canal. Additionally, several hours following a significant rain event, an oily substance with the odor of petroleum was observed discharging into the head of the canal at the end of Douglass Street on the northwest side of the canal. At this location are both a CSO from the Red Hook WPCP service area and the outlet of the Flushing Tunnel. It was uncertain whether the substance was originating from the CSO or from the Flushing Tunnel. Photographs taken during the site reconnaissance visit are provided in Appendix D.

The industrial facilities observed during the reconnaissance visit included various oil terminals, recycling operations (*e.g.*, scrap metal, glass, and paper), stone crushing facilities, a natural-gas valve (Brooklyn Union Gas), and numerous warehouses.

4.4 INTERIOR OBSERVATIONS

As noted above, none of the interiors of the facilities under investigation were publicly accessible. Moreover, given the size of the Project Area (over 122 focus properties) and the number of buildings present, examination of the building interiors was not feasible. Therefore, no interior observations were made in connection with this investigation.

4.5 INTERVIEWS WITH OWNERS AND OCCUPANTS

Formal on-site interviews of facility operators were not conducted in connection with this ESA. Moreover, given that there were more than 50 facilities operating within the Project Area, it would not have been feasible to conduct on-site interviews with the owner/operator of each facility.

4.6 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

The following provides a brief summary of the phone conversations and e-mail correspondence between the USACE and respective local government officials and organizations. Contact reports and e-mail correspondence are available upon request.

4.6.1 New York City Department of Environmental Protection

In a telephone conversation on April 12, 2004, Ms. Lucata, Assistant Commissioner of the NYCDEP, indicated that there is a general concern that the sediments in the Gowanus Canal are contaminated based on prior history and that the NYCDEP can provide information pertaining to potential sources of contamination based on development proposals. The NYCDEP uses historical land use to determine potential sources of contamination through a database search based on block and lot numbers. It would be possible for the NYCDEP to cross reference all the block and lot numbers of interest to find out potential sources of contamination. However, Ms. Lucata stated that the NYSDEC has more readily available information and that the scope of the request would be very large and potentially impractical. Ms. Lucata recommended that contact be made with Mr. Kunkle or Mr. Walsh of the NYSDEC.

Additionally, Mr. Volgende, Bureau of Wastewater Pollution Control-Division of Water Quality, was contacted on May 6, 2004, to obtain information on combined sewer overflows (CSOs) in the Gowanus Canal and Bay watershed. No response was received as of final publication date of this document.

4.6.2 New York State Department of Environmental Conservation

The New York State Department of Environmental Conservation (NYSDEC), Division of Environmental Remediation, was contacted on 13 April 2004. The Engineer representing NYSDEC stated that he was not aware of any potential sources of hazardous waste contamination for the Gowanus Canal. Furthermore, he did not recall any issues with adjacent lands in the watershed. This engineer suggested that the best way to obtain information regarding potential sources of contamination would be through a FOIL request, because the FOIL officer distributes the request to each division. In turn, each division must then perform a comprehensive search of every location in question.

He also suggested that the USACE contact each division in the agency to find out if anyone has any recollection of information pertaining to potential sources of contamination. He recommended that USACE definitely contact the Division of Natural Resources and the

Division of Water, and maybe the Division of Permits and the Division of Solid and Hazardous Materials.

Based on this recommendation, the Division of Water, the Division of Natural Resources, and the Division of Solid and Hazardous Waste were contacted. No responses were received from these agencies as of the date of publication of this report.

4.6.3 New York City Fire Department

ASTM standards suggest that vicinity police and fire departments be contacted because they are often the first contacted when hazardous materials spills are suspected by the general public. The Public Information Officer for the New York City Fire Department (NYCFD), was contacted to request any publicly available information the NYCFD may have regarding the storage, use, or discharge of hazardous materials in the Gowanus Canal and Bay watershed. Ms. Blake requested a fax of information describing the Project so that she could distribute the request to the appropriate personnel (Blake 2004). Ms. Lamberti replied in response to the conversation and correspondence with Ms. Blake. Ms. Lamberti (2004) informed explained that the NYCFD does not have any information with regard to potential sources of contamination to the Gowanus Canal and that they should call the NYCDEP or the NYSDEC to ascertain this type of information.

4.6.4 New York City Police Department

Mr. Brown, Deputy Commissioner of Public Information for the New York Police Department (NYPD) requested that he be sent information describing the information the USACE would like to obtain. A fax and memorandum were sent that discussed the type of information being requested, the reason the information was being requested, and all pertinent contact information (Brown 2004a). Mr. Brown explained that the NYPD database does not contain information regarding potential sources of contamination to the Gowanus Canal and Bay watershed.

4.6.5 NYC Department of Health and Mental Hygiene

Ms. Prud'homme, Assistant Commissioner of the Bureau of Environmental Sciences & Engineering, informed the USACE that there are several offices within the Environmental Sciences division and that they each maintain their own database. As such, she was not sure if the Environmental Services division has any information that would be of interest. Typically, someone looking for information from the Environmental Services division would go through the FOIL process, but Ms. Prud'homme was concerned that without specific addresses of all the properties within the Gowanus Canal and Bay watershed the query could not be conducted in their databases (Prud'homme 2004a).

As such, she requested an email description of the project, location of the project, and the type of information being requested to her attention. Ms. Pruh'homme then distributed the request to all the offices she felt might be able to provide any information. None of the other offices/personnel Ms. Prud'homme contacted were able to provide any information regarding

potential sources of contamination to the Gowanus Canal and Bay watershed (Prud'homme 2004b).

5.0 FINDINGS

5.1 TOPOGRAPHY AND DRAINAGE

Review of the U.S. Geological Survey Jersey City, NJ-NY and Brooklyn, NY Quadrangles reveals ground elevation within the Project Area typically ranges from 0 to 30 feet above Mean Sea Level (MSL) in the vicinity of the canal. Ground elevation rises to 50 MSL in the Red Hook and Carroll Gardens neighborhoods north of the canal and 30 to 150 MSL in Park Slope, to the southeast. The Gowanus Canal receives drainage from the north, south, east, and west and is the surface-water receptor within the Project Area.

The only source of fresh water to the canal is through sheet flow and the CSO's. There are 12 permitted CSO's that discharge to the Gowanus Canal. Eight CSO's are from the Red Hook Water Pollution Control Plant (WPCP) service area and four CSO's are the Owls Head WPC service area (NYCDEP 2003).

5.2 GOWANUS CANAL COMMUNITY DEVELOPMENT CORPORATION

The GCCDC is extremely active in addressing the revitalization of the Gowanus Canal and its neighborhoods. The GCCDC has sponsored numerous studies and led task forces for the purpose of developing plans to enhance the area. In completing this ESA, GCCDC files were reviewed (see the Literature Search in Appendix A) and interviews were conducted with GCCDC staff. Additionally, GCCDC staff was present for one day of the field reconnaissance.

5.3 HISTORICAL USE INFORMATION

5.3.1 Historic Insurance Maps and Street Atlases

Historic maps and atlases were reviewed to identify past land use along the Gowanus Canal. Facilities presumed to have the greatest environmental impact on the Gowanus Canal, include manufactured gas plants (MGP), petroleum bulk-storage (PBS) facilities, chemical manufacturers, metal smelters, and coal yards.

5.3.1.1 Former Manufactured Gas (Coal Gas) Sites

Gas works facilities operated from the late 1800's to the mid 1900's, producing gas for lighting, cooking, and heating through forcing steam to pass through coal (and later heavy oil) to generate a usable gas. Waste products from this process consisted of benzene, pyridine, creosols, naphthalene, toluene, hydrogen sulfide, phenols, and coal tar (Roux 1990). The tar was generally sold to chemical plants or paving companies, wherever the remaining by-products were disposed of as waste (Roux 1990).

The following sites of Former MGPs are identified in the EDR (2004) report as being within one mile of the Gowanus Canal and within the Project Area:

- Fulton Municipal Gas Co., 263 Nevins Street – Site currently contains outdoor recreational facilities built in the 1950’s.
- Brooklyn Union Gas Co., 157 Second Avenue – Site is the Lowes retail facility.
- Metropolitan Gas Light Co., 35 12th Street – Site is the Pathmark Supermarket.
- *Citizens Gas Light Co., 437 Smith Street* – Site is the area known as Carroll Gardens – Public Place.

5.3.1.2 Former Coal Yards

Review of the Atlas of the Borough of Brooklyn (Hyde) revealed sites that do not show up on any current databases that were once the site of coal companies or coal yards. Soil at these properties may be contaminated by heavy metals leaching from bulk coal storage.

- *Scranton Lehigh Coal Company, 242 Nevins Street* – Warehouses and several small businesses at the site.
- *L1 3rd Street* – Site is currently vacant, but of interest to the GCCDC (2003b) as a potential walkway site.
- *201-225 3rd Street* – Site is currently a parking area for Verizon.
- *176-186 3rd Street* – Site is the location of Red Hook Crushers.
- *Moton Coal and Cooper’s Seaboard Coke, 300-318 Nevins Street* – Verizon.

5.3.1.3 Former Petroleum Bulk Storage

Review of the Atlas of the Borough of Brooklyn (Hyde) revealed sites that do not show up on any other databases that were once the site of PBS. Soil at these properties has the potential to be contaminated from spills or leaky tanks while operating as a PBS.

- *Standard Oil of NY, 365 Bond Street* – Site of USA Van Lines and Fiberwave.

5.3.2 Newspaper Articles

The New York Times archives from 1857 – present were reviewed for items pertaining to the Gowanus Canal.

5.3.2.1 Fires and Explosions

Four significant fires were reported in the New York Times. In 1894, a grease tank exploded at the foot of 8th Street razing the oil refining facility (Davis Oil) and neighboring tenements houses (NY Times 1894). In 1930, Ernst Zobel Company, a chemical and pitch manufacturer at 10th Street and 2nd Avenue, burned to the ground. Hundreds of drums of benzene and turpentine, and sacks of resin were destroyed in the fire (NY Times 1930). The canal caught fire in 1946, when gasoline that had leaked into the water was ignited by an acetylene torch (NY Times 1946). And in 1976, a massive fire at the Patchoque Oil Terminal (currently Amerada Hess) destroyed underground fuel tanks and resulted in

millions of gallons of petroleum (Nos. 2 and 6 fuel oil) entering the Gowanus Channel and Bay (Thomas 1976).

5.3.2.2 Water Pollution

Articles describing the pollution of the canal date back as far as 1893, where in one article the canal was called, “A Disgrace to Brooklyn,” due to it being the repository for untreated sewage and industrial wastes (NY Times 1893). In 1924, the NY Board of Fire Underwriters called the canal a “conflagration hazard”, due to concentrations of waste oil in the canal (NY Times 1924). In 1951, Brooklyn Union Gas was fined \$750 for polluting the tidal waters of the Gowanus Canal by failing to repair a defective bulkhead that permitted oil to drip into the canal. It was argued by the prosecutor that the pollution had occurred on numerous occasions between October 1949 and July 1951 (NY Times 1951).

5.4 STANDARD ENVIRONMENTAL RECORD SOURCES

5.4.1 Electronic Database Searches

5.4.1.1 EDR

A copy of the EDR DataMap™ Area Study (2004) is provided in Appendix B. No listings were found in the Federal NPL, Proposed NPL, CONSENT, ROD, Delisted NPL, HMIRS, MLTS, MINES, MPL Liens, US BROWNFIELDS, DOD, TSCA, or SSTS databases or the state SWTIRE, HSWDS, and DEL SHWS databases. Records were identified in other Federal and state databases pertaining to over 400 incidents and (or) facilities. Many of these records concern sites that are outside of the Project Area, or minor spills that are not material to the findings of this report. As noted in Section 1.2, the scope of this ESA is limited to environmental conditions within the Project Area. Therefore, only the records pertaining to major sites or incidents occurring within the Project Area are discussed in this report.

Figure 3 maps the major facilities identified within the Project Area. For the purposes of this ESA, major facilities are those listed in CERCLIS, CERCLIS-NFRAP, CORRACTS, RCRIS-LQG, or MOSF-UST databases. Figure 3 also depicts the location of Former MGPs and sites listed in the NY VCP – Brownfields database.

The results presented in the EDR Report suggest that discharges of petroleum and other environmental contaminants have occurred at most of the major facilities depicted on Figure 3. Specifically, spills and contaminated soils have been reported at the Brooklyn Union Gas, Amerada Hess, Bayside Fuel Depot, Witco Chemical, U.S. Food and Drug Administration, and Ulano Corporation sites. Additional information concerning these facilities was obtained from the NYSDEC file review, and is presented where applicable in Section 5.5.

5.4.1.2 Toxic Targets

Toxics Targeting Computerized Reports (Toxic Targeting 2000a and 2000b) were generated in June 2000, for the north and south sections of the Gowanus Canal. Toxic Targeting searches only 17 Federal and state databases. Similar to the EDR Report, no listings were

Figure 3. Major Facilities Identified for the Phase One Upland Site Assessment for the Gowanus Canal and Bay Ecosystem Restoration Project, Kings County, New York.

Prepared By: U. S. Army Corps of Engineers, New York District

Date: 07/04

Source: Bytes of the Big Apple, New York City, Department of City Planning; 2003.

identified for the NPL database. Also similar to the EDR Report, close to 400 incidents of spills or leaking underground storage tanks (UST's) were recorded within one mile of the Gowanus Canal.

5.4.2 NYSDEC File Review

Additional information regarding recognized environmental conditions within the Gowanus Canal and Bay Watershed was obtained from a manual review of publicly accessible files maintained by NYSDEC. An initial Freedom of Information Law (FOIL) request was sent to the NYSDEC on 12 March 2004, requesting information concerning 350 properties bordering the Gowanus Canal and Bay. The NYSDEC assigned the request FOIL Identification No. R2-03-1529, and further indicated that the request was too broad. The NYSDEC requested that subsequent requests include names and addresses of facilities to be investigated, and to limit the number of sites to two (2) per request (Appendix C). Subsequently, modifications to the FOIL request were filed on April 28, 2004, for 20 facilities located in the immediate vicinity of the Gowanus Canal and Bay. The subsequent requests were assigned FOIL Identification Nos. R2-04-153 through -162. The FOIL request was distributed by the NYSDEC to the Hazardous Waste and Solid Materials (HWSM), Site Remediation, Spills, and Air Permitting Divisions. A file review was conducted in June 2004, at the NYSDEC Region 2 offices located at 1 Hunter's Point Plaza, Long Island City, New York.

5.4.3 NYCDEP File Review

A written request was sent via certified mail to the Commissioners Office at the New York City Department of Environmental Protection (NYCDEP) on April 27, 2004, outlining the nature and purpose of this ESA, and requesting assistance in arranging for a file review in connection with the Gowanus Canal and Bay Watershed. According to the NYCDEP, the agency does not have any information relevant to the request.

