DEPARTMENT OF THE ARMY GENERAL PERMIT
NEW JERSEY-SPGP-19

PERMITTEE AND PERMIT NUMBER:

CENAP-OP-R-SPGP-19 -

ISSUING OFFICE:

Department of the Army
U.S. Army Corps of Engineers, Philadelphia District
Wanamaker Building - 100 Penn Square East
Philadelphia, Pennsylvania 19107-3390

NOTE: The term "you" and its derivatives, as used in this permit, means the permittee or any future transferee. The term "this office" refers to the appropriate district or division office of the Corps of Engineers having jurisdiction over the permitted activity or the appropriate official of that office acting under the authority of the commanding officer.

You are authorized to perform work in accordance with the terms and conditions specified below.

PROJECT DESCRIPTION: Construction of proposed and maintenance of existing non-commercial piers, docks, mooring piles, boat lifts, timber breakwaters and the replacement of existing serviceable bulkheads. This general permit also authorizes the discharge of fill material between existing and proposed bulkheads as well as legalization of previously existing structures provided the structures meet all terms and conditions of this permit.

PROJECT LOCATION: Navigable waters of the United States in the State of New Jersey. This general permit is applicable to navigable waters located within the geographic boundaries of both the Philadelphia District and the New York District, U.S. Army Corps of Engineers.

TERMS OF AUTHORIZATION:

1. That in order for work and structures to be approved by this general permit the work and structures must be reviewed and receive the approval(s) of the New Jersey Department of Environmental Protection (NJDEP), pursuant to N.J.S.A. 12:5-3 (Waterfront Development Permit), N.J.S.A. 13:9A-1 et seq (Wetlands Permit) and New Jersey Water Pollution Control Act, N.J.S.A. 58, 10A (Water Quality Certificate). Additionally, in order for work to be approved under this general permit, you must be furnished a copy of this general permit from the NJDEP at the time you receive your State approval.

2. This general permit is not applicable to work which is authorized by the State due to failure of the State to make a permit decision within the review period mandated by State Law and/or regulation. This general permit is not applicable when work is authorized by the State as part of a settlement agreement or administrative consent order or through an exemption such as in State regulations N.J.A.C. 7:7-2.3(d)("Zanes").
3. That the work and/or structures may be used for non-commercial purposes only. This general permit may be used for non-commercial Municipal projects provided the project complies with all Terms of Authorization and Special Conditions of this permit.

4. No more than four (4) designated slips/mooring spaces per buildable lot. A buildable lot is defined as a single parcel or multiple contiguous parcels of land which supports a residential building. No more than two (2) designated slips/mooring spaces per buildable lot within submerged aquatic vegetation habitat and shellfish habitat. No more than one pier/dock per buildable lot. A jet ski dock is considered a slip/mooring space for the purpose of this general permit.

5. In submerged aquatic vegetation habitat, a minimum water depth of four (4) feet at Mean Low Water must be present in the area where the boats will be moored.

6. That the structures subject to this general permit shall not extend more than 20 percent of the width of the adjacent waterway measured from mean low water line and in no instances exceed 250 feet channelward of the mean high water line. Each application shall include a written justification for the number and length of all proposed structures.

7. That the piers and docks subject to this general permit shall be limited to a maximum width of eight (8) feet except where crossing wetlands, mudflats and submerged aquatic vegetation habitat where the width of the structures shall be a maximum width of four (4) feet. Jet ski docks, lifts and jet ski platforms are considered to be docks for the purpose of this general permit. The height of structures, as measured from the lower most portion of the deck structure, over the wetlands ground surface shall be a minimum of four and half feet (4.5). The height of structures in submerged aquatic vegetation habitat shall be a minimum of four (4) feet above the Mean High Water line. Under normal circumstances, a minimum of 3/8", ⅜", ¾", or 1" space is to be provided for 4", 6", 8-10", or 12" wide planks, respectively. Floating docks shall be designed and operated to prevent them from resting on the bottom at low tide.

