Exhibit “A”- Real Estate Maps
Exhibit “B”- Required LER
Exhibit “C”- Standard Estates
Exhibit “D”- Baseline Cost Estimate for Real Estate
Exhibit “E”- Non-Federal Sponsor Capability Assessment Checklist
1. **Preamble**

**Project Authorization:** The Hashamomuck Cove, Southold, New York Coastal Storm Risk Management Feasibility Study, or the “Project”, is authorized by House of Representatives, Committee on Transportation and Infrastructure, Resolution, Docket Number 2773 (May 2007) which reads as follows:

“Resolved by the Committee on Transportation and Infrastructure of the United States House of Representatives, that the Secretary of the Army is requested to review the reports of the Chief of Engineers on the North Shore of Long Island, Suffolk County, New York, published as House Document 198, 92nd Congress, 2nd Session, as well as other related reports with a view to determine whether the modifications of the recommendations therein are advisable at the present time in the interest of navigation, streambank stabilization, flood damage reduction, floodplain management, water quality, sediment control, environmental preservation and restoration, and other related purposes in Hashamomuck Cove and tributaries.”

Additional Study Guidelines. The Hashamomuck Cove Feasibility Study is being completed with funds authorized by the Disaster Relief Appropriation Act of 2013 (Public Law 113-2). Projects authorized by this Act are subject to USACE Headquarters and North Atlantic Division Hurricane Sandy-related guidance. To date, the following guidance has been issued:

**Official Project Designation:** Hashamomuck Cove, Southold, New York Coastal Storm Risk Management Feasibility Study.

**Project Location:** The Project is located within the Suffolk County, New York along the north shore of Long Island within the Town of Southold, New York.

**Non-Federal Sponsor:** The Non-Federal Sponsor for this Project is the State of New York through its Department of Environmental Conservation (the “Sponsor” or “NYSDEC”).
2. **Statement of Purpose**

This Real Estate Plan ("REP") is prepared in support of the Hashamomuck Cove, Southold, New York Coastal Storm Risk Management Feasibility Study.

3. **Project Purpose and Features**

   a. **Project Purpose:** The purpose of the study is to determine if there is an economically justified and environmentally compliant recommendation for Federal participation in coastal storm risk management for the Hashamomuck Cove Study Area in Southold, NY. The study is needed as existing properties and County Road 48 are at risk. Homeowners have implemented individual solutions but the area continues to experience storm damage due to erosion, wave effects, and inundation.

   The study area is affected by both nor'easters and tropical storms. Storm driven surge and waves cause beach and bluff erosion and flooding. Erosion during storms results in loss of land, damages to homes, businesses, and roads. The erosion is most pronounced within the concave portions of the three coves. The beaches within the study area typically lose material each year during storm events. The town beach has been periodically restored with fill on an ad-hoc basis. In December 2010, a winter storm cut into the cliff along the Sound View Road and eroded much of the parking area at the Southold Town Beach. In October 2012, Hurricane Sandy impacted the Town of Southold with storm surge of about 6 feet and flooding of low-lying areas. County Road (CR) 48, which runs along the shoreline, is in danger of being undermined in several locations. The closure or loss of CR-48 would result in traffic delays, loss of an evacuation route, and hamper emergency rescue operations.

   Climate change is redefining risk for local communities and infrastructure. As rising worldwide temperatures result in melting of the ice sheets, historic climate and sea level rise conditions may no longer be reliable proxies for future conditions. Local scale planning in Southold will benefit from identification of the risk of coastal damages due to future sea level rise scenario planning. Future conditions with an increase in coastal storm erosion and damages could result in a long-term decline in the ability of the study area to recover after a storm event.

   b. **Plan of Improvement:** The proposed project is beach nourishment. The coastal storm risk management project at Hashamomuck Cove would decrease damages to shore front development properties, the Town Beach, and County Road 48.

   The Tentatively Selected Plan, which is also the National Economic Development Plan, consists of a 25-foot berm in the West Cove, a 25-foot berm in the Central Cove (except in Reach E8 where the berm would be 75-feet), and a 25 foot berm in the East Cove. It is important to note that optimization of the TSP will occur after public and agency review of the District Feasibility Report and Environmental Assessment. This would include refinements to the design based on optimization and consideration of comments received during the review process.