5.5 POTENTIAL CONTAMINATION SOURCES

The following facilities have been identified as potential sources of contamination to the Gowanus Canal or Bay due to the nature of their operations or history of spills, leaky tanks, or contaminated soils. Facilities/properties are presented, in the following sections, according to which database they were listed in the EDR report. Properties listed in more than one database are discussed once in the category as they are presented below. Potential contamination from each site is summarized based on information provided in the EDR report and supplemented with other sources as appropriate. The databases in the discussion that follows are ordered by the potential for contamination. The higher potential databases are presented first.

5.5.1 Comprehensive Environmental Response, Compensation and Liability Information System

5.5.1.1 National Priorities List

The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) contains data on potentially hazardous waste sites that have been reported to the USEPA pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites on or proposed to be on the National Priorities List (NPL).

- ***Hamilton Avenue Incinerator, 555 Hamilton Avenue*** – This property is located on the Gowanus Canal just southeast of Hamilton Avenue. Potential contamination from the site was discussed in Hamilton Avenue Modified MTS EIS (NYCDOS 2000). The EIS identified areas for concern regarding hazardous materials as:
 - ♦ probability of asbestos-containing materials in the incinerator building;
 - ♦ probable underlying layers of lead-based paint on the incinerator building; and,
 - ♦ possibility of underground fuel oil storage tanks.

Planned modifications to the site for the operation of a Marine Transfer Station included provisions for addressing encountered hazardous materials.

5.5.1.2 CERCLIS- No Further Remedial Action Planned

CERCLIS sites designated as No Further Remedial Action Planned (CERCLIS-NFRAP) are sites that have been removed from CERCLIS. These include sites where investigations concluded that no contamination is present, contamination is not serious enough for NPL consideration, or clean up has occurred rapidly enough to not require NPL status.

- ***Vidan Auto Salvage, 327-321 Bond Street NYD986961167*** – This site is a former Automotive “chop shop” and chemical dumping site under Attorney General investigation. Assessment of the site was completed and site archived as of 09/30/1999 (EDR 2004).
- ***Brooklyn Union Gas/Metropolitan, 2nd Ave & 12th Street/Gowanus NYD980532006*** – One by-product produced during plant operational years was hydrocarbon tars, which was temporarily stored on site until sold. According to BUG, when plant was decommissioned in 1948, remaining tar was removed and the facility was razed. Assessment of the site was completed and site archived as of 09/24/1986 (EDR 2004). This is the site of the Pathmark and Lowes retail establishments.
- ***Brooklyn Union Gas/Citizens Gate, 6th Street & 2nd Avenue NYD980532212*** – In 1981, PCB was identified as a component of condensate in the pipeline. Assessment of the site was completed and site archived as of 09/24/1986(EDR 2004).
- ***U.S. Information Agency, 29th Street and 3rd Avenue NY4470000635*** – Assessment of the site was completed and site archived as of 12/31/1989 (EDR 2004).

- **Blatchford Base Plant, 32 33rd Street NYD980531644** – Assessment of the site was completed and site archived as of 09/22/1987 (EDR 2004).

5.5.2 Resource Conservation and Recovery Act

Resource Conservation and Recovery Act (RCRA) gives the EPA the authority to control hazardous waste from "cradle-to-grave." This authority includes the generation, transportation, treatment, storage, and disposal of hazardous wastes. RCRA sets forth a framework for the management of non-hazardous wastes.

5.5.2.1 RCRA Corrective Action Activity

RCRA Corrective Action Activity (CORRACTS) lists handlers, showing their corrective action core events.

- **Patterson Chemical Co., Inc. 102 3rd Street NYD980592471** – 2002 NAICS Title: General Warehousing and Storage, General Freight Trucking, Local. Facility or area was assigned a low corrective action priority on 05/27/1994 and the RFA was completed on 09/20/1994 (EDR 2004).
- **Debevoise Co. – 74 20th Street NYD091590471** – In addition to being listed as a CORRACTS facility, this facility is also listed as a RCRA transport, storage, or disposal facility. There are four violation records reported at this site. The regulations violated are not reported. Areas of Violation determined were TSD-Other Requirements (Oversight) on 06/15/1982, Generator-All Requirements (Oversight) and Formal Enforcement Agreement on 11/10/1983, and Generator-All Requirements (Oversight) on 01/03/1985. Final monetary penalties were imposed and compliance achieved on 11/09/1982, 12/10/1983, 11/30/1984, and 03/21/1985 (EDR 2004).

5.5.2.2 Resource Conservation and Recovery Information System – Large Quantity Generator

Resource Conservation and Recovery Information System – Large Quantity Generator (RCRIS-LQG) includes selective information on sites, which generate over 1,000 kilograms of hazardous waste or over 1 kilogram of acutely hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. Fifteen (15) RCRIS-LQG's, found within the Project Area are described below. All RECRIS-LQG sites are considered suspect for the potential to have contamination and are depicted on Figure 3.

Of the 15 RCRIS-LQG's listed, violations were reported at only seven of the facilities. The following is a summary of the facility and the reported violations.

- **Citizens Gate Station 77 6th Street NYD987040631** – Violations have been recorded at this facility, although the regulation violated is not recorded. The Area of Violation determined by the EPA was Generator-All Requirements (Oversight) on 03/18/1993. A final monetary penalty of \$57,750 was imposed on 03/18/1994 (EDR 2004).

As of reporting year 2001, the facility reports generating annually 10,700.9 lbs of ignitable, petroleum solvent and 10,700.9 lbs of benzene (EDR 2004).

- *Consolidated Edison Company, Inc. (Con Ed), 222 First Street NYD000706218* – Violations of 6 NYCRR 373-3.2(g)(2) have been recorded at this facility. The Area of Violation determined was Generator-All Requirements (Oversight) on 10/24/2003. Compliance was achieved on 12/04/2003 (EDR 2004).

As of reporting year 2001, the facility reports generating annually 6,850,483.3 lbs of lead, 1,079 lbs of silver, 11 lbs of mercury, and 352 lbs of benzene (EDR 2004).

NYSDEC manual file review:

- ♦ Con Ed requested that the NYSDEC issue a No Further Action for soil remediation and for permission for that Con Ed to stop groundwater sampling for PCBs after six months as long as results show compliance with water quality standards in the areas where the 14 USTs were removed between March 2002 and August 2003 (Gonzalez 2004).
- ♦ Between March 2002 and August 2003, 14 USTs that once contained oil, gasoline, dump oil, and dielectric fluid were uncovered, cleaned, and removed. Soil in the vicinity of the USTs was excavated to the practical maximum extent and transported off-site. Most of the soil was disposed of as PCB hazardous waste. The remaining soil was disposed of as petroleum contaminated soil. Representatives of the facility feel no further soil remediation activities are necessary. In October 2003, three groundwater monitoring wells were installed at the site. Groundwater samples from February 2004 indicated concentrations of benzene, isopropyl benzene, and n-propylbenzene above NYSDEC standards. The facility proposes that groundwater be sampled on a quarterly basis for the next year and analyzed for VOC and SVOC parameters (Jacques Whitford Company, Inc. [JWC] 2004).
- ♦ Approximately one (1) gallon of petroleum-based product was encountered while digging a test well. The spill was related to old USTs found during excavation of a new facility at the site. Twenty-five (25) gallons of soil was removed and the area was barricaded. Clean up was pending test results. Several USTs were found during subsequent excavating activities (NYSDEC 2003).
- ♦ Soil samples in the immediate areas of four former USTs contained multiple VOCs and naphthalene at concentrations higher than NYSDEC's Spill Technology and Remediation Series (STARS) Petroleum-Contaminated Soil Guidance Policy. In addition, groundwater samples contained several VOCs and SVOCs as well as lead at concentrations higher than NYSDEC groundwater standards (JWC 2001).
- ♦ A previous NYSDEC file review of all available documents by JWC (2001) found that the site had six reported spills. Three of the spills involved contaminated soil around USTs, the other spills were elevated VOC levels observed while installing a well, a vehicle being overfilled while refueling, and the presence of a diesel sheen in a trench for a new gas fuel line. In addition, JWC (2001) found that two gasoline USTs were closed in 1994.
- ♦ Four USTs, two diesel fuel tanks and two gasoline tanks, were removed from the site. Soil containing petroleum was removed from the site as part of the closure activities. Soil samples were taken in the immediate areas of the former USTs.

Samples from two of the locations contained VOCs and SVOCs at concentrations higher than NYSDEC's STARS guidance values, whereas samples from the other two locations contained VOCs and SVOCs concentrations that were generally lower than method detection limits. In addition, a groundwater sample contained VOCs at concentrations higher than NYSDEC groundwater standards (Con Ed 1998).

- ***Argus Division Witco Chemical Corp., 688 Court Street NYD003907367*** – Violations of non-reported regulations have been recorded at this facility. The Area of Violation determined was Generator-All Requirements (Oversight) on 04/17/1985, 09/11/1992, and 12/15/1993. The EPA on 07/18/2000 imposed final monetary penalties of \$95,000, and \$45,000 was imposed by the state on 05/24/2002 (EDR 2004).

Violations of 40 CFR 265.1085(c) have been recorded at this facility. The Area of Violation determined was Generator-All Requirements (Oversight) on 03/31/2000. Compliance was achieved on 04/29/2000 (EDR 2004).

EDR (2004) summary of bulk storage tanks:

- ♦ Two 1,500-gallon Nos. 1, 2, or 4 fuel oil UST's, two Nos. 5 or 6 fuel oil UST's (3,000-gallon and 7,600-gallon), and one 7,500-gallon empty UST's.
- ♦ One 8,000-gallon Nos. 5 or 6 fuel oil AST and one 940-gallon Nos. 1, 2, or 4 fuel oil AST.

EDR (2004) summary of reported spills, leaks, or contaminated soil:

- ♦ A spill of unknown petroleum was reported on 07/27/1988, as released to the sewer. The NYSDEC conducted an inspection and referred the matter to the SPDES Unit and the NYCDEP. It was determined that the cause of the spill involved the operation of the plant. NYCDEP Enforcement and Compliance imposed permit limitations and treatment requirements to prevent reoccurrence of problem.

NYSDEC manual file review:

- ♦ The NYSDEC and the New York State Department of Health (NYSDOH) made the determination that the proposed Dual-Phase, High Vacuum Extraction (DPHVE) remediation process was a viable means of remedial technology for the site. Additionally, the NYSDEC requested that the Crompton Corporation set up a meeting to discuss the possibility of expediting the negotiation of an Order of Consent with the NYSDEC on the premise that groundwater and soil monitoring data will be submitted to the NYSDEC for review and will continue until the NYSDEC notifies the Crompton Corporation otherwise (Kaminski 2002).
- ♦ A *Closure Plan* (Enviro-Sciences, Inc. [ESI] 2001a) was submitted to NYSDEC and the NYSDOH to initiate the process to certify closure of the Witko plant and begin remediation activities (Smith 2001).
- ♦ According to the *Closure Plan* (ESI 2001a), the Witko facility had approximately 100 ASTs of which only five contained hazardous waste.
- ♦ During March and April 2000, six VOCs (*i.e.*, benzene, 1,2 dichloropropene, toluene, ethylbenzene, xylenes, and acetone) and three SVOCs (*i.e.*, naphthalene, 2-methylnaphthalene, and phenol) were found in the soil at several different locations within the site at concentrations higher than the site-specific target

levels (SSTLs). Additionally, groundwater samples depicted elevated concentrations of benzene, xylene, and toluene, and concentrations of acetone, phenol, and naphthalene exceeding SSTLs. Between April and June of 2000, three monitoring wells had measurable amounts of separate phase hydrocarbons (SPH) During another sampling event in December 2000, several soil borings detected lead and cadmium at concentrations above their hazardous waste threshold. As such, 8 areas within the site were deemed candidates for DPHVE remediation (ESI 2001b).

- ♦ Plant closure activities began in September 1999. Fifteen (15) hazardous waste containers were closed in accordance with NYSDEC requirements and four USTs were closed in accordance with all local, state, and Federal regulations (ESI 2000)
- ***U.S. Food and Drug Administration, 850 3rd Avenue NY0750600637*** – Violations of non-reported regulations have been recorded at this facility. The Area of Violation determined was Generator-All Requirements (Oversight) on 10/19/1989. Final compliance was achieved on 05/24/1990 (EDR 2004).

EDR (2004) summary of reported spills, leaks, or contaminated soil:

- ♦ 200 gallons of No. 2 fuel oil was reported as spilled on 01/15/1994. The spill was a result of tank overflow. Supervisor gave wrong tank size, causing the overflow. NYCDEP arrived on the site in the afternoon and sand was applied to cleanup the fuel oil.
- ***Con Ed-Gowanus Gas Turbine, 27th Street & 3rd Avenue NYD981182215*** – Violations of non-reported regulations have been recorded at this facility. The Area of Violation determined was Generator-All Requirements (Oversight) on 06/18/1997. Final compliance was achieved on 07/21/1997 (EDR 2004).

As of reporting year 2001, the facility reports generating annually 22.05 lbs of lead, 22.05 lbs of cadmium, 10 lbs of mercury, and 22.05 lbs of chromium (EDR 2004).

- ***Tekni-Plex, Inc., 68 35th Street NYD042023333*** – Violations of non-reported regulations have been recorded at this facility. The Area of Violation determined was Generator-All Requirements (Oversight) on 11/14/1989. Final compliance was achieved on 03/02/1990 (EDR 2004).
- ***Arthur Matney Company Incorporated, 4014 1st Avenue NYD981488216*** – Violations of 6 NYCRRR 373-3.9(e),373-3.2(g) have been recorded at this facility. The Area of Violation determined was Generator-All Requirements (Oversight) on 04/11/2002. A final monetary penalty of \$38,500 was imposed by the State on 07/03/2003 (EDR 2004).
Violations of 6 NYCRRR 372/373/374 have been recorded at this facility. The Area of Violation determined was Generator-All Requirements (Oversight) on 10/30/2003. Compliance was not reported (EDR 2004).

As of reporting year 2001, the facility reports generating annually 24,621.04 lbs of ignitable, petroleum solvent and 24,621.04 lbs of non-halogenated solvent (EDR 2004).

No violations are reported for the remaining eight facilities. However, there are reports of spills or leaking underground storage tanks (UST's) for a few of these facilities. Brief summaries of reported spills, leaks, or contamination are provided below.