8. That this general permit authorizes the construction of structural breakwaters, except as noted in item 12 of this section. All breakwaters must be constructed at least 18 inches above the bottom of the waterway with a minimum spacing of three (3) inches between sheathing.

9. That the structures subject to this general permit shall be constructed a minimum of 50 feet outside of any authorized Federal/State navigation channel/project, except within the West Canal and along Inside Thorofare from Portland Avenue to Albany Avenue, Ventnor, New Jersey. Proposed structures within the West Canal and Inside Thorofare shall be a minimum of 25 feet outside of the authorized Federal navigation channel. Existing authorized structures presently located within the buffer zone must meet these buffer zone requirements if they are proposed for reconstruction in the future.

10. That this general permit is not applicable for work reasonably related to another activity requiring an individual Department of the Army permit application and approval by the District Engineer, Corps of Engineers.
11. The provisions of this general permit shall apply to any area designated as a component of the National Wild and Scenic River System or any river officially designated by Congress as a "study river" for possible inclusion in the system while the river is in an official study status provided the National Park Service, after having been notified of the proposed work, determines that the proposed activity will not adversely affect the Wild and Scenic River Designation or study status.

12. The provisions of this general permit shall apply to areas designated shellfish habitat, as defined in State of New Jersey Department of Environmental Protection “Coastal Zone Management Rules” N.J.A.C. 7:7E-3.2(a)(1-4), provided the following:
   a) All structures, including piers and docks (piles, stringers, whalers and decking), boat lifts, mooring piles, breakwaters, and replacement bulkheads must be constructed with non-polluting material, such as plastic, natural cedar or other untreated wood, polymer coated pressure-treated wood, concrete or other inert products. Creosote and pressure-treated lumber (i.e. preservative treatment such as CCA-C, ACZA, CC, ACQ, etc.) (wolmanized) which is susceptible to leaching are considered polluting materials and are not acceptable for the purpose of this general permit;
   b) All proposed docks shall be limited to two designated slips/moorings and the boats shall be moored in a boat lift when practicable;
   c) Only one pier/dock per buildable lot; and
   d) The National Marine Fisheries Service, after having been notified of the proposed work by NJDEP, does not object to the project and work may proceed pursuant to SPGP-19.

Those shellfish areas mapped by the NJDEP as “condemned” and/or “prohibited” for the purpose of harvesting shellfish, shall continue to be considered as shellfish habitat for the purposes of this general permit.

13. That this general permit does not authorize the following:
   a. Any other activity not specified in this general permit.
   b. Discharge of dredged and/or fill material into wetlands except wetlands located between existing and proposed replacement bulkheads.
   c. Dredging or the disposal of dredged material.
   d. Piers, docks, boat lifts and breakwaters constructed of solid fill (earth or rock). Construction of these types of structures will require submission of a separate permit application to the District Engineer and issuance of an Individual Department of the Army Permit.
   e. The storage of petrochemicals, pollutants, or hazardous products on docks or piers.
   f. Any structures or work within the Cape May Canal. Proposed work/structures within this waterway will require submission of a separate permit application to the Philadelphia District Engineer and issuance of an Individual Department of the Army Permit.
   g. Floating docks in submerged aquatic vegetation habitat.
h. Any areas named in Acts of Congress or Presidential Proclamations as Natural Landmarks, National Rivers, National Wilderness Areas, National Wildlife Refuges, National Seashores, National Recreation Areas, National Lakeshores, National Parks, National Monuments, and such areas as may be established under Federal Law for similar and related purposes, such as estuaries and marine sanctuaries.

14. That the District Engineer retains discretionary authority to require on a case-by-case basis submission of an Individual Department of the Army permit application for proposed work when it is determined that such a review would be in the public interest (i.e., potential for significant impact on environmental resources, effect on navigation, etc.).

