REMARKS:
- All depths are in reference to Mean Lower Low Water (MLLW)
- Channel length is in nautical miles

CHEESEQUAKE CREEK:
- **Reach A:** Shoaling exists at approximately 350 feet landward from the beginning of this reach and continues until the end of the reach, extending across the entire width of the channel. The controlling depth of -3.6 feet MLLW exists in the Left Outside Quarter from approximately 430 feet landward from the beginning of this reach to approximately 555 feet landward from the beginning of the reach.
- **Reach B:** Shoaling exists across the entire channel for approximately 80 feet landward from at the start of the reach, where it then tapers along the Left Outside Quarter and extends into the Middle Half for the rest of the reach. The controlling depth of -0.8 feet MLLW exists in the Left Outside Quarter approximately 470 feet seaward from the end of this reach.
- **Reach C:** The controlling depth of -4.1 feet MLLW exists in the Middle 80% at approximately 260 feet landward from the beginning of this reach, centered on approximately 70 feet of shoaling in the Middle 80% and left outside 10%.