- *Tanks To U, 233 Nevins Street NYR000114371*
- *NYSDOT, Hamilton Avenue & 16th Street E Wing NYR000017087*
- *Public Utilities Maintenance Inc., 93 14th Street NYR000117267*
- *NYSDOT Contract #259078, 201 2nd Avenue Gowanus Expressway NYR000110916*
- *MTA NYCT – Campbell Storage Facility, 532 Smith Street NYR000045898*
- *General Industrial Service Corp, 603 Clinton Street NYR000105270*
- *Yookel, Inc., 224 40th Street NYR000063487*
- *Spentonbush Red Star Co STE85, 671 Court Street NYR000062760* – Spill of diesel oil was reported on 12/17/1998. A sheen was observed on the Gowanus Creek by a tugboat Captain (Atlantic Star). An absorbent boom was put in place (EDR 2004).

5.5.2.3 Resource Conservation and Recovery Information System – Small Quantity Generator

Resource Conservation and Recovery Information System – Small Quantity Generator (RCRIS-SQG) includes selective information on sites that generate less than 100 kilograms of hazardous waste or less than 1 kilogram of acutely hazardous waste per month. Twenty-five (25) RCRIS-SQG's found within the Project Area are described below.

Three RCRIS-SQG's are also listed as Major Oil Storage Facilities (MOSF's); no violations are listed for these three facilities. The locations of these facilities are depicted on Figure 3. A summary of UST's and AST's are provided for each facility, along with descriptions of reported spills, leaking tanks, and/or contaminated soils.

- *Amerada Hess Corporation – 659-730 Court Street 1000352824*

EDR (2004) summary of bulk storage tanks:

- ♦ Four 5,000-gallon Nos. 5 or 6 fuel oil UST's, seven Nos. 1, 2, or 4 fuel oil UST's (179,256-gallon, 250,026-gallon, 1,378,020-gallon, 1,059,366-gallon, 1,380,372-gallon, 2,281,272-gallon, and 2,281,314-gallon), and seven empty UST's (four 54,000-gallon, two 72,000-gallon, and one 90,000-gallon) with no secondary containment, but with ground water wells for leak detection for a few of the tanks.
- ♦ Three Nos. 5 or 6 fuel oil AST's (4,331,880-gallon, 5,988,024-gallon, and 4,536,210-gallon), one 5945,100-gallon Nos. 1, 2, or 4 fuel oil AST, and one 1,080-gallon diesel AST. Except for the diesel tank, all other AST's have prefabricated steel dike secondary containment.
- ♦ One 2,000-gallon ethylene glycol AST.

EDR (2004) summary of reported spills, leaks or contaminated soil:

- ♦ Sixty-five (65) gallons of No. 6 fuel oil was spilled in the Gowanus Canal on 12/17/1986, due to equipment failure.

- ♦ One hundred and twenty (120) gallons of No. 4 fuel oil was spilled on land on 08/03/1990, when a pump was turned on while a check valve was being replaced. Spill was contained and cleaned up with speedy dry.
- ♦ Approximately 300 gallons of No. 2 fuel oil spilled on land on 12/21/1991, from a tank truck due to equipment failure.
- ♦ Seventy (70) gallons of No. 6 fuel oil leaked on to truck and loading rack drain system on 01/13/1992, due to human error.
- ♦ Approximately 300 gallons of No. 6 fuel oil spilled to the Gowanus Bay on 02/01/1992 . The cause of the spill was not reported.
- ♦ Approximately 100 gallons of No. 6 fuel oil spilled on land on 01/24/1994, when a rope got hung up in the loading dock, causing a truck to overflow.
- ♦ On 01/16/1995, a sheen was reported in the vicinity of the facility. When hazmat contractor arrived, the sheen had dissipated.
- ♦ Soil contaminated with No. 6 fuel oil was discovered on 01/31/1995, presumed to have come from an underground line leak.
- ♦ Thirty (30) gallons of No. 2 fuel oil spilled on land on 01/19/1999, due to a broken fitting on the tank.
- ♦ Twenty-five (25) gallons of No. 2 fuel oil was released to land on 03/04/1999, reported due to human error.
- ♦ Fifty-eight (58) gallons of No. 6 fuel oil spilled on 11/14/2001 when the loading arm came out of the truck.
- ♦ Fifty-nine (59) gallons of diesel was reported spilled on land due to a tank overflow on 01/03/2002.
- ♦ Twenty-five (25) gallons of No. 6 fuel oil was spilled on land on 01/18/2002, from a tank overflow.
- ♦ Ten (10) gallons of No. 4 fuel oil was reported spilled on land on 12/03/2003.
- ♦ Fifty (50) gallons of No. 2 fuel oil was spilled on land on 02/02/2004.

In 1976, a massive fire at this site destroyed underground fuel tanks of the Patchogue Oil Terminal and resulted in millions of gallons of petroleum (Nos. 2 and 6 fuel oil) spilled and discharged to the Gowanus Channel and Bay (Thomas 1976).

- ***Bayside Fuel Oil Depot – 510 Sackett Street 1000382088***

EDR (2004) summary of bulk storage tanks:

- ♦ Two Nos. 1, 2, or 4 fuel oil UST's (1,500,000-gallon and 1,000-gallon) with no secondary containment, but with ground water wells for leak detection. Tanks tested 12/03/1998.

EDR (2004) summary of reported spills, leaks or contaminated soil:

- ♦ The barge, Gowanus Trader, developed a leak of 25-gallons of No. 2 fuel oil on 01/25/1991. NYCFD and the USCG responded to the site and deployed a boom and absorbents to trap spill.
- ♦ On 06/26/1996, drums containing an unknown petroleum product were found leaking at the facility.

- ***Bayside Fuel Oil Depot – 527-539 Smith Street 1001224101***

EDR (2004) summary of bulk storage tanks:

- ♦ Two Nos. 5 or 6 fuel oil UST's (500,010-gallon and 390,012-gallon), one 200,004-gallon Nos. 1, 2, or 4 fuel oil UST, and 10 empty UST's (eight 15,000-gallon, one 18,000-gallon, and one 28,000-gallon) with no secondary containment, but with ground water wells for leak detection.
- ♦ Four Nos. 1, 2, or 4 fuel oil AST's (two 448,182-gallon and two 3,000-gallon).

EDR (2004) summary of reported spills, leaks or contaminated soil:

- ♦ Tank test failure of a 15,000-gallon No. 2 fuel oil UST on 11/26/1990.
- ♦ Tank test failure of a No. 6 fuel oil tank on 09/10/1991.
- ♦ Two gallons of No. 2 fuel oil spilled when the driver overfilled the tank truck on 02/08/1996. Spill cleaned up with absorbents.
- ♦ Fifty gallons of No. 4 fuel oil was spilled on 03/05/1993, when the transfer hose fell out of the manway on storage tank. Vacuum truck and sorbent pads were used to clean up spill.
- ♦ Two hundred gallons of No. 4 fuel oil was spilled on 02/24/1998, when a tank truck moved while loading and ripped the hose out. The spill was contained in the oil separator trough.

Of the remaining 22 RCRIS-SQG's, violations were reported at only four facilities. The following is a summary of the facility and the reported violations.

- ***Olympic Environmental Services, 107 6th Street 1000302326*** – One violation of non-reported regulation has been recorded at this facility. The Area of Violation determined was Generator-Manifest Requirements on 09/08/1987. Final compliance was achieved on 09/10/1987 (EDR 2004).
- ***Brooklyn Coatings, Inc, 254 36th Street 1000333155*** – One violation of non-reported regulation has been recorded at this facility. The Area of Violation determined was Generator-All Requirements (Oversight) on 04/14/1988. Final compliance was achieved on 04/06/1990 (EDR 2004).
- ***Kentile Floors, 58 2nd Avenue 1000411709*** – One violation of non-reported regulation has been recorded at this facility. The Area of Violation determined was Generator-All Requirements (Oversight) on 04/27/1987. Final compliance was achieved on 07/10/1987 (EDR 2004).

EDR (2004) summary of bulk storage tanks:

- ♦ Four Nos. 1, 2, or 4 fuel oil UST's are closed in-place at the property.
 - ♦ The 6,000-gallon tank was inspected on 02/01/1989 and closed 12/01/1992.
 - ♦ Three tanks (two 1,500-gallons and one 1,000-gallon) closed; date not reported.
- ***Ulano Corporation, 225 Butler Street*** – Five violations of non-reported regulations have been recorded at this facility. For four of the violations, the Area of Violation determined was Generator-All Requirements (Oversight) on 08/15/1984, 07/06/1988, 12/04/1992, and 06/15/2000. The Area of Violation determined on 02/26/2001 was NYGCE. Final compliance was achieved 05/22/1985, 01/27/1989, 01/14/1993, 07/26/2000, and 06/01/2001, respectively (EDR 2004).

EDR (2004) summary of bulk storage tanks:

- ♦ One 1,000-gallon Nos. 1, 2, or 4 fuel oil UST is in-service with no secondary containment. The tank was tested on 04/01/1998.
- ♦ One 2,000-gallon UST with no secondary containment is closed with test data not reported.
- ♦ Two AST's, one 9,000-gallon Nos. 5 or 6 fuel oil in-service with vaulted containment and one closed 550-gallon Nos. 1, 2, or 4 fuel oil tank.
- ♦ Two 550-gallon unleaded gasoline UST's were removed.
- ♦ Three 4,000-gallon unleaded gasoline tanks and one 550-gallon Nos. 1, 2, or 4 fuel oil tank were closed and removed.
- ♦ One 550-gallon UST was converted to non-regulated use.

A tank test failure occurred on 03/12/1998 to a 10,000-gallon No. 2 fuel oil UST (EDR 2004).

No violations are reported for 18 RCRIS-SQG's. However, for a few of these facilities there are reports of spills or leaking underground storage tanks. Brief summaries of reported spills, leaks, or contamination are provided below.

- ***Home Depot USA, Inc, 550 Hamilton Avenue 1001818194***
- ***Triple One Cleaners, Inc., 111 3rd Street 1000122727***
- ***Giumenta Corp., 51 4th Street 1000789934***
- ***Pippin Enterprises, LTD, 220 3rd Street 1000790830***
- ***Chatham Cleaners, 280-282 Nevins Street 1000407106***
- ***Maaco Auto Painting & Body Work, 354-358 4th Avenue 1000174861***
- ***15th Street Auto Body, Inc., 28 15th Street 100446356***
- ***Industry City Associates, 241 37th Street 1004756417, 1000912611*** – Two 6,000-gallon in-service Nos. 1, 2, or 4 fuel oil UST's with vaulted secondary containment. Tank was tested 04/01/1998 (EDR 2004).
- ***Regency Service Carts, 450 Union Street 1000296296*** – Soil samples taken on 07/16/2001 revealed soil contaminated with No. 2 fuel oil. All water samples were clean (EDR 2004). Underground storage tank at rear of lot is abandoned and must be removed along with any contaminated soil. The entire site must be capped with two feet of clean fill due to potential contamination of old fill. (GCCDC).
- ***Wesley Laquer, 95 4th Street 1000282561*** – During removal of six out-of-service CBS UST's, two 2-Propane and four Toluene, on 03/18/1999, there were elevated PID readings. The tanks were encased in concrete and soil was stockpiled (EDR 2004).
- ***Mobil Oil Corporation, 375 Hamilton Avenue 1000553814*** – Two 4,000-gallon gasoline UST's failed tank tests on 08/22/1989. Contaminated soil was discovered 08/02/1993 during a subsurface investigation that followed a leakage alarm on 07/12/1993 (EDR 2004).
- ***Virginia Dare Extract Company, 882 3rd Avenue 1004760926*** – A bottle of bromine was spilled on 09/11/1996 and cleaned by Hazmat contractor who disposed of the waste

(EDR 2004). Five-gallons of Dominion brominated vegetable oil overflowed from tank while bromine was being added to oil, on 03/13/1997 (EDR 2004).

- ***Petroleum Tank Cleaners, 236 Butler Street 1000367193*** – One in-service, 3,000-gallon Nos. 1, 2, or 4 fuel oil UST, three temporary out-of-service Nos. 5 or 6 fuel oil UST's (two 10,000-gallons and one 20,000-gallons), and one in-service Nos. 5 or 6 fuel oil AST (EDR 2004).
- ***Bruno Truck Sales – 435 Hamilton Avenue 1000871903*** – Three 1,000-gallon (storing lube oil and other product) and two 4,000-gallon (unleaded gasoline and diesel) temporary out-of-service UST's (EDR 2004).
- ***Costco Wholesale Corp – 976-990 3rd Avenue 1001233115*** – During removal of the underground storage tanks in 1995, it was discovered that two 4,000-gallon tanks removed had been leaking. An undetermined amount of No. 2 fuel oil may have leaked in to the surrounding soil (EDR 2004).
- ***Penske Truck Leasing Company – 347 Bond Street 1000990241*** – Soil borings revealed contamination with diesel oil. It was believed that over time the material was spilled, during the operations of the garage, and accumulated in the soil (EDR 2004).
- ***Filmar Tank Cleaning Company – 107 6th Street 1000302326*** – Ten (10) gallons of waste oil was spilled on 08/02/1994, when waste oil was transferred from tank to trailer that had a leak. Storage tanks have been cleaned and groundwater wells installed (EDR 2004).

5.5.2.4 Underground Storage Tank

Underground Storage Tanks (UST's) are regulated under subtitle I of RCRA. The database is from the NYSDEC's petroleum bulk storage database. Status of UST's and summaries of reported spills, leaks, or contamination are provided below.

- ***Nick's Union Nevins Service Station, Corp., 301 Nevins Street U003128182*** – Four 550-gallon UST's, temporary out of service (EDR 2004).
- ***Clarín Truck Leasing, Corp., 312 3rd Avenue U001839158*** – Six 550-gallon in-service diesel UST's with vaulted secondary containment. Tank testing data are not reported (EDR 2004).
- ***NYCFD Engine 279 / Ladder 131, 252 Lorraine Street U001840024*** – Three UST's, one 2,500-gallon Nos. 1, 2, or 4 fuel oil tank with vaulted secondary containment with access and two 275-gallon unleaded gasoline tank closed in place. Site also has an above ground 550-gallon diesel tank with a prefabricated steel dike as secondary containment. Tank testing data are not reported (EDR 2004).
- ***Zophar Mills, Inc., 112-130 26th Street U003644403, U003644490*** – Five UST's, one 550-gallon tank, one 1,080-gallon tank, two 1,080-gallon Nos. 1, 2, or 4 fuel oil tanks, and one closed 1,080-gallon Nos. 1, 2, or 4 fuel oil tank. None of the tanks have secondary containment and tank testing data are not reported (EDR 2004).

- ***GH Management, LLC., 66 4th Street U003749712*** – Four 1,080-gallon tanks (three unleaded gasoline and one diesel) closed in place. Tank testing data are not reported (EDR 2004).