15. This General Permit will expire on December 31, 2009. At that time, this General Permit may be re-issued/extended. In the event that this General Permit is re-issued/extended, any activity which has been authorized under the terms and conditions of this General Permit will remain authorized until such time that the required State permit/authorization issued with the general permit expires, provided the authorized activity complies with any subsequent re-authorization or modification of this general permit.

16. The replacement or repair of an existing serviceable bulkhead may extend up to 18 inches channelward of the face of the existing bulkhead for wood replacements and up to 24 inches for vinyl replacements. The height of replacement bulkheads shall not exceed that of the existing bulkhead on lots where wetlands exist landward of that structure.

17. This general permit authorizes the extension and/or replacement of existing stormwater outfall structures constructed through an existing bulkhead, provided the outfall pipe(s) does not extend more than 12 inches from the face of the bulkhead.

PERMIT CONDITIONS:

General Conditions:

1. The time limit for completing the work authorized by this general permit ends on December 31, 2009. However, term of authorization 15 specifically addresses those circumstances where this time limit may be extended beyond December 31, 2009.

2. You must maintain the activity authorized by this permit in good condition and in conformance with the terms and conditions of this permit. You are not relieved of this requirement if you abandon the permitted activity, although you may make a good faith transfer to a third party in compliance with General Condition 3 below. Should you wish to cease to maintain the authorized activity or should you desire to abandon it without a good faith transfer, you must obtain a modification of this permit from this office, which may require restoration of the area.

3. If you sell the property associated with this general permit, you must obtain the signature of the new owner in the space provided and forward a copy of the permit to this office to validate the transfer of this authorization.

4. If a conditioned water quality certification has been issued for your project by NJDEP, you must comply with conditions specified in the certification as special conditions to this general permit.
5. You must allow representatives from this office to inspect the authorized activity at any time deemed necessary to ensure that it is being or has been accomplished in accordance with the terms and conditions of your general permit.

Special Conditions:

1. That all construction equipment working on wetlands shall be supported on mats. Any wetlands disturbed during construction shall be restored to pre-project conditions.

2. The applicant must notify the District Engineer if the authorized activity may affect any historic properties listed, or determined to be eligible, or which the applicant has reason to believe may be eligible for listing on the National Register of Historic Places, and shall not begin the activity until notified by the District Engineer that the requirements of National Historic Preservation Act have been satisfied and that the activity is authorized. Furthermore, that if the permittee before or during prosecution of the work authorized encounters a historic property that has not been listed or determined eligible for listing on the National Register but which may be eligible for listing in the National Register, he shall immediately notify the District Engineer.

3. Any archeological artifacts discovered during the performance of work under the authorization of this general permit must be adequately protected and their discovery promptly reported to the District Engineer.

4. No activity authorized under this General Permit shall adversely affect any federally-listed threatened or endangered species, as identified under the Endangered Species Act of 1973, or result in the destruction or adverse modification of critical habitat of such species. If the activity may affect listed species or critical habitat, or is likely to jeopardize proposed species, or likely to result in the adverse modification of proposed critical habitat, the Corps shall initiate and complete a Section 7 consultation or conference, as appropriate, in accordance with the Endangered Species Act of 1973 prior to authorization of the activity under this General Permit.

5. That prior to commencing any work under this general permit, the permittee should contact the various utility authorities and companies (i.e., electric, gas, water, sewage, etc.) in order to prevent personal injury and/or damage to property during construction of work.

6. All work performed under the authorization of this general permit must be consistent with approved coastal zone management program. The applicant must include a statement with the permit application indicating that, "The proposed activity complies with and will be conducted in a manner that is consistent with the approved State Coastal Zone Management (CZM) Program", specifically New Jersey Coastal Resource and Development Policies (N.J.A.C. 7:7E-1.1 et seq).

7. No discharge of dredged, excavated or fill material or structures may consist of unsuitable material or solid waste (e.g., trash, debris, car bodies, etc.) and all material discharged must be free from toxic pollutants in toxic amounts pursuant to Section 307 of the Clean Water Act.