   Tentatively Selected Plan Project Feature:
Overall Length 8,500 linear feet (ft.)
Berm width: 25 ft. (except in Reach 8 width: 75 ft.)
Initial Volume of Beach Fill: 160,000 cy
Renourishment Quantity 65,261 cy
Sand Source: Transported by truck from upland location

Beach nourishment (sand placement) represents a near natural, reversible soft solution for reducing damages on the open coast. After initial placement of sand, periodic renourishment is required to counteract long term and storm-induced erosion, and erosion from sea level change.

a. Project Phases

The Project will be constructed in a single phase.

b. Required Lands, Easements, and Rights-of-Way (LER):

This report will detail the real estate needs for the construction of the new proposed elements for the Project. As beachfill is the primary means of providing Coastal Storm Risk Management in the Project, lands necessary for construction of the Project will be secured through acquisition of Perpetual Beach Storm Damage Reduction Easements.

I. Perpetual Beach Storm Damage Reduction Easement (Standard Estate No. 26)
   – Perpetual Beach Storm Damage Reduction Easements must be acquired over approximately 14.96 acres of land, impacting 80 parcels, and 76 private owners and 2 public owners. The location of the Permanent Easements is identified in Exhibit B. Requisite access to public lands consistent in language with the Perpetual Beach Storm Damage Reduction Easement will be authorized through Access Agreements to be recorded against the subject properties. See paragraph 21(a) below for further detail.

II. Temporary Work Area Easement (Standard Estate No. 15) - Temporary work areas may be necessary for this project, but have not yet been identified. The need for temporary work areas will be identified during the Plans and Specs phase. The temporary work areas are typically located adjacent to land to be acquired for Project construction.

III. Borrow Area – The Project proposes to nourish the beach using sand from upland sources to be identified by the contractor. Consequently, no borrow area real estate is required to construct the Project.
IV. LER Summary - The impacted parcels and LER to be acquired are provided in Exhibit B and the recommended standard estate language in Exhibit C herein. The following chart summarizes the required LER for the Project:

<table>
<thead>
<tr>
<th>Required Interest</th>
<th>Required Acres</th>
<th>Acres Below the MHWL</th>
<th>Number of Parcels</th>
<th>Number of Owners</th>
<th>Acquisition Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Perpetual Beach Storm Damage Reduction Easement</td>
<td>±14.96</td>
<td>±0.45</td>
<td>76</td>
<td>4</td>
<td>76</td>
</tr>
</tbody>
</table>

   c. Appraisal Information:

Consistent with USACE Real Estate Policy Guidance Letter No. 31 – Real Estate Support to Civil Works Planning Paradigm (3x3x3), the New York District as valued the real estate requirements through a cost estimate as the real estate costs will total less than 10% of the total project costs. A 20% contingency is added to the incidental costs of the project to account for uncertainty in progress of the real estate acquisition, and the need for condemnation may arise.

   Appraised of the required LER……………..$1,012,422
   Date of Value……………………………..16 November 2015

4. LER Owned by the Non-Federal Sponsor

The Non-Federal Sponsor, The State of New York owns all coastal lands located below the Mean High Water Line within the Project area. This includes an estimated 0.45 acres of submerged lands.

5. Non-Standard Estates

No non-standard estates are proposed for use in real estate acquisition for the Project.

6. Existing Federal Projects

No existing Federal projects are located within the Project area.

7. Federally-Owned Land

No Federally-owned land is located within the Project area.

8. Navigational Servitude
Approximately **0.45** acres of land required for the Project lie below the MHWL. Although it is the general policy of the Corps to utilize the navigational servitude in all situations where available, whether or not the Project is cost-shared, this Project does not directly serve a purpose which is in the aid of commerce. Therefore, rights in the Federal navigational servitude will not be exercised for the Project consistent with CECC-R memorandum dated 19 March 2014, subject: Availability of the Navigational Servitude for Coastal Storm Damage Reduction Projects.

9. **Maps**

The Project real estate maps are provided in Exhibits “A” herein.

10. **Induced Flooding**

Construction, operation or maintenance of the Project is not anticipated to induce any significant flooding.

11. **Baseline Cost Estimate for Real Estate (‘BCERE’)**

An itemized BCERE is provided in Exhibit “D” in Micro-Computer Aided Cost Estimating System (“MCACES”) format with estimated real estate costs. The following is a summary of the costs for the Lands, Easements, Rights-of-Way, Relocations, and Disposals (“LERRD”) required for new elements of the Project:

<table>
<thead>
<tr>
<th>Cost Type</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>LER</td>
<td>$1,112,422</td>
</tr>
<tr>
<td>Incidental Expenses</td>
<td>$1,332,435</td>
</tr>
<tr>
<td><strong>Total 01-Lands and Damages</strong></td>
<td><strong>$2,444,857</strong></td>
</tr>
<tr>
<td>Federal Review and Assistance Costs...</td>
<td>$184,020</td>
</tr>
<tr>
<td><strong>Total 30-Project Management</strong></td>
<td><strong>$184,020</strong></td>
</tr>
</tbody>
</table>

A 20% contingency was included to the overall real estate costs excluding the Land Payments amount $1,012,422 shown in line item 01B1 the Project’s BCERE, because a contingency for Land Payments is already provided in the cost estimate. The Sponsor will be entitled to LERRD reimbursement subject to the terms of the Project Partnership Agreement. As of this report, no creditable LERRD related expenses have been incurred by the Sponsor.