Soil samples from the site, contaminated with fuel oil, were reported to the NYSDEC in October 2001. Consultant determined that one of the UST's failed a tank test (EDR 2004).

5.5.3 New York State Databases

5.5.3.1 Leaking Storage Tank Incident Reports

Leaking Storage Tank Incident Reports (LTANKS) are an inventory of reported leaking storage tank incidents. Only one site on the LTANK database was not included in any of the site descriptions in the above sections (Sections 5.5.1 and 5.5.2).

- ***U Haul Company of Metro NY, 213-259 6th Street S102672726*** – Volatile organic compounds, later determined to be gasoline, was detected in soil borings during the removal of an underground storage tank in 1994 (EDR 2004).

5.5.3.2 Aboveground Storage Tank

The NYDEC maintains an Aboveground Storage Tank (AST) database as part of its PBS database. Only one site on the AST database was not included in any of the site descriptions in the above sections (Sections 5.5.1 and 5.5.2).

- ***Miller Bros. Realty, 200 6th Street AST U003389384*** – Active Petroleum Bulk Storage (PBS) facility with total PBS capacity at greater than 1,100 gallons for Nos. 1, 2, or 4 fuel oil (EDR 2004).

5.5.3.3 NY Spills

The NYSDEC maintains an active NY Spills list (SPILLS) pursuant to 6 NYCRR Sections 613.8 and 595.2. Only one site on the SPILLS database was not included in any of the site descriptions in the above sections (Sections 5.5.1 and 5.5.2).

- ***B and R Auto Parts, Inc., 479-493 Hamilton Avenue S102663675*** – The facility dismantles vehicles. A visual inspection of the site revealed contamination of the soil with waste oil. NYCDEP attempted to have facility install oil/water separators with further action to follow. Last update to the record was on 6/17/1998 (EDR 2004).

5.5.4 Sites Suspected Due to Current Use

The operations of the following facilities could have the potential to contribute contamination to the Gowanus Canal if appropriate environmental protection measures are not incorporated into their standard operation procedures. The following is a brief description of the three facilities.

- ***Three G's Company, 551 Smith Street*** – Facility operates scrap metal and concrete mixing businesses on the edge of the canal. Both business have the potential to

contribute to contamination of the canal if procedures for identifying hazardous materials within demolition materials are not employed and those materials are allowed to fall in to the canal (refer to the photographic documentation in Appendix D).

- ***C. A. Properties, Corp., 110 2nd Avenue*** – Facility operates a waste transfer facility located adjacent to the canal and between the 6th and 7th street turning basins. This facility has the potential to contribute to contamination of the canal if procedures for preventing containers from spilling and entering the canal are not employed.
- ***NYCDEP Flushing Tunnel*** – The Flushing Tunnel transports on average 200 million gallons of water a day from Buttermilk Channel to the Gowanus Canal. Contaminated water from discharges or accidental spills in Buttermilk Channel can be transported, unchecked, into the Gowanus Canal.

5.5.5 Under-utilized Properties

For the purposes of this report, under-utilized properties may be Brownfield sites or other properties that due to the presence of contamination, or the potential for contamination to be present, can not be developed to their full financial potential. Figure 4 depicts the sites in the Project Area identified as under-utilized sites.

5.5.5.1 Brownfields Sites

NY VCP – Brownfields Databases – Voluntary Cleanup Agreements. Private monies to get contaminated sites remediated to levels allowing for the site’s productive use. The following sites are identified in the EDR (2004) report as being within 1 mile of the Gowanus Canal and within the scope of the project:

- ***53 Boerum Place, 231-241 State Street*** – VCP S106122303
- ***Vichar, Inc., 455 Smith Street (Carroll Gardens – Public Place)*** – VCP S106122204

5.5.5.2 GCCDC Identified Sites

The GCCDC studied properties in the vicinity of the Gowanus Canal regarding their potential for qualifying as Brownfields. The following are a summary of six of the properties identified by the GCCDC as under utilized sites for further investigation as potential Brownfields sites (2003a):

- ***226 Nevins Street*** – The property is operated by Sanitation Repairs, Inc., Bridge Runners, MC and is used to park sanitation vehicles. There may be potential soil contamination due to the proximity of a 3,000 gallon fuel UST and a 7,000 gallon fuel AST located at 236 Butler St, described above in Section 5.5.2.3.
- ***426 Presidents Street*** – The property is currently used as automobile storage. The surrounding lots are used for car parks across President St. to the north and factories & industrial buildings to the south. Potential for contamination exists from the location of

e on Gollum:/projects/-park/aprs/2004/eaerrrv04.apr

the property immediately on the canal where the soil and sediments could be impacted by unknown materials used as fill in creation of the canal, and from seepage of contaminated canal waters into the sites groundwater system. Additionally, the site is in proximity to Vidan Auto Salvage, a CERCLIS-NFRAP site discussed above in Section 5.5.1.2.

- **347 Bond Street** – There is one, one-story fireproof building that covers approximately half of the property. The structure was built in 1931, and is categorized as garage/gas station. The remaining half of the property (eastern portion) is vacant. EDR (2004) reports that soil borings revealed contamination with diesel oil that is believed to have been spilled over time when the property was operated as a garage.
- **421 Bond Street** – The land use at the property is industrial buildings and warehouse. There have been multiple permits issued for plumbing, sprinkler installation, and general construction through out the past five years. Potential for contamination exists from the location of the property immediately on the canal where the soil and sediments could be impacted by unknown materials used as fill in creation of the canal, and from seepage of contaminated canal waters into the sites groundwater system. Additionally, the site is in the close proximity to Public Place, a former MGP.
- **2-20 2nd Avenue** – The site is vacant and is being used for truck parking and turnaround by adjacent businesses. The site was formerly used by NYC Dept of Sanitation for the processing of solid waste and an interim transfer station, and the land may have received large amounts of raw garbage (PICCED 1987). The following toxic activities reportedly occurred either on or near the site: Active Tank Failure, Active Tank Test Failure, Active Hazardous Spill, Petroleum Bulk Storage Site, Hazardous Waste Generator/Transporter (Toxics Targeting 2000a). To the south, the properties are being used by IESI, a private asbestos transfer facility. Potential for contamination exists from the location of the property immediately on the canal where the soil and sediments could be impacted by unknown materials used as fill in creation of the canal, and from seepage of contaminated canal waters into the sites groundwater system.
- **89-97 9th Street** – The contiguous properties are used for parking and as a fueling station. The property directly south, on the other side of 6th St., is used for warehouse and manufacturing. In the past year this lot has been issued multiple permits for installing air conditioning units, gas meters, and gas fired space heating units. A permit for the construction of a 4,000 gallon diesel AST was issued in April 10, 2002. Potential for contamination exists from the location of the property immediately on the canal where the soil and sediments could be impacted by unknown materials used as fill in creation of the canal, and from seepage of contaminated canal waters into the sites groundwater system.

6.0 OPINION

On the basis of the research presented in this ESA, petroleum hydrocarbons, VOCs and SVOCs, can reasonably be expected to occur in sediments and soils throughout the Project Area. Further, given that the filling of the Gowanus Creek in the late 1800's was unregulated, and taking into account the nature of historic industrial operations within the Project Area, buried hazardous materials and contaminated soils are likely to be present. Additionally, prior to the construction of the Owls Head and Red Hook Water Pollution Control Plants (WPCP's) the Gowanus Canal received untreated sewage from residential properties and industrial facilities. Contaminants historically discharged into the Gowanus Canal were likely redistributed by the action of the Flushing Tunnel when it was active, and are thus likely to be ubiquitous along its length.

Therefore, the opinion of this report is that, for any properties located on the canal that are put forward for revitalization efforts, extensive sampling of soils and sediments will be necessary in order to adequately characterize the associated environmental risks. However, for those properties set back from the canal, additional sampling of soil or water quality will be necessary for those sites with a history of land use that may have generated hazardous waste or is listed on a database due to potential contamination at the site.

7.0 CONCLUSIONS

The conclusions reached in the ESA are as follows:

1. The Project Area has been the site of intensive industrial activity for over 150 years.
2. Industrial operations within the Project Area have historically included MGPs, coal yards, bulk oil terminals, metal smelters, chemical manufacturers, and recycling operations.
3. Untreated industrial and sanitary wastes were discharged directly into the Gowanus Canal for a period of at least 120 years.
4. Several major fires occurred within the Project Area during the late 19th Century and early 20th century, which resulted in the release of relatively large amounts of petroleum and other environmental contaminants into the environment.
5. Petroleum hydrocarbons, VOCs and SVOCs are known to be widespread environmental contaminants within the Project Area, and may be present in the soil and (or) sediments at concentrations exceeding applicable hazardous waste thresholds.
6. The contaminants historically discharged into the Gowanus Canal are likely to have been redistributed along its length due to the Flushing Tunnel and dredging operations.
7. In order to fully characterize environmental risks extensive sampling of the soils and groundwater will be necessary at properties located directly on the canal and those sites with a history of spills, leaking tanks, soil contamination or land use as an RCRIS-LQG, or RCRIS-TSD.

8.0 RECOMMENDATIONS

Prior to implementation of any revitalization projects, the following additional work is recommended:

1. CERCLIS sites, including CERCLIS-NFRAP sites, have been investigated and interest in developing or conducting restoration projects on those sites will require researching the investigations performed for those sites.
2. It is recommended that the operational and regulatory histories of other sites targeted for restoration projects be investigated in more detail, including interviews with landowners or facility managers and investigations of the interior of any structures; and that the results of any previous environmental investigations be compiled and analyzed.
3. Properties with waterfront on the Gowanus Canal or any of the under-utilized properties listed in Section 5.5.5 should be subjected to targeted sampling of soils and sediments for laboratory analysis of hazardous, toxic, and radioactive (HTRW) compounds. The recommended laboratory analyses include USEPA Target Compound List (TCL) VOCs and semivolatile organic compounds (SVOCs); Priority Pollutant (PP) metals and pesticides; PCBs; and total petroleum hydrocarbons (TPHC), as well as a RCRA waste-characterization analysis of selected samples. Field screening for VOCs and radioactive materials also is recommended.

1.0 INTRODUCTION

The Gowanus Canal, located within a highly developed portion of Brooklyn, New York, was constructed in 1881 to accommodate industrial users and commercial shippers to the Brooklyn waterfront. As a result, the canal has been subject to over a century of heavy industrial use and is now characterized by poor water quality, contaminated sediments, deteriorating bulkheads, a poor benthic community structure, extensive filling, hardened shorelines, and unpleasant odors. For over the last decade the Gowanus Canal Community Development Corporation (GCCDC) has been instrumental in bringing attention to cleaning up the canal area.

The House of Representatives Committee on Transportation and Infrastructure Resolution authorized, on April 15, 1999, the “Gowanus Canal and Bay Ecosystem Restoration Project” (Project). The non-Federal partner for the Project is the New York City Department of Environmental Protection (NYCDEP). Further, in July 2002, the U.S. Environmental Protection Agency (EPA) and the U.S. Army Corps of Engineers (USACE) entered into a Memorandum of Understanding (MOU) to facilitate cooperation between the two agencies to address critical water quality issues and economic revitalization and public use and enjoyment of urban rivers. As part of the MOU, the two agencies agreed to designate eight demonstration pilot projects for the purpose of coordinating the planning and execution of urban river clean-up and restoration. On July 30, 2003, the EPA and USACE announced the acceptance of Gowanus Canal and Bay into the Urban Rivers Restoration Initiative (URRI).

As one component of the Project and in conjunction with the URRI, the USACE, New York District, under an existing IAG with the EPA, Region 2, commenced the preparation of a Phase I Environmental Site Assessment (ESA) for the upland portions of the Project. The first task of the ESA was to identify what relevant documents and data sources were readily available for use in conducting the ESA. This report documents this initial task. Section 2.0 documents the materials available at the GCCDC offices, Section 3.0 provides a description of data available through other sources, and Section 4.0 provides a brief summary of the overall results of the literature search.

2.0 LITERATURE AVAILABLE AT THE GOWANUS CANAL COMMUNITY DEVELOPMENT CORPORATION

The GCCDC, located at 515 Court Street, Brooklyn, NY, has served the community since 1978, working with a mandate to promote housing and community development. Its efforts include working with the city, state, and Federal government to redevelop and restore the Gowanus Canal waterfront. GCCDC involvement with the Gowanus Canal has enabled it to acquire a variety of materials relevant to the Project. Approximately 10 linear feet of files in the GCCDC offices that covered a time period from the mid-1970's were reviewed on November 26, 2003, for relevance. From this, a total of 23 sources were identified. The types of information summarized in Table 1 include: community planning documents, upland contamination documents, water quality and waterfront condition documents, and Gowanus Canal Revitalization meeting materials and minutes.

2.1 COMMUNITY PLANNING DOCUMENTS

Nine documents (see Table 1, Data Source ID numbers 1 through 9) were identified that provide information regarding current and historic land use information on properties adjacent to the Gowanus Canal. The documents provide statistics on the community and canal; describe the history of canal dependent use; and detail community and business development goals.

2.2 UPLAND CONTAMINATION DOCUMENTS

Five documents (see Table 1, Data Source ID numbers 10 through 14) were identified that provide information on site contamination, summarize historic contamination sources, and identify sites with known contamination. In addition, three of the documents provide the results of Phase II soil, groundwater, and drum tests.

2.3 WATER QUALITY AND WATERFRONT CONDITION DOCUMENTS

Three documents (see Table 1, Data Source ID numbers 15 through 17) were identified that provide information on water quality and waterfront conditions. Two of the studies focus on the results of water and air sampling during the shutdown and following the reactivation of the Gowanus Canal Flushing Tunnel. The third document, the Gowanus Canal Bulkhead Inventory (GCCDC 2000), provides information useful in identifying ownership of the land adjacent to the Gowanus Canal and helps to identify bulkheads in need of repair.

2.4 GOWANUS CANAL REVITALIZATION MEETING DOCUMENTS

Review of Gowanus Canal Revitalization Meeting minutes and materials identified five documents (see Table 1, Data Source ID numbers 18 through 23) regarding community development and rediscovery of the Gowanus Canal. These documents may be of limited utility due to their focus on the public's vision of the future revitalization of the Canal.

Table 1. Documents and Data available through the GCCDC.

Data Source ID	Report Title	Author or Agency	Analyses	Data Utility
Community Planning Documents				
1	GCCDC Strategic Plan	NYS Division of Housing and Community Renewal (2003)	Review of canal and neighborhood revitalization efforts. Provides vision and goals and history and organization of GCCDC.	Provides community statistics.
2	Gowanus Canal Rediscovery Plan, Draft Task 7 Report	NYSDOS (2003)	Details canal dependent use and bridge crossing information. Summarizes waterfront structures, bulkheads, topography/ hydrography, and natural/ architectural/ cultural/ and community resources.	Provides statistical information about the canal and the surrounding area.

