**REMARKS:**
- All depths are in reference to Mean Lower Low Water (MLLW).
- Channel Length is in nautical miles.
- All distances are approximate.

**Moriches Inlet:**
- Shoaling exists throughout the entire channel width from approximately 220 feet landward of the beginning of the channel to approximately 670 feet seaward of RED DAY MARKER #2 W/LIGHT. A shoal exists across the Left Outside Quarter, into the Middle Half of the channel at the end of this reach, approximately 185 feet seaward of the end of this reach continuing to the end of this reach. A small shoal exists in the Right Outside Quarter at the end of this reach, approximately 105 feet seaward of the end of this reach continuing to the end of this reach. A controlling depth of -5.1 feet MLLW exists in the Right Outside Quarter of the channel approximately 1,245 feet landward of the beginning of the channel.