Non-Federal Sponsor Costs

<table>
<thead>
<tr>
<th>Incidental Cost</th>
<th>Cost</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-Federal-----------------------------</td>
<td>$1,093,696</td>
<td></td>
</tr>
</tbody>
</table>
12. Public Law 91-646, Uniform Relocation Assistance

The USACE does not anticipate the Project resulting in the displacement of any persons under Public Law 91-646, the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, (hereinafter “P.L. 91-646”); therefore, no persons would qualify for relocation benefits under the P.L. 91-646.

13. Minerals and Timber Activity

No known present or anticipated mineral activities or timber harvesting in the vicinity of the Project.

14. Land Acquisition Experience and Capability of the Non-Federal Sponsor

The Sponsor maintains the legal and professional capability and experience to acquire the LER in support of the Project. They have condemnation authority and other applicable authorities that may apply if necessary to support acquisition measures. They have successfully acquired the real estate for the Downtown Montauk Stabilization Project and the Coney Island FCCE Project and is currently the non-Federal Sponsor for the Fire Island Inlet to Moriches Inlet Stabilization Project and the Asharoken Coastal Storm Risk Management Feasibility Study, among others. The Sponsor has also been advised of P.L. 91-646 requirements and the requirement to document expenses for credit purposes.

The Non-Federal Sponsor Capability Assessment Checklist is provided in Exhibit “E”. The assessment checklist has been coordinated with the Sponsor. It has been completed based on the Sponsor’s past and current performance on other Corps of Engineers cost-shared civil works projects.

15. Zoning

The Project will not require enactment of land use ordinances prior to construction.

16. Schedule of Acquisition
The proposed schedule of acquisition is outlined below.

<table>
<thead>
<tr>
<th>Milestone</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPA Execution</td>
<td>July 2017</td>
</tr>
<tr>
<td>Sponsor’s Notice to Proceed with Acquisition</td>

<tr>
<td>Contract 1 Construction Complete</td>
<td>December 2018</td>
</tr>
<tr>
<td>Contract 1 Fiscal Close Out</td>
<td>December 2019</td>
</tr>
</tbody>
</table>

17. Facility / Utility Relocations

No facility or utility relocations are included within the Project.

There are no known contaminants or HTRW concerns in, on, under or adjacent to the LER required for the Project.

19. Project Support

Landowner support for constructing the Project will be confirmed as part of the public review process.

20. Notification to Non-Federal Sponsor

By letter dated April 20, 2016, the non-Federal Sponsor, NYSDEC, has been notified in writing of the risks associated with acquiring land prior to the execution of the Project Partnership Agreement, and the Government’s formal notice to proceed with acquisition.

21. Other Issues

a. Access Agreements - Required access to the public parcels will be acquired through an Access Agreement executed between the Sponsor and the relevant governing entity. These Access Agreements will incorporate the full body of text from the Perpetual Beach Storm Damage Reduction Easement. The Access Agreements will authorize sand placement over public lands, and where required, construction of groins.

b. There are no known historical sites within and or adjacent to the LER required for the project.
c. There are no known existing encumbrances (i.e. easements, rights-of-way, etc.) that would impact Project construction.

22. **Points of Contact**

The points of contact for this Real Estate Plan (“REP”) is the Real Estate Project Delivery Team member Mr. Robert A. Vohden at (917) 790-8093 (email: Robert.A.Vohden@usace.army.mil) or the undersigned at (917) 790-8430 (email: Noreen.D.Dresser@usace.army.mil).

23. **Recommendations**

This REP has been prepared in accordance with Chapter 12, ER 405-1-12, Real Estate Handbook, 20 Nov 85, as amended. It is recommended that this report be approved.