Table 1. Documents and Data available through the GCCDC (continued).

Data Source ID	Report Title	Author or Agency	Analyses	Data Utility
3	Gowanus Canal Rediscovery Plan, Task 9 Report	NYSDOS (2003)	Reviews 13 potential waterfront sites for walkway suitability.	Provides a summary of known information of 13 waterfront properties.
4	Miscellaneous property information	GCCDC (2002-2003)	Notes and other information regarding waterfront property.	Information is varied in quantity and quality.
5	A Competitive Gowanus Canal, draft	GCCDC (1997?)	Canal visioning document in a large paper format.	Limited information on waterfront property.
6	The Gowanus Canal Development Study	GCCDC (1987)	Provides profile of community and businesses surrounding the canal, and provides visions and goals for canal development.	Limited information on waterfront property.
7	Carroll Gardens/Gowanus Development Plan	GCCDC (1983)	Provides profile of community and businesses surrounding the canal. Provides visions and goals for canal development.	Limited information on waterfront property.
8	Property Survey Maps	Various 1978	Property survey maps of the Gowanus and surrounding neighborhoods.	Age and quality of maps may limit utility. Map sources are unknown.
9	Insurance Maps (unknown dates)	Sanborn Maps	Photocopies of what appears to be Sanborn insurance maps.	Due to lack of authorship or date markings, maps may have limited use.
Upland Contamination Documents				
10	Revised Remedial Work Plan (Lowe's Site)	FC Gowanus Associates (2002)	Contains remedial work plan and associated documents. Includes a summary of site contamination and history.	Contains property information and contamination history.
11	Computerized Environmental Report, Gowanus Canal	Toxics Targeting (2000)	Study divides canal area into north and south sections and identifies those sites that are listed in government databases with known contamination.	Study is dated.
12	Phase II Investigations - Carroll Gardens Site No. 224012 (Public Place)	Roux Associates (1990)	Results of Phase II type soil, groundwater, and drum testing.	Contains property information and contamination test results.

Table 1. Documents and Data available through the GCCDC (continued).

Data Source ID	Report Title	Author or Agency	Analyses	Data Utility
13	Analytical Data Package for Gibbs & Hill, Inc. Carroll Gardens Site (Public Place)	H2M Labs (1990)	Analytical testing results of tests performed for the Phase II Investigation.	Detailed analytical information of Public Place environmental samples.
14	Final Report, Vacant Property Site Assessment, Carroll Gardens, Brooklyn	TRC Environmental Consultants (1985)	Results of Phase I site visit and Phase II soil sampling program.	Dated materials.
Water Quality and Waterfront Condition Documents				
15	Water and Air Quality Sampling at Gowanus Canal during May 2002 Temporary Deactivation of Flushing Tunnel	NYCDEP (2002)	Results of water and air quality sampling during the temporary shutdown of the flushing tunnel.	Study has limited utility.
16	Final Report on Water Quality and Biological Improvements After Reactivation of the Gowanus Canal Flushing Tunnel	NYCDEP (2001)	Results of water quality and biological sampling after the Flushing Tunnel was reactivated.	Study provides initial water quality improvements after tunnel was reactivated.
17	Gowanus Canal Bulkhead Inventory	GCCDC (2000)	Bulkhead owner, type of construction and general condition of bulkheads along each waterfront property on the Gowanus Canal. Includes visual observations and photos of bulkheads down to MLW.	Data useful in identifying ownership of the land adjacent to the Gowanus Canal and helps to identify bulkheads in need of repair.
Gowanus Canal Revitalization Meeting Material and Minutes				
18	Gowanus Canal Rediscovery Plan	3/15/02	PowerPoint presentation of the plan's components.	Plan overview.
19	1st Gowanus Canal Task Force Meeting	6/7/02	None	Lists perspectives of other agencies.
20	2nd Gowanus Canal Task Force Meeting	10/1/02	PowerPoint presentation of walkway candidate sites, selection criteria, and introduction to design elements.	Candidate walkway sites and criteria selection.

Table 1. Documents and Data available through the GCCDC (continued).

Data Source ID	Report Title	Author or Agency	Analyses	Data Utility
Gowanus Canal Revitalization Meeting Material and Minutes				
21	Town Hall Meeting: Walkway Design Elements	11/7/02	PowerPoint presentation of design elements.	Limited. Presentation and discussion was on walkway design elements.
22	Public Meeting to Discuss Project Progress	9/8/03	None	Limited. Progress reports.
23	Public Meeting to Discuss Canal Visioning	11/18/03	Not yet available, but will include Canal overview maps.	Limited. Public was asked to describe their vision for the canal.

3.0 OTHER EXISTING DATA SOURCES

In addition to the information revealed by the literature research at the GCCDC, other existing sources of information pertinent to the Phase I ESA were identified through contacts with regulatory agencies, independent consulting firms, and public records. Data obtained through these sources include land-use characterizations, land ownership maps, and potential sources of pollution along the canal. Data sources in addition to the GCCDC literature are identified and summarized in Table 2.

Table 2. Documents and Data Available From Non-GCCDC Sources.

Data Source ID	Report Title	Author or Agency	Analyses	Data Utility
Land-Use Characterizations				
24	Inner Harbor CSO Facility Planning Project	NYCDEP (1993)	Identified parks and open space, public and private institutions, low-density residential, high density residential, and commercial and industrial in the Red Hook Area.	The focus of the classification was on the Red Hook area; only land in the northeastern part of the Gowanus canal is classified. Age of data, ~10 years, may limit utility.
25	Gowanus Study Area Data Assessment Report	USACE (2003)	Annotated review of available data sources for the Gowanus Bay and Canal area.	Limited information of upland conditions. Focuses on environmental condition of bay and canal.

Table 2. Documents and Data Available From Non-GCCDC Sources (continued).

Data Source ID	Report Title	Author or Agency	Analyses	Data Utility
26	Land Use Analyses and Characterizations of Shoreline Areas	NYCDEP (2002)	Land use classification and evaluation of biological and physical conditions of the shoreline. Part of USA Project.	The data characterizes land use and shoreline conditions along the Gowanus Canal.
27	Final EIS for the Comprehensive Solid Waste Management Plan Draft Modification	NYDOC (2000)	Land use, zoning, neighborhood character, open spaces, parklands, and natural resources.	Summary of the land characteristics surrounding the Hamilton Avenue Modified MTS.
Land Ownership Maps				
28	Gowanus Expressway Tunnel Study	NYDOT (2000)	Detailed map of ownership of the land surrounding the Gowanus Canal.	The date of report will limit the utility of the information.
29	Remedial Investigation Work Plan-Citizens Gas Works, Former Manufactured Gas Plant Site	GEI Consultants (2003)	Parcel ownership maps included in the report.	Useful in determining land ownership.
Potential Contaminant Source Documents				
30	Toxic Targeting Property Map Gowanus Canal	Toxic Targeting (2003)	Potential toxic locations identified within the Gowanus Canal.	Information regarding the potential sources of pollution.
31	Site Investigation Gowanus Bay and Canal	USACE (2003)	Identifies the geotechnical, chemical, and bacterial conditions of sediments in the Project area.	Data identifying sources of contaminated sediments within the canal.

4.0 SUMMARY

Overall, the literature review component of the ESA for the Project revealed extensive existing information on current and historic community planning, land-use, land ownership, and contaminant sources. In addition, several documents focus on water and sediment sampling, which may potentially indicate the sources of currently unknown pollutants. Although, the information gained through the literature review is extensive and diverse, several data gaps remain. For example, additional research in the form of interviewing owners and operators, as well as local officials may be necessary to obtain information on properties, within the Project area, that currently lack adequate data.

EXECUTIVE SUMMARY

Brownfields..... Brownfields Site List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL ASTM STANDARD

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 11/17/2003 has revealed that there is 1 CERCLIS site within the searched area.

<i>HAMILTON AVENUE INCINERATOR</i>	<i>555 HAMILTON AVE</i>	<i>34</i>	<i>333</i>

CERCLIS-NFRAP: As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund Action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

A review of the CERCLIS-NFRAP list, as provided by EDR, and dated 11/17/2003 has revealed that there are 7 CERCLIS-NFRAP sites within the searched area.

EXECUTIVE SUMMARY

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/18/2003 has revealed that there are 2 CORRACTS sites within the searched area.

RCRIS: Resource Conservation and Recovery Information System. RCRIS includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs): generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs): generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs): generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRIS-TSD list, as provided by EDR, and dated 01/12/2004 has revealed that there is 1 RCRIS-TSD site within the searched area.

STATE ASTM STANDARD

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the SHWS list, as provided by EDR, has revealed that there are 2 SHWS sites within the searched area.

EMPIRE ELECTRIC COMPANY	5200 1ST AVENUE	84	1265

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 26 SWF/LF sites within the searched area.

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 02/10/2004 has revealed that there are 160 LTANKS sites within the searched area.

EXECUTIVE SUMMARY

CBS UST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the CBS UST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 3 CBS UST sites within the searched area.

WITCO CORP	700 COURT ST	55	815
PYROCK CHEMICAL	214 40 STREET	77	1169

MOSF UST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 3 MOSF UST sites within the searched area.

EXECUTIVE SUMMARY

FEDERAL ASTM SUPPLEMENTAL

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/09/2004 has revealed that there are 243 FINDS sites within the searched area.

CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 10 CBS AST sites within the searched area.

EXECUTIVE SUMMARY

MOSF AST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the MOSF AST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 2 MOSF AST sites within the searched area.

AMERADA HESS CORPORATION BROOK	722 COURT STREET AND GO	57	855

SPILLS: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, has revealed that there are 377 NY Spills sites within the searched area.

 DEC Remarks: 2/23/99 Spoke to Morris Kreppel After repair the manhole manifold, the
 y retested the tank and it passed. He will submit paperwork for my revi
 ew. 3/1/99 Spoke to Morris Kreppel. After installing a new gasket
 , the tank passed the retest. Phiil Lodico, enforcement attny in Albany
 , got involved after 3 notices that the tank was overdue for testing. A
 pparently the city operates the tank so Kreppel forwarded the notices to
 the city who then ignored them. Currently being fined 11K, 10K oof wh
 ich will be waived if they comply within 60 days. Told Kreppel that he
 needs to submit an exposure affadavit complete with whether or not conta
 mination was encountered during the work. 3/19/99 Spill closed as
 per 3/4/99 letter from ABC Taank signed by Mark Salamack indicating that
 a gasket, nuts and bolts were replaced on the manhole and the system pas
 sed the HEZ3 retest and that no contamination was discovered during repa
 irs.

Remark: they took soil samples and came back with readings of 18,000ppm pcb.cle
 anup pending test results and flush pit is closed. 134301 con ed

DEC Remarks: DEC Investigator Notes: Sam Arakhan spoke to Ed Radtke at 4:15pm. Se
 cond sample was collected and sent to CHem Lab for re-analysis. Results
 expected tonight. Original sample was a composite taken from drying bin
 prior to disposal. This load haas been segregated on-site awaiting conf
 irmatory samples. Referred to DSHM-Sam Arakhan for follow-up 11/9/0
 0. e2MIS Notes: Routine soil sample taken on 11/7/00 from drying bin
 at 3rd Ave Flush Pit came back as 18,000ppm PCB. At this time soource u
 nknown and amount unknown. Contained to drying bin. R. Saladino notifi
 ed the following: Bill Wallace ERT), M. Saladino EH S), Ed Radtke EH S)
 , G. Pennecke EH S) and E. Dessen Law Dept.). E2MIS report turned in by
 R. Saladino at request of Bill Wallace. Flush pit has been closed. Due
 to high PCB count, Chem Lab will resample solids and retest. Update 1
 440: B. Cohen of EH S requested that Chem Lab take 20 grab samples of so
 il in drying bin. Update 11/8/00 1900hrs: Chem Lab took20 samples fro
 m drying bin. Drying bin area was isolated where suspected high PCB s a
 re. Advised EPA and DEC of situation and plans. E. Radtke advised us t
 o wait for all results prior to disposal and cleanup. Update 11/9/00
 1615hrs: LSN 00-106224-Results 8048ppm the reported PCB result is the a
 verage of four sample analysis). Cleanup to be performed as >500ppm PCB
 . Steve Ferrone secured TSDF and rolloffs for waste. Grid maps were ma
 de of contaminated areas. Chem lab technician took 255 pre-wipe samples
 of dumping pad. Dumping pad area and backhoe were covered with tarpauli
 n. DEC Sam Arakhan inspected site and reviewed our action plan. Sam wo
 uld like to be present when we drum the first four feet of debris which
 is suspect forthe high PCB concentration. Present were the following:Ed
 Radtke, G. Pennecke, R. James, R. Saladino, C. Fernande , V. Deville .
 Cleanup will commence tomorrow pending weather conditions. Barry Cohen
 rovided a sampling/disposal plan. This plan waas faxed to Sam Arakhan.
 Update 11/10/00 1930hrs: Drummed first four feet of debris pile. This w
 as a total of 16 drums. All drums were individually tested. Drums were
 labeled and marked pending analysis. DEC Sam Arakhan visited site durin
 g drumming operation. Sam instructed us that the drums could remain on
 -site at Flush Facility pending results for proper disposal. Four 20 ya
 rd lined dumpsters were loaded with the balance of debris from the dryin
 g bin area. 3 of the dumpsters were pllaced adjacent to the north garag
 e. 1 was placed inside the north garage. All dumpsters were properly l
 abeled and caution tape was placed around the area. Chem Lab took all r
 equired samples from each dumpster. Results have been received for the
 wwipes which were taken of the dumping pad. All 25 wipes passed. Upd
 ate 11/11/00: Chem Lab results have been posted for solid debris from du
 mpster 20015, LSN 00-10792, all six samples are non-ha ardous for PCBs.

Update 11/11/00: 2 additional dumpsters were loaded with solids from the west dumping pad. The dumpsters were labeled and placed inside the north garage. The drying bin area was double washed with detergent and rinsed, using a pressure washer and Bio Gen cleaner. Twenty-one post-wipe samples of the drying bin area were taken by chem lab. Dumping pads and facility backhoe 91202) were double washed and rinsed. All liquids were removed as hazardous for PCBs by tanker from Clean Harbors, manifest NYG1703439. The liquids were being shipped to Spring Grove Resource Recovery, Cincinnati, OH 45232. Nine post-wipe samples were taken of backhoe. All work areas have been covered with plastic or tarpaulins pending the wipe results. The facility remains closed pending results and direction from EHS.