8. That all work identified and authorized herein shall be consistent with the terms and conditions of this general permit. The Corps may impose other special conditions on a project authorized pursuant to SPGP-19 where it is determined necessary to minimize adverse environmental effects or based upon any other factor of the public interest. Any activities not specifically identified and authorized herein shall constitute a violation of the terms and conditions of this permit, in whole or in part, and may result in the institution of such legal proceedings as the United States Government may consider appropriate.
9. The applicant shall notify the appropriate Corps District at least 10 days prior to the commencement of authorized work by completing and signing the enclosed Notification/Certification of Work Commencement Form (Enclosure 1). The applicant shall notify the appropriate Corps District within 10 days of the completion of the authorized work by completing and signing the enclosed Notification/Certification of Work Completion/Compliance Form (Enclosure 2). All notifications required by this condition shall be in writing and shall be transmitted to this office by registered mail. Oral notifications are not acceptable. Similar notifications are required each time maintenance work is to be done under the terms of this Corps of Engineers permit.

10. Damage to structures/vessels: That the permittee hereby recognizes the possibility that the structures permitted may be subject to damage by wave wash from passing vessels. The issuance of this general permit does not relieve the permittee from taking all proper steps to insure the integrity of the structures permitted and the safety of boats moored thereto from damage by wave wash and the permittee shall not hold the United States liable for any such damage.

11. The permittee understands and agrees that, if future operations by the United States require the removal, relocation, or other alteration, of the structure or work herein authorized, or if, in the opinion of the Secretary of the Army or his authorized representative, said structure or work shall cause unreasonable obstruction to the free navigation of the navigable waters, the permittee will be required, upon due notice from the Corps of Engineers, to remove, relocate, or alter the structural work or obstructions caused thereby, without expense to the United States. No claim shall be made against the United States on account of any such removal or alteration. (This special condition is applicable to Corps of Engineers permits that provide authorization under Section 10 of the Rivers and Harbors Act of 1899.)

FURTHER INFORMATION:

1) Congressional Authorities: You have been authorized to undertake the activity described above pursuant to:

   (X) Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403).

   (X) Section 404 of the Clean Water Act (33 U.S.C. 1344).

2) Limits of this authorization.

   a. This general permit does not obviate the need to obtain other Federal, State, or local authorizations required by law.

   b. This general permit does not grant any property rights or exclusive privileges.

   c. This general permit does not authorize any injury to the property or rights of others.

   d. This general permit does not authorize interference with any existing or proposed Federal projects.

3) Limits of Federal Liability. In issuing this general permit, the Federal Government does not assume any liability for the following:

   a. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.
b. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.

c. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.

d. Design or construction deficiencies associated with the permitted work.

e. Damage claims associated with any future modification, suspension, or revocation of this permit.

4) Reliance on Applicant's Data. The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.

5) Reevaluation of Permit Decision. This office may reevaluate its decision on this general permit at any time the circumstances warrant. Circumstances that could require a reevaluation include, but are not limited to, the following:

a. You fail to comply with the terms and conditions of this general permit.

b. The information provided by you in support of your permit application proves to have been false, incomplete, or inaccurate (see 4 above).

c. Significant new information surfaces which this office did not consider in reaching the original public interest decision.

Such a reevaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in 33 CFR 325.7 or enforcement procedures such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order requiring you to comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measures ordered by this office, and if you fail to comply with such directive, this office may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

6) Extensions. General Condition 1 establishes a time limit for the completion of the activity authorized by this permit. Unless there are circumstances requiring either a prompt completion of the authorized activity or a reevaluation of the public interest decision, the Corps will normally give favorable consideration to a request for an extension of this time limit.
This permit becomes effective when the Federal official, designated to act for the Secretary of the Army, has signed below.

\[Signature\]
(District Engineer)
Frank J. Cianfrani, Chief, Regulatory Branch