STANDARD ESTATES
TEMPORARY WORK AREA EASEMENT (Standard Estate No. 15)

A temporary easement and right-of-way in, on, over and across (the land described in Schedule A) (Tracts Nos.____,____ and____), for a period not to exceed_________________, beginning with date possession of the land is granted to the United States, for use by the United States, its representatives, agents, and contractors as a (borrow area) (work area), including the right to (borrow and/or deposit fill, spoil and waste material thereon) (move, store and remove equipment and supplies, and erect and remove temporary structures on the land and to perform any other work necessary and incident to the construction of the_______________ Project, together with the right to trim, cut, fell and remove therefrom all trees, underbrush, obstructions, and any other vegetation, structures, or obstacles within the limits of the right-of-way; reserving, however, to the landowners, their heirs and assigns, all such rights and privileges as may be used without interfering with or abridging the rights and easement hereby acquired; subject, however, to existing easements for public roads and highways, public utilities, railroads and pipelines.

PERPETUAL BEACH STORM DAMAGE REDUCTION EASEMENT (Standard Estate No. 26)

A perpetual and assignable easement and right-of-way in, on, over and across (the land described in Schedule A) (Tract No. __) for use by the (Project Sponsor), its representatives, agents, contractors, and assigns, to construct; preserve; patrol; operate; maintain; repair; rehabilitate; and replace; a public beach [a dune system] and other erosion control and storm damage reduction measures together with appurtenances thereto, including the right to deposit sand; to accomplish any alterations of contours on said land; to construct berms [and dunes]; to nourish and renourish periodically; to move, store and remove equipment and supplies; to erect and remove temporary structures; and to perform any other work necessary and incident to the construction, periodic renourishment and maintenance of the (Project Name), together with the right of public use and access; [to plant vegetation on said dunes and berms; to erect, maintain and remove silt screens and sand fences; to facilitate preservation of dunes and vegetation through the limitation of access to dune areas;] to trim, cut, fell, and remove from said land all trees, underbrush, debris, obstructions, and any other vegetation, structures and obstacles within the limits of the easement (except ________); [reserving, however, to the grantor(s), (his) (her) (its) (their) (heirs), successors and assigns, the right to construct dune overwalk structures in accordance with any applicable Federal, State or local laws or regulations, provided that such structures shall not violate the integrity of the dune in shape, dimension or function, and that prior approval of the plans and specifications for such structures is obtained from the (designated representative of the Project Sponsor) and provided further that such structures are subordinate to the construction, operation, maintenance, repair, rehabilitation and replacement of the project; and further] reserving to the grantor(s), (his) (her) (its) (their) (heirs), successors and assigns all such rights and privileges as may be used and enjoyed without interfering with or abridging the rights and easements hereby acquired; subject however to existing easements for public roads and highways, public utilities, railroads and pipelines.

EXHIBIT “E”

NON-FEDERAL SPONSOR CAPABILITY ASSESSMENT CHECKLIST
ASSESSMENT OF NON-FEDERAL SPONSOR’S
REAL ESTATE ACQUISITION CAPABILITY

HASHAMOMUCK COVE, SOUTHOLD, NEW YORK
COASTAL STORM RISK MANAGEMENT FEASIBILITY STUDY

I. Legal Authority.
  a. Does the sponsor have legal authority to acquire and hold title to real property for project purposes? Yes.
  b. Does the sponsor have the power of eminent domain for this project? Yes
  c. Does the sponsor have “quick-take” authority for this project? Yes, pursuant to the New York State Eminent Domain Procedure Law.
  d. Are any of the lands/interests in land required for the project located outside the sponsor’s political boundary? No
  e. Are any of the lands/interests in land required for the project owned by an entity whose property the sponsor cannot condemn? No.

II. Human Resource Requirements.
  a. Will the sponsor’s in-house staff require training to become familiar with the real estate requirements of Federal projects including P.L. 91-646, as amended? No
  b. If the answer to II.a is “yes,” has a reasonable plan been developed to provide such training?
  c. Does the sponsor’s in-house staff have sufficient real estate acquisition experience to meet its responsibilities for the project? Yes
  d. Is the sponsor’s projected in-house staffing level sufficient considering its other workload, if any, and the project schedule? Yes
  e. Can the sponsor obtain contractor support, if required in a timely fashion? Yes
  f. Will the sponsor likely request USACE assistance in acquiring real estate? No

III. Other Project Variables.
  a. Will the sponsor’s staff be located within reasonable proximity to the project site? Yes, the NPS has regional offices located in Stony Brook, New York.
  b. Has the sponsor approved the project/real estate schedule/milestones? Yes
IV. **Overall Assessment.**

a. Has the sponsor performed satisfactorily on other USACE projects? Yes

b. With regard to this project, the sponsor is anticipated to be: highly capable/fully capable/moderately capable/marginally capable/insufficiently capable. If sponsor is believed to be "insufficiently capable," provide explanation. Highly capable

V. **Coordination.**

a. Has this assessment been coordinated with the sponsor? Yes

b. Does the sponsor concur with this assessment? Yes

Concur:
