

# HARLEM RIVER, EAST RIVER & WEST LONG ISLAND SOUND STUDY AREA

## Hudson-Raritan Estuary Ecosystem Restoration Project

### POTENTIAL RESTORATION SITES

HRE ID#	Site Name
1HEL	Tibbets Brook
2HEL	Hutchinson River (Marsh Restoration)
3HEL	Hutchinson River (Fish Impediment Removal)
4HEL	Hutchinson River
5HEL	Pelham Bay Lagoon/Turtle Cove Complex
6HEL	Tallapoosa West/Pelham Bay Park
7HEL	Pelham Bay Landfill
8HEL	Sherman Creek
9HEL	Rice Stadium Wetlands
10HEL	City Island Wetlands
11HEL	Hart Island
12HEL	Palmer Inlet
13HEL	Ferry Point Park
14HEL	Pugsley Creek/Seton Falls Park
15HEL	Soundview Park
16HEL	Bronx River/Bronx Park
17HEL	Oak Point Rail Yard
18HEL	Hempstead Harbor
19HEL	Udalls Cove
20HEL	Aurora Pond
21HEL	Alley Pond Park
22HEL	Poyvels Cove
23HEL	Flushing Creek and Bay
24HEL	Meadow Lake
25HEL	Bowery Bay
26HEL	South Brother Island
27HEL	Little Hellgate Wetlands
28HEL	Halletts Cove
29HEL	Anable Cove
30HEL	Newtown Creek
31HEL	Stuyvesant Cove
32HEL	Bushwick Inlet
33HEL	Cove between the Bridges-Part of Brooklyn Bridge

The Hudson-Raritan Estuary Ecosystem Restoration Project (HREERP) is being carried out under the U.S. Army Corps of Engineers' General Investigations (G) Program in coordination with The Port Authority of New York & New Jersey. The goals of the study are to establish, restore, and enhance ecological systems throughout the NY/NJ Harbor Estuary to self-sustainable levels. This map is a draft product of the Environmental Analysis Branch, Planning Division, Army Corps of Engineers, New York Districts Feasibility Study for the HREERP. The candidate habitat restoration sites depicted on this map are those identified by the 'Needs and Opportunities' Report, prepared for the Port Authority of NY & NJ by the Regional Plan Association. The HREERP review process is both extensive and dynamic, therefore, it is expected that restoration sites will be added, eliminated or modified throughout the study. Additional maps will be produced as revisions to the restoration sites are made.