 Last Date: 09/29/1994
 Num Times Material Entry In File: 21329

Remark: SOIL SAMPLES SHOW CONTAMINATION AT SITE. THERE WERE UNDERGROUND GASOLINE TANKS AT ONE TIME. IT IS SUSPECTED THAT THE FUEL OIL CAME FROM THE GO WANAS CANAL. ADDITIONAL SOIL AND GROUNDWATER TESTING TO FOLLOW.

DEC Remarks: 10/4: AWAITING RETURN CALL FOR STATUS. DR. YOUSSEFNIA STATED THAT THERE IS A 275 OR 550 UST AT SAID SPILL LOCATION THAT FAILED A TANK TEST. THE UST LEAKED FUEL OIL OVER AN UNKNOWN PERIOD OF TIME. UST HAS BEEN VACUATED. SIX INCHES OF WATER IS IN TANK. LOUIS ILLIANO WILL SEND REPORT TO TIPPLE. *THIS STATEMENT COULD BE AN ADDITION TO THE ABOVE (275 OR 550?) SHOULD BE CHECKED OUT WITH THE CONSULTANT (NYPD). RS ORIGINAL SPILL AT THIS SITE ASSIGNED TO DEMEO... SEE SPILL 01066619

 Remark: CON ED 121129 REACTOR R18 LEAKING CLEAN UP TODAY BEING TREATED AS 50-499 PPM PCB.
 DEC Remarks: DEC Inspector Notes: Foley inspected equipment on 7/31/01. Appeared that repairs were completed by applying epoxy. No visible leaks. Con Ed e2mis Notes: 11/9/98 4o dielectric fluid leaked from reactor R18 onto concrete pad. To be cleaned as 50-499ppm PCB. PCB count is 1ppm, as per Mary Moran. 1/22/99 During field visit, Mary Moran reported that cleanup was completed on 1/6/99. Sample results indicate PCB count of 2ppm. 7/27/01 As per visual inspection, CT Pod looks repaired and there is no leak.

Remarks: caller stated rain has washed oil from deck.
 DEC Remarks: 8/21 - JHO RESPONDED WITH AVERY TOM OF CON ED. BILGE AREA OF TWO FLOATIN G GAS TURBINES OVERFLOWED DUE TO HEAVY RAINS. OIL/WATER SEPARATOR COULD NOT HANDLE THE VOLUME. BILGE WATER LEAKED FROM FOUR SPOTS: TWO ON EACH BARGE. COAST GUARD RESPONDED EARLYY IN THE MORNING, ISSUED FINDINGS AND RECOMMENDATIONS TO MAKE REPAIRS TO FLANGE WELDS ON THE BARGES. ACCORDING TO CON ED, CONTRACTOR (S D) TO PUMP DOWN WATER LEVEL IN BILGE TO ALLOW W ELDERS TO WORK ON WELDS. SILVER SHEEN IS CONTAINED WITHIN BOOMED ARREA, , ALTHOUGH COAST GUARD REPORTED THAT A SHEEN WAS VISIBLE IN GOWANUS BAY - IT COULD BE ATTRIBUTED TO ANOTHER SOURCE. IMPACT TO WATER APPEARS MINI MAL.

Remark: 8 OUNCES SPILLED FROM A DIESEL GENERATOR ONTO SOIL - CLEAN UP CREW ON WAY - CASE 120995

DEC Remarks: DEC Inspector Notes: 7/31/01 As per visual inspection, Foley found area clean. Con Ed e2mis Notes: 11/3/98 80 diesel fuel on 2 sq ft of bluestone. Removed 2 shovels worth of soaked bluestone and replaced with new. Placed oil pads between steel beam and concrete diesel generator pad. Waiting for engineering to cut generator section to see where leaking. 7/27/01 On inspection, there appears to be no leak. Cleanup was completed with Simple Green.

 Remark: THE PERSON CALLED IN AND SAID THAT HE SAW THE TRUCK CAUSED OIL OVERFILL AND SPREAD OVER THE GROUND IN THE PCT BEFORE, BUT HE STILL CAN SMELL THE ODOR NOW. HE SAID THE THE OLD UST AT SITE WAS CLOSED AND A NEW AST WAS PUT ON TO REPLACE THE OLD FUEL TANNK. HE SAID PROBABLY BECAUSE THE ABOVEG ROUND TANK IS HIGHER THAN THE TRUCK AND CAUSES THE SPILLS.

Remarks: SHEEN ON WATER- COAST GURAD NOTIFIED.
 DEC Remarks: FAED TO USCG, 718 354-4140. 7/19/99 12:00 HRS. WENT TO DOT ASPHALT PLANT DUE TO PART OF INVESTIGATION FROM SPILL 9904613. COULD SEE OIL SHEENING FROM HAMILTON AVE. BRIDGE, CLOSE TO ASPHALT PLANT. WENT TO NYCDOT HAMILTON AVENUE ASPHALT PLANT AT 4448 HAMILTON AVENUE 14TH ST, BKLYN. WENT TO CANAL, COULD SEE OIL BY CANAL AND TRAPPED BETWEEN TWO BARGES. 12:20 HRS. CALLED USCG POLLUTION RESPONSE AND SPOKE TO P.O. SAMPSON AND GAVE THEM UPDATE. 12:25 HRS. CALLED SPILL HOTLINE SPILL 9904638.13:00 HRS. USCG P.O. SUMMERS AND P.O. AVILA ARRIVE ON SITE. JACOB KRIMGOLD/DEC ALSO ARRIVES ON-SITE. WENT TO CANAL SAW OIL. IT S MAINLY A WEATHERED SILVER SHEENING. USCG DEEMS IT AS UNRECOVERABLE. THERE IS SOME FRESH RAINBOW SHEENING NEAR SOME OOF THE PIERS AT DOT PLANT SIDE UNRECOVERABLE). POSSIBLE SEEPAGE PROBLEM WITH DOT ASPHALT PLANT. JACOB HAS 1995 SITE PLAN. THERE WAS A TWO 2) FOOT PRODUCT PLUME AT DOT ASPHALT PLANT. PRODUCT RECOVERY SYSTEM INSTALLED, BUT HASN T BEEN TURNED ON YET. MW-8 (MOST DOWNGRADIENT WELL) MOST LIKELY DESTROYED, IT S IN THE APPROXIMATE LOCATION OF RECENT SEWERS CONSTRUCTION. MW-8 IS APPROX. 200 FT. FROM CANAL. OLD USTS CLOSED IN PLACE, CLOSE TO OLD PUMP ISLAND, THAT S STILL IN PLACE. THERE ARE SANITARY SEWERS IN THE STREET ALONG HAMILTON AVE.). REMEDIATION SYSTEM MAY HAVE TO BE DISCHARGED TO CITY SEWER, TO AVOID A LONGER DELAY. WILL NEED MWs DOWNGRADIENT OF PUMP ISLAND AND USTS. USCG TOOK SAMPLE FROM CANAL. JACOB WILL COORDINATE WITH UURS AND USCG TO SAM

Remark: CALLER STATES SITE IS OLD POST OFFICE AND THERE IS A CONSTRUCTION CREW DOING WORK AND THERE IS A STRONG ODOR OF PETROLEUM IN BUILDING

DEC Remarks: CALLER COMPLAINED OF HEADEACHES AND SORE THROATS FROM VAPORS ORIGINATING FROM RECENTLY AGITATED CONSTRUCTION SITE ACROSS STREET. SITE VISIT ON 11/5/01 WITH MICHAEL FRANKS (NYSDEC-ALBANY). INSPECTION OF SITE YIELDED AT LEAST 10 MONITORING WELLS AND 20 FILLED SOIL DRUMS (NON-HAZARDOUS WASTE LABELLED). THERE WERE ALSO TWO LARGE AREAS (APPROXIMATELY 200 X 200 FT) THAT HAD FRESHLY DISTURBED SOIL. THE ONLY CONTAMINATED SOIL FOUND WAS A 20 X 20 AREA APPROXIMATELY 20 FT FROM THE SIDEWALK OF 12TH STREET. THERE WAS A STRONG ODOR COMING FROM THIS SOIL. THERE WERE ALSO THREE CONTAINER CARTS ON 2ND AVENUE THAT WERE FILLED WITH SOIL. WE CONTACTED HAZARDOUS WASTE GROUP OF NYSDEC AND MR. VADIM BREVDI FOUND THAT THE SITE WAS A BUG (BROOKLYN UNION GAS) SITE. MR. BREVDI NOTIFIED MR. DENNIS WOLTERDING (NYSDEC) WHO NOTIFIED MR. ROBERT SCHICK (NYSDEC-ALBANY). I SPOKE WITH MR. SCHICK ON THE MORNING OF 11/6/01 WHO SAID THAT HE WILL CONTACT THE ENVIRONMENTAL COMPANY WHO IS PERFORMING THE VOLUNTARY CLEAN UP AND INSTRUCT THEM TO COVER THE REMAINING CONTAMINATED SOIL. I SPOKE WITH MR. CARLOS BENITEZ AND INFORMED HIM OF THE SITUATION AND TO NOTIFY ME IF THERE WERE ANY FURTHER PROBLEMS. 12/5/2001 I SPOKE WITH MR. BENITEZ AND HE SAID THERE WERE NO LONGER ANY VAPORS (POSSIBLY DUE TO COLD WEATHER). I EXPLAINED TO HIM THAT I WAS GOING TO CLOSE THE SPILL AND IF THE VAPORS BEGAN AGAIN TO EITHER CALL ME OR THE SPILL HOTLINE.

 Remark: CALLER HAD SURVEY DONE AS POTENTIAL BUYER AND IT SHOWED THAT THE 2 150
 ,000 GAL TANKS WERE STILL THERE IN THE BACK OF THE BLDG ON THE CORNER OF
 HAMILTON SMITH ST - THIS GOES AGAINST WHAT THE SELLER WAS TELLING THE
 CALLER - ALSO BLDG OWNERS ADJACEENT TO THIS PROPERTY ARE GETTING OIL IN
 THEIR BASEMENTS FROM AN UNK SOURCE

Remark: 1/2 PT ON 100 GALS OF WATER - SAMPLE TAKEN CLEAN UP PENDING LAB RESULTS
 - - - NO ACTIVE FIRE OR SMOKE - IS COMING FROM DUCTWORK IN MANHOLE - NO PRIVATE PROPERTY AFFECTED CON ED 134836

DEC Remarks: e2mis Notes: Found approx 1 quart unknown oil on approx 100gal water in MH5339. He does see that oil is coming from occupied ducting on south wall. Unknown source or cause of spill at this time. 2 liquid samples taken for ID and PCB. 12/20/000 1100hrs: Mr. Wang called back and stated the cable coming from ducting is 4kV primary cable. Advised that a flashpoint sample be taken. Result returned 72degF. Clean Harbors called to do cleanup. Oil ID indicates substance similar to heavy fuel oil. PCB count returned as 232ppm. Clean Harbors completed cleanup by double washing hole and removing 6 barrels of liquid. J. Dekanchuk inspected hole and all ducts with cable in them were sealed with cement. All ducts with no cable were plugged. He did not see any signs of oil coming in from the ducts. He also found asbestos arc proofing that must be removed before cleanup can be closed. Asbestos was removed and support arm for 3m joint was replaced. DEC Investigator Notes: Foley spoke with Jay Dekanchuk (718-802-3040) who said a flashpoint reading was taken again and didn't read under 140degF. He also stated that there was no odor of fuel oil and no visible signs of oil or gas. KMF 4/10/01)

Remark: THE COMPLAINT STATES THERE ARE TRUCKS DRIVING UP AND DOWN THE ROAD SPILLING OIL OUT OF THE TRUCKS. CALL COMPLAINT*****

DEC Remarks: 12/14/2001- Site visit by TIBBE/VOUGHT. In alleyway between 6th and 7th Street on 2nd Ave there are 3 sets of double parked unused oil delivery trucks in front of GEMTEC owned by T S Trucking 718)499-2900. The rear of the two rear trucks were underlain by used speedy dry which was leaking sheen into the nearby sewer during rain events. The sewer appears to be connected to the Gowanus Canal on 7th Street east of 2nd Ave. A large 300 x 100 sheen was present on the canal. T S responded by sweeping used speedy dry and spreading new speedy dry. Coast Guard 718-354-4121 was notified regarding sheen on 12/14/2001. DEP Andrew Kelley 718-595-6700) was notified on 12/14/2001 regarding illegal sewer discharge. Spill will be referred to Environmental Conservation Officers to see if trucks can be stored in alley and to determine if the alley is a public street. Spill closed 12/17/2001.

Remark: 6 - 55 gallon drums filled with waste oil were left in front of bus repair facility.

DEC Remarks: DEC Sigona) responded on 8/6/1999 at 3:00 P.M. found six drums left in front of 34 2nd Avenue near 5th Street, Brooklyn. There were 2-3 drums containing waste oil. Facility performs bus repairs (Video Tours). According to John Gibbons the property manager, the facility was former sanitation garage. There were fill pipes for diesel and gasoline. The tanks were allegedly closed in-place. There are several groundwater wells present which are being monitored by DDC. There are active 2-275 gallon AST waste oil tanks at 15 2nd Ave and 1-275 gallon AST waste oil tank at 34 2nd Ave (Satellite facility). The facility had very sloppy housekeeping. Facility manager agreed to remove and dispose of the drums of waste oil. Also, DEP (Keith Williams) issued violations for illegal discharge of sanitary waste to soils adjacent to facility. DEC (Sigona) conducted follow-up inspection on 8/17/1999 with ECO (Michael Jordan) at 3:00 P.M. and found the six drums were moved to back of lot at 34 2nd Ave. They apparently spilled about 25-50 gallons of waste oil under one of the parked buses which spilled under the bus and onto the adjacent land outside of the fence area to the south of the property. M. Jordan took photographs. DEC (Sigona) directed the bus facility manager (John Gibbons) to hire a contractor to cleanup the spilled waste oil and dispose of the drums. Also, there was oil spilled on the roadway in front of 15 2nd Ave where buses were parked and being worked on. DECC (Sigona) ordered Gibbons to cleanup the oil stain and speedily dry. ECO (Jordan) would prepare and issue violations over next few days. DEC (Sigona) (Jordan) will conduct follow-up inspections.

Remarks: FLANGE ON TANK BROKE CLEAN UP IN PROGRESS
 DEC Remarks: Alps Mechanical (tank contractor) was called to site on 11/27 to tighten fitting on temporary 6,500 gallon above ground tank. Fitting was apparently overtightened and broke, allowing remaining 3,500 gallons in tank to leak to the ground. Oil soaked into soil and also got into nearby monitoring well. Oil also got into boiler room and sump pit. Spill was not found by NYCHA until 11/28, when DEC was notified. Alps was notified and they called Petroleum Tank Cleaners (PTC). PTC cleaned boiler room floor and sump, then cleaned temporary tank for removal. Approx. 2 feet of contaminated soil was excavated and placed on poly for testing and disposal by Alps. Contacted Mike Susca, TRC Environmental, who is conducting a site investigation at this location (TRC installed the monitoring wells). Told him the situation and requested that they return to site and install an additional boring in the location of the temporary tank to determine vertical extent of residual contamination.

 Units: Gallons
 Unknown Qty Spilled: 30
 Quantity Recovered: 30
 Unknown Qty Recovered: False
 Material: #2 FUEL OIL
 Class Type: Petroleum
 Chem Abstract Service Number: #2 FUEL OIL
 Last Date: 12/07/1994
 Num Times Material Entry In File: 24464

Remark: caller states the driver connected line to a sounding well - not the storage tank.

DEC Remarks: 1050 GALLONS WAS PUMPED INTO THE INTERSTITIAL SPACE OF THE TANK VIA THE LEAK DETECTION PROBE) LINE. ABOUT 100 OF THAT OVERFLOWED ONTO THE GRASS. THE TANK INTERSTITIAL SPACE WAS VACKED OUT. THERE WAS NO METER TO DETERMINE THE AMOUNT OF OIL THAT WAS RECOVERED. I REQUESTED THE INNER AND OUTER TANK BE PRESSURE TESTED TO DETERMINE IF THE TANK WAS DAMMAGED BY THE PRESSURE THAT THE OIL WAS DELIVERED WITH. THE SATURATED SOIL WAS EXCAVATED AND REMOVED. ss

Remark: CALLER CONTACTED POTENTIAL BUYER OF ABOVE PROPERTY. SOIL SAMPLES TAKEN AND REVEAL CONTAMINATION. CALLER REQUESTING CALL BACK FROM DEC REP IN REFERENCE TO PROBLEM.

DEC Remarks: 3/22/2000 Mr. William Brennan P.E. submitted a report Limited Phase II 744 Clinton Street This report shows the results of 5 soil borings done on the site. Two borings on north side of site appear clean. Three borings from middle to south side of site were hot to very hot see below w) South side of site had a history of large oil storage tanks from about 1920 thru 1970 s. There was no history of spills, but now the soil under them is hot. Some test results: boring SP-3 SP-4 SP-5 all in ug/kg) n-Butylben ene 6,784 307.8 931 sec-B utylben ene 2,940 127.1 903 n-Isopropyltoluene 9,884 456.6 1,162 Naphthalene 1,860 ND 2 250,000 Anthracene 1,800 ND 209,000 Plus lots of other high numbers..... no time to copy report. Mr. Brennan called to say, based on the contamination levels, the owner wants to perform aremediation so his sale can go through. Mr. Brennan will prepare a plan of action and submit it to the DEC for comment.

Remarks: caller reports 3 gallon spill clean8up in progress, con ed 130103.

DEC Remarks: Con Ed e2mis Notes: 2/23/00 Found circulating pump ps2-m2 feeder 42T was leaking from gasket into spill pan. About 3gal leaked from pan onto bluestone. 2/25/00 Cleanup completed 2/23/00 at 1900hrs. Liquids and solids were removed and recovered. A drip pan was also placed under pu mp. Repairs pending. 3/12/01 Station inspection by Joe Lombardi indicates oil is leaking from pumps 1 2 into containment. Will clean old stains outside of containment after contractor is secured. 7/27/00 On 7/26 and 7/27/01, AllState PowerVac cleaned up moats and diamond plate floors for CP1 through CP4. DEC Inspector Notes: When bluestone was removed, found historic contamination. A contractor is being hired to remove additional soil. Post-ex samples will be taken. 3/29/00 Spoke with C. Koehler. She will follow-up. 6/21/00 Still awaiting repairs.

Remarks: CALLER REPORTED 3PT SPILL FROM POTHEAD CABLE. CON ED 129645.

DEC Remarks: Con Ed e2mis Notes: 1/18/00 Found pothead and cable on high feeder 41 T leaked 3 pints cable oil. 3 drops hit blacktop in substation and rest stayed on porcelain pothead. Repairs could not be done until feeder is taken off. 1/27/00 Mary Morran indicates that the cleanup was completed on 1/18/00. Absorbant pads were used to removed visible traces of oil and cleanup stained areas. Contaminated bluestones were excavated and placed in 5gal pail. Corrective actions requires that the equipment be de-energi ed. 7/27/01 On visual inspection pothead is not leaking . All connections were tightened.

Remark: LIGHT OIL BUBBLING UP FROM BOTTOM OF CANAL. DRIVERS ENROUTE TO INVESTIGATE FURTHER. 10 X10 SHEEN. ABSORBANT BOOM IN PLACE. NRC ALSO NOTIFY D. FURTHER TO FOLLOW.

DEC Remarks: 1/18/96: Glen Kat spoke with Ron Santapaola, Con Ed - sheen between barges, boom in place. Sheen dissipated as of 1425 hrs. Divers are to investigate further, will inspect barge for source. Divers en route as of 1425 hrs. UPDATE: divers found no source but collected sample for analysis possibly from sheen. 1/24/9, Engelhardt notes: Call from Lisa Primeggia, Con Ed - divers inspected bottom of canal, saw nothing. Avery Tom is Con Ed Environmental Affairs person assigned to case. Note: this bubbling up of oil occurred last on 11/27/95 see spill 9510745). Call Al Filippi, Con ed to find out if this happens a lot.

Remarks: Not reported
 DEC Remarks: PRIOR SPILL NUMBERS HERE - 9416269 9614390 6/7/2001 - Sangesland vis ited the site: Anton Junic Ent. inc. junk yard) with ECO Anthony Pani pinto. The ground around the car dismantling area showed signs of petro leum pooling and saturation into tthe soil. Owners brothers) Bernard o and Anton Jr. Junicic - 718-768-8884 Mr. Junicic presented drawings showing an oil/water separator which had been installed on the site in 1 999. It is a buried unit with 2 stormwater drains leading into it.. Th e water discharge goes into the NYC DEP sewer system. Oil is periodical ly pumped out of this unit and disposed of. Because the surface of the yard is soil owner says it is cement 1 to 2 down) the rainwater had n ever been properly directed iinto the 2 drains. DEC wrote a DO WORK l etter 6/8/2001) directing Mr. Junicic to: 1) Excavate the site soil/g ravel) down to either clean soil or a solid barrier old cement floor). Contact DEC for a site inspection. 2) If DEC inspection goeswell, regra de the property and pour a new cement floor. Contour this floor so rain water from the whole property flows to the proper drains. 3) Reconfirm that the water discharge from the oil/water separator is properly hooked up to the city sewer ssystem in accordance with the regulations of the N YCDEP. 4) Design the property layout to allow access to the Blue Cover on the separator unit. 5) Maintain a log book for the drainage of the o il out of the separator unit. On future inspections,, this information will be requested to provide that the separator system has been maintain ed. Submit a written plan and schedule of how this work will be perfo rmed. This plan is due to DEC by July 31, 2001. 7/11/2001 Sangesland went back to tthe site. Mr. Junicic is completing the required work in phases. Today the north 1/3 of the site had been cleared and excavated. Sangesland saw one hot spot which was removed while there. After toda y s inspection, an 8 to 10 reinforced cementt slab was going to be pou red and contoured over the full north 1/3 of the property. 8/14/2001 Sangesland from the street) could see that the north 1/3 of the lot had been cemented and Mr. Junicic had redeployed much of his equipment over this arrea. It appears that he is clearing out the south west 1/3 of th e site. I assume this will be done soon.

 Last Date: 09/27/1994
 Num Times Material Entry In File: 9509
 DEC Remarks: 1:45 Spoke to PO Calvin Somers at 354-4357. He indicated that the USCG has responded to the site, and that there is an unrecoverable sheen in the Gravesend Anchorage. It is not impacting land and is not expected to. At this point they are unaware if the sheen is coming from a 65 foot self-propelled barge, called the Jet Trader, or from a 500 foot tanker called the Jag Pavitrie which is carrying an unknown amount of light oil-probably diesel. The CG has required both vessels to hire contractors to set up boom to contain any spilled oil and to determine the source. If the vessels refuse or are unable, the USCG will hire contractors. The wind is currently 15 knots. DEC is to call CG later for additional information.
 Spill Cause: NAME OF BARGE: JET TRADER - WASTE OIL TANK IS LEAKING

 Units: Gallons
 Unknown Qty Spilled: No
 Quantity Recovered: 0
 Unknown Qty Recovered: True
 Material: GASOLINE
 Class Type: Petroleum
 Chem Abstract Service Number: GASOLINE
 Last Date: 09/29/1994
 Num Times Material Entry In File: 21329
 Remark: CALLER STATES THERE IS A FORMER GASOLINE STATION AND NOW IT IS DISCOVERED THAT THERE IS GAS LEAK FROM ONE OF THE TANKS. 20 YDS OF SOIL HAVE BEEN STOCK PILED SO FAR. ALL SOIL IS GOING TO BE REMOVED
 DEC Remarks: 06/05/2001 Zhao contacted Rick Spadalik at 1:45pm. 6 550 gal) gasoline tanks and 1 550 gal) waste oil tank were pulled out yesterday and found contamination soil which has been stock piled. Tanks were encased in concrete with concrete pad at bottom of tanks. American Environmental will possibly perform site assessment and will clean up site. At this time, DEC did not receive tank removal notification. 09/20/2001 Tank closure report from AEAC was received on 08/31.

 Legal Action Type : State, Assistance Contract
 Facility Status : Negotiations in Progress
 Remedial Action : Not reported
 Nature Of Action : Not reported
 Site Description: The site consists of filled land between piers 1 and 4 at the end of 43rd - 50th streets adjacent to upper New York Bay. The site is named for its close proximity to Bush Terminals to the north. According to a letter received from the Brooklyn District Attorney's Office, this site was abandoned and was used for the disposal of hazardous wastes. In May 1982, the State Senate Select Committee on Crime also indicated that hazardous waste was disposed at this site. A Phase I Investigation, completed in 1985, recommended that further investigations be done. Field work for the Phase II State Superfund Investigation was completed in February of 1990, and a Final Phase II Report has been received. The Phase II Report recommended reclassification of the site to Class 3; there is documented disposal of hazardous waste at the site, but there is no significant threat to the environment. This site is an approved site for investigation by New York City under the Clean Air/Clean Water Bond Act. The New York City Economic Development Corporation has completed the investigation of the site. Site investigation work conducted between May 25, 1999 and May, 2001 confirmed the presence of metals (mostly lead) and PAHs in the on-site soil and groundwater. The draft Remedial Action Report is currently under review.

Environmental Problems Assesment: Sampling has revealed contravention of groundwater standards by 23 organic chemicals and 12 metals. It has also been determined that no significant threat exists to the environment.

Health Problems Assesment: Groundwater in the area of the site is not used as a source for water supply. All residences and businesses are supplied with public water from an upstate reservoir system. NYSDOH required surface soil sampling to determine the potential for exposures to future park users. The results of surface soil samples collected during the site investigation indicate direct contact with contaminated soil is possible. Site access is restricted by a fence.

EMPIRE ELECTRIC COMPANY (Continued)

S102872771

Stated Operator Address : 5200 1st Avenue
 State Operator City : Brooklyn
 State Operator State : NY
 Haz Waste Disposal Period : From: 1950 To: 1986
 Cofirmed Haz Waste Qty : PCBs: unknown
 Analytical Data Available : Groundwater, Soil
 Applicable Standards Exceeded : Groundwater
 Depth Groundwater : Range: 10 to 25 feet.
 Legal Action Type : Not reported
 Facility Status : Not reported
 Remedial Action : Proposed
 Nature Of Action : IRM.
 Site Description:

This site consists of a solid masonry brick building, 240 feet in length and 100 feet in width. The building was originally constructed in the year 1900 for the City of New York as a powerhouse to provide electricity to the City owned trolley system. After the trolley system was abandoned in the 1930's, all machinery, piping and apparatus in the powerplant was dismantled. In 1950 the Empire Electric Company bought the property and the building which was used to recondition electrical apparatus (including transformers containing PCBs), and as a warehouse. Although the inside of the building has been wiped-clean, sampling at the site confirmed the floor and walls are still contaminated with PCBs. A Preliminary Site Assessment (PSA) was completed during the summer of 1999 to further evaluate the contamination. The sampling results indicated that soil beneath the building contains hazardous levels of PCBs, and the groundwater downgradient of the site contains elevated levels of PCBs. IRMs involving site security, epoxy coatings and/or complete demolition of the buildings are being considered. New York City constructed cement block walls to close off all access points to the building in 2001.

Environmental Problems Assesment: PCBs have been detected in the floor and walls in the building, the soil beneath the building and soil and groundwater outside the building.

Health Problems Assesment: The floors, walls and the soil beneath the basement floor of the dilapidated on-site building are contaminated with significant levels of PCBs. The levels of PCBs within the building present a threat to public health since homeless people live within the building. Outreach and intervention efforts by the New York City Department of Homeless Services failed to remove the homeless individuals from the building. Presently, efforts by the New York State Department of Environmental Conservation have been unsuccessful in relocating the homeless from the site. Testing results for upgradient and downgradient groundwater samples collected during the PSA indicate the presence of volatile organic compounds above standards for public drinking water supplies. However, exposure to the contaminated groundwater is unlikely since public water serves the entire New York City area. Indoor air contamination from volatile organic compounds in the groundwater is a potential exposure pathway.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM STANDARD RECORDS

NPL: National Priority List

Source: EPA

Telephone: N/A

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/29/04

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-413-0223

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-413-0223

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

RCRIS: Resource Conservation and Recovery Information System

Source: EPA
Telephone: 800-424-9346

Resource Conservation and Recovery Information System. RCRIS includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs): generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs): generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs): generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US BROWNFIELDS: A Listing of Brownfields Sites

Source: Environmental Protection Agency
Telephone: 202-566-2777

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become BCRLF cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 07/15/03

RMP: Risk Management Plans

Source: Environmental Protection Agency
Telephone: 202-564-8600

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/95
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 03/08/04
Date of Next Scheduled EDR Contact: 06/07/04

TRIS: Toxic Chemical Release Inventory System

Source: EPA
Telephone: 202-566-0250

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

STATE OF NEW YORK ASTM SUPPLEMENTAL RECORDS**HSWDS:** Hazardous Substance Waste Disposal Site Inventory

Source: Department of Environmental Conservation

Telephone: 518-402-9564

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

US BROWNFIELDS: A Listing of Brownfields Sites

Source: Environmental Protection Agency
Telephone: 202-566-2777

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become BCRLF cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

1 Hunter's Point Plaza
47-40 21st Street
Long Island City, NY 11101-5407

Attention:: FOIL Office

Northern Ecological Associates, Inc. (NEA) is performing a Phase I Upland Environmental Site Assessment that encompasses numerous properties located within the Gowanus Canal and Bay Watershed, Brooklyn, NY. As part of the Phase I Site Assessment we are submitting this Application for Access to Records under New York State's Freedom of Information Law (FOIL).

The properties subject to this request are listed on a separate piece of paper, attached, and are listed by New York City's Tax Block-Lot numbers for the Borough of Brooklyn.

Please let me know when it would be possible to set up an appointment to view any available records.

If you have any questions regarding this correspondence, please do not hesitate to contact me at (207) 879-9496 ext. 232.

Sincerely,
Northern Ecological Associates, Inc.

Deborah J. McCartney
Senior Environmental Scientist

• **TO THE APPLICANT:**
-Records Provided
 The reproduction costs for the records provided are \$ _____
 Records have been (partially, fully) provided. (If not fully provided, date when records are expected to be fully provided: _____)

-Records Not Available
 Records cannot be found after diligent search
 The Department is not the custodian for records indicated

-Records Denied
 I hereby certify that access to the records—or part of the records—circled above has been denied to the applicant for the reason(s) checked below:

<input type="checkbox"/> Specifically exempt by other statute	<input type="checkbox"/> Could endanger the life of any person
<input type="checkbox"/> Unwarranted invasion of personal privacy	<input type="checkbox"/> Are compiled for law enforcement purposes and which, if disclosed would:
<input type="checkbox"/> Would impair present or imminent contract awards or collective bargaining negotiations	• interfere with law enforcement investigations or judicial proceedings
<input type="checkbox"/> Are examination questions or answers	• deprive a person of the right to a fair trial or or impartial adjudication
<input type="checkbox"/> Are inter-agency or intra-agency materials that are not:	• identify a confidential source or disclose confidential information relating to a criminal investigation, or
• statistical or factual tabulations or data	• reveal criminal investigative techniques or procedures, except routine techniques and procedures
• instructions to staff that affect the public	<input type="checkbox"/> Would jeopardize an agency's capacity to guarantee the security of its information technology assets, such assets encompassing both electronic information systems and infrastructures
• final agency policy or determinations; or	
• external audits, including but not limited to audits performed by the comptroller and the federal government	
<input type="checkbox"/> Are trade secrets	

Identification of records withheld (attach listing if additional space is required) and/or explanation if appropriate:

FOIL # R2-03-1529

Deborah J McCartney/NES Inc.

207-879-9496 Ext.232

Fax: 207-879-9481

RE: Gowanus Canal & Bay Watershed in Brooklyn

Dear Ms. McCartney:

NYSDEC/Region 2 has reviewed your request for the above referenced records under New York State's Freedom of Information Law (FOIL). Please note that most of our records are filed by number under the names of individuals or corporations. We have no way of locating or retrieving records if they are filed under names or addresses other than those you have provided.

If no records have been located, this does not necessarily mean, and should not be interpreted to mean that there have never been any violations, complaints, claims, investigations or inquiries involving those names or addresses. We cannot make any representations as to whether there are or have been any such violations, complaints, claims, investigations or inquiries.

Your request is too broad, you requested records for approximately 350 (three hundred fifty sites), identified only by block # and lot #.

We are unable to process **fully** your request as described in your letter. The Freedom of Information Law requires that the requested records be reasonably described so that they may be located.

In order to **fully** process your request, please provide me with additional descriptive information including addresses of individuals or entities you wish to be researched, the type of records to which you seek access, and limit the number of sites (facilities) to two (2) per each request.

You may submit a written appeal to the Office of Hearings and Mediation Services (OHMS) Department of Environmental Conservation, 50 Wolf Road, Albany, New York 12233-1550. Such appeal has to be made within 30 days after you receive the denial. For denials of access to records containing trade secrets, such appeal must be made within seven business days of receipt of written notice of the denial of access. Please attach a copy of this letter when filing your appeal. The OHMS Appeals Officer will evaluate the appeal and respond in writing to you within ten (10) business days after receipt of the appeal.

Thank you for your request. If additional information is needed, please call me at 718-452-4992 or fax your response to me.

Sincerely yours,

Fawzy Abdelsac, Ph.D. P.E.

Re: FOIL # R2-03-1529
Multiple Request 1 of 10

Dear Dr. Abdelsadek:

Northern Ecological Associates, Inc. (NEA) is performing a Phase I Upland Environmental Site Assessment that encompasses numerous properties located within the Gowanus Canal and Bay Watershed, Borough of Brooklyn, City of New York, NY. As part of the Phase I Site Assessment we submitted an Application for Access to Records under New York State's Freedom of Information Law (FOIL) on March 17, 2004.

Also, on March 17, 2004, I received faxed correspondence from your office indicating that my request was too broad (350 sites) and the sites were identified by only tax block and lot which was not compatible with your database. In the March 17, 2004, correspondence you requested that I provide street addresses and names of the sites or entities; and limit the number of sites or facilities to two (2) per request.

In response to your request, I have reduced the number of sites/facilities for which I am requesting access to NYSDEC records. I have narrowed down my request to 20 sites/facilities. And, in compliance with your instructions, I am making multiple requests listing only two sites or entities per request. Also, in an attempt to ease your review, I have grouped the properties geographically and/or by entity.

Please let this correspondence serve as a modification to FOIL #R2-03-1529, requesting access to NYSDEC records pertaining to the release or discharge of hazardous or toxic materials for the following sites:

Bayside Fuel Oil Corporation
503 Smith Street, 527 Smith Street
Brooklyn, NY

Bayside Fuel Oil Corporation
510 Sackett Street
Brooklyn, NY

Specifically I am interested in information regarding identification of the material released/discharged, dates of the release/discharge, any violations with the regulation violated, penalties imposed, and corrective action taken.

F. I Abdelsadek, NYSDEC Region 2

Northern Ecological Associates, Inc. (NEA) is performing a Phase I Upland Environmental Site Assessment that encompasses numerous properties located within the Gowanus Canal and Bay Watershed, Borough of Brooklyn, City of New York, NY. As part of the Phase I Site Assessment we submitted an Application for Access to Records under New York State's Freedom of Information Law (FOIL) on March 17, 2004.

Also, on March 17, 2004, I received faxed correspondence from your office indicating that my request was too broad (350 sites) and the sites were identified by only tax block and lot which was not compatible with your database. In the March 17, 2004, correspondence you requested that I provide street addresses and names of the sites or entities; and limit the number of sites or facilities to two (2) per request.

In response to your request, I have reduced the number of sites/facilities for which I am requesting access to NYSDEC records. I have narrowed down my request to 20 sites/facilities. And, in compliance with your instructions, I am making multiple requests listing only two sites or entities per request. Also, in an attempt to ease your review, I have grouped the properties geographically and/or by entity.

Please let this correspondence serve as a modification to FOIL #R2-03-1529, requesting access to NYSDEC records pertaining to the release or discharge of hazardous or toxic materials for the following sites:

Witco Corporation (Argus Chemical Corporation)
688-702 Court Street
Brooklyn, NY 11231

Woolsey Marine
183 Lorraine Street
Brooklyn, NY 11231

Specifically I am interested in information regarding identification of the material released/discharged, dates of the release/discharge, any violations with the regulation violated, penalties imposed, and corrective action taken.

Please let me know when it would be possible to set up an appointment to view any available records.

If you have any questions regarding this correspondence, please do not hesitate to contact me at (207) 879-9496 ext. 232.

Sincerely,
Northern Ecological Associates, Inc.

Dear Ms. McCartney:

NYSDEC/Region 2 has reviewed your request for the above referenced records under New York State's Freedom of Information Law (FOIL). Please note that most of our records are filed by number under the names of individuals or corporations. We have no way of locating or retrieving records if they are filed under names or addresses other than those you have provided.

If no records have been located, this does not necessarily mean, and should not be interpreted to mean that there have never been any violations, complaints, claims, investigations or inquiries involving those names or addresses. We cannot make any representations as to whether there are or have been any such violations, complaints, claims, investigations or inquiries.

Attached are (7) pages, free copy of the records located for the names and/or addresses you provided.

Please note that NYSDEC has no capacity to do scanning for you within one mile of the site, as requested.

Thank you for your request. If additional information is needed, please call Gloria Silva/FOIL Secretary at (718) 482-4507, or fax your response to me.

Sincerely yours,

Fawzy I Abdelsadek, Ph.D., P.E.
Regional Enforcement Coordinator

Dear Ms. McCartney:

NYSDEC/Region 2 has reviewed your request for the above referenced records under New York State's Freedom of Information Law (FOIL). Please note that most of our records are filed by number under the names of individuals or corporations. We have no way of locating or retrieving records if they are filed under names or addresses other than those you have provided.

If no records have been located, this does not necessarily mean, and should not be interpreted to mean that there have never been any violations, complaints, claims, investigations or inquiries involving those names or addresses. We cannot make any representations as to whether there are or have been any such violations, complaints, claims, investigations or inquiries.

- Records are available for review and/or copying. Please contact me at (718) 482-4992 to schedule an appointment to review the records.
- If you choose not to review the records, but to copy them, please notify us in writing. NYSDEC will send your order to an outside contractor, that will deal with you directly. If you decline the Contractor's estimate for copying, he may charge you for transportation of the records.
- If we don't hear from you within the next 10 days, we assume that you are no longer interested to pursue your request.

If you have any questions, please call me at (718) 482-4992.

Sincerely yours,

Fawzy I Abdelsadek, Ph.D., P.E.

Dear Sir/Madam:

This is in response to your letter requesting information, under the Freedom of Information Law, which may be contained in the records of this Department.

This response specifically addresses only those aspects of your request that concern the discharge of wastewater or other materials to a New York City public sewer. If you requested additional information concerning the availability of other records, you should receive a separate response from the Bureau responsible for maintaining such files.

Concerning your request, the **Division of Pollution Control & Monitoring:**

cannot identify the requested location.

does not have any information.

has extensive information about the subject location. Please telephone **Mr. Vitaly Weiler** at **(718) 595-4756** to arrange for an appointment to review the file.

APPENDIX D

PHOTOGRAPHIC DOCUMENTATION

PHOTOGRAPHIC RECORD

Feature: 4th Street Turning Basin/Gowanus Bay

Photographer: Edelman

Date: 03/30/04

Photo No.: 1

Direction: NW

Comments: View of the 4th St turning basin, a potential fill/ wetland restoration candidate. Silos in the background were used for grain storage.

Photographer: Edelman

Date: 03/30/04

Photo No.: 2

Direction: NE

Comments: View from the Columbia Street pier, looking across the bay toward cranes and a concrete storage ship. The area near the cranes is used for bulk and container storage of liquid material.

PHOTOGRAPHIC RECORD

Feature: Bayside Fuel

Photographer: Edelman
Date: 03/31/04
Photo No.: 3
Direction: S
Comments: View of Bayside Fuel (510 Sackett St.) at the end of Sackett Street facing the canal.

Photographer: Edelman
Date: 03/31/04
Photo No.: 4
Direction: S
Comments: View of Bayside Fuel (537 Smith St.) from Smith Street.

PHOTOGRAPHIC RECORD

Feature: Bayside Fuel/Brooklyn Union Gas

Photographer: Edelman

Date: 03/31/04

Photo No.: 5

Direction: N

Comments: View of Bayside Fuel (510 Sackett St.) from the Union Street Bridge.

Photographer: Edelman

Date: 03/30/04

Photo No.: 6

Direction: SW

Comments: View of the Brooklyn Union Gas pumping station (facing southwest from 6th St turning basin shoreline).

PHOTOGRAPHIC RECORD

Feature: Bulkhead/Silos and Rock Crushing

Photographer: Edelman

Date: 03/30/04

Photo No.: 7

Direction: N

Comments: View of the deteriorated bulkhead on north side of the 4th Street turning basin.

Photographer: Edelman

Date: 03/30/04

Photo No.: 8

Direction: SE

Comments: View of the canal with silos and rock crusher in background from the end of Bond Street.

PHOTOGRAPHIC RECORD

Feature: Construction/Illegal Dumping Area

Photographer: Edelman

Date: 03/30/04

Photo No.: 9

Direction: S

Comments: View of a construction site and parking area with a warehouse in background from Columbia Street next to the NYPD impound.

Photographer: Edelman

Date: 03/31/04

Photo No.: 10

Direction: S

Comments: View of an illegal dumping area at the end of 1st Street.

PHOTOGRAPHIC RECORD

Feature: Concrete Operation/Sheen on Water

Photographer: Edelman

Date: 03/30/04

Photo No.: 11

Direction: N

Comments: End of barge and concrete operations in canal from the end of 5th Street

Photographer: Edelman

Date: 03/31/04

Photo No.: 12

Direction: S

Comments: View of sheen on water at the end of Douglass Street moving along the bulkhead toward Union Street. Substance was observed bubbling from the bottom of the canal just downstream of the Flushing Tunnel outlet and a combined sewer overflow (CSO) outlet.

PHOTOGRAPHIC RECORD

Feature: Sheen on Water/Hess Fuel

Photographer: Edelman

Date: 03/31/04

Photo No.: 13

Direction: N

Comments: View of a sheen on the water from an unknown substance at the end of Douglass Street. Substance was observed bubbling from the bottom of the canal just downstream of the Flushing Tunnel outlet and a combined sewer overflow (CSO) outlet.

Photographer: Edelman

Date: 03/30/04

Photo No.: 14

Direction: SSW

Comments: View of Hess tank and signage from the corner of Court and Bryant streets.

PHOTOGRAPHIC RECORD

Feature: Hess Fuel/Outfall Pipe

Photographer: Edelman

Date: 03/30/04

Photo No.: 15

Direction:

Comments: View of Hess truck fill areas from Court and Bryant streets with grain silos for proposed cement storage in the background.

Photographer: Edelman

Date: 03/30/04

Photo No.: 16

Direction: SW

Comments: View of an outfall pipe adjacent to the Pathmark parking lot at the end of 12th Street.

PHOTOGRAPHIC RECORD

Feature: 4th Street Overflow/6th Street Turning Basin

Photographer: Edelman
Date: 03/30/04
Photo No.: 17
Direction: SE
Comments: View of an overflow area and remnant debris from flood events at the 4th Street turning basin.

Photographer: Edelman
Date: 03/30/04
Photo No.: 18
Direction: SE
Comments: View of remnant barges in the 6th Street turning basin.

PHOTOGRAPHIC RECORD

Feature: Residential/Rock Crushing Facility

Photographer: Edelman

Date: 03/31/04

Photo No.: 19
