	APPROVED JURISDICTIONAL DETERMINATION	FORM
	U.S. Army Corps of Engineers	I OIUM
ECTION I: BACKGROUND INFORMATION		
. REPORT COMPLETION DATE FOR APPROVED JU	IRISDICTIONAL DETERMINATION (JD): 29-Nov-2013	
DISTRICT OFFICE, FILE NAME, AND NUMBER: New	w York District, NAN-2013-01145-JD1	
. PROJECT LOCATION AND BACKGROUND INFOR	MATION:	
State :	NY - New York	
County/parish/borough:	Orange	
City: Lat:	Monroe 41.3242	
Long:	-74.1928	
Universal Transverse Mercator	Folder UTM List	
	UTM list determined by folder location	
	NAD83 / UTM zone 18N	
	Waters UTM List	
	UTM list determined by waters location	
Name of nearest waterbody:	NAD83 / UTM zone 18N Unnamed Tributary to Ramapo River	
Name of nearest Traditional Navigable Water (TNW):		
Name of watershed or Hydrologic Unit Code (HUC):		
Check if map/diagram of review area and/or potent		
Check if other sites (e.g., offsite mitigation sites, dis	sposal sites, etc <sub><math>\dot{c}</math></sub> ) are associated with the action and are recorded on a different JD form.	
. REVIEW PERFORMED FOR SITE EVALUATION:		
Office Determination Date:		
Field Determination Date(s): 25-Sep-2013

ECTION II: SUMMARY OF FINDINGS		
RHA SECTION 10 DETERMINATION OF JURISDIC	TION	
There "navigable waters of the U.S." within Rivers and H	Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area.	
Waters subject to the ebb and flow of the t	lide.	
Waters subject to the ebb and flow of the f		
Waters subject to the ebb and flow of the t	tide. used in the past, or may be susceptible for use to transport interstate or foreign commerce.	
Waters subject to the ebb and flow of the t Waters are presently used, or have been u xplain: CWA SECTION 404 DETERMINATION OF JURISDI	lide. used in the past, or may be susceptible for use to transport interstate or foreign commerce.	
Waters subject to the ebb and flow of the t Waters are presently used, or have been t Explain: OKA SECTION 404 DETERMINATION OF JURISDI	tide. used in the past, or may be susceptible for use to transport interstate or foreign commerce.	,
Waters subject to the ebb and flow of the t Waters are presently used, or have been t Explain: OKA SECTION 404 DETERMINATION OF JURISDI	lide. used in the past, or may be susceptible for use to transport interstate or foreign commerce.	,
Waters subject to the ebb and flow of the 1 Waters are presently used, or have been u Explain: 3. CWA SECTION 404 DETERMINATION OF JURISDI There "waters of the U.S." within Clean Water Act (CW Waters of the U.S.	lide. used in the past, or may be susceptible for use to transport interstate or foreign commerce.	,
Waters subject to the ebb and flow of the t Waters are presently used, or have been u Explain: CWA SECTION 404 DETERMINATION OF JURISDIG There "waters of the U.S." within Clean Water Act (CW Waters of the U.S. Indicate presence of waters of U.S. in review area:1	lide. used in the past, or may be susceptible for use to transport interstate or foreign commerce. CTION. (A) jurisdiction (as defined by 33 CFR part 328) in the review area.	,
Waters subject to the ebb and flow of the t Waters are presently used, or have been u Explain: CWA SECTION 404 DETERMINATION OF JURISDI There "waters of the U.S." within Clean Water Act (CW Waters of the U.S. Indicate presence of waters of U.S. in review area:1 Water Name Water Typ	lide. used in the past, or may be susceptible for use to transport interstate or foreign commerce. Т OHWM<sup>7</sup> - -Pond/Wetland A Х Х

# Tributaries with OHWM<sup>6</sup> - (as indicated above)

Tributary Name	онwм	Clear	Litter	Changes in Soil	Destruction Vegetation	Shelving	Wrack Line	Matted\Absent Vegetation	Sediment Sorting	Leaf Litter	Scour	Sediment Deposition	Flow Events	Water Staining	Changes Plant	Other
Pond/Wetland A	Х	х	-	Х	-	-	Х	-	Х	х	-	х	-	-	-	-

#### If factors other than the OHWM were used to determine lateral extent of CWA jurisdiction:

# High Tide Line indicated by: Not Applicable.

# Mean High Water Mark indicated by: Not Applicable.

#### (iii) Chemical Characteristics:

Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.).								
<b>Tributary Name</b>	Explain	Identify specific pollutants, if known						
Pond/Wetland A	-	-						

## (iv) Biological Characteristics. Channel supports:

(iv) Biological Chara	v) Biological Characteristics. Channel supports:						
Tributary Name	Riparian Corridor	Characteristics	Wetland Fringe	Characteristics	Habitat		
Pond/Wetland A	-	-	Х	5 to 10 feet	Х		

# Habitat for: (as indicated above)

Tributary Name	Habitat	Federally Listed Species	Explain Findings	Fish\Spawn Areas	Explain Findings	Other Environmentally Sensitive Species	Explain Findings	Aquatic\Wildlife Diversity	Explain Findings
Pond/Wetland A	Х	X	Possible habitat for Endangered Indiana bat	-	-	-	-	Х	-

2. Characteristics of wetlands adjacent to non-TNW that flow directly or indirectly into TNW

```
(i) Physical Characteristics:
(a) General Wetland Characteristics:
Properties:
Not Applicable.
(b) General Flow Relationship with Non-TNW:
Flow is:
Not Applicable.
Surface flow is:
Not Applicable.
Subsurface flow:
Not Applicable.
(c) Wetland Adjacency Determination with Non-TNW: Not Applicable.
(d) Proximity (Relationship) to TNW:
Not Applicable.
```

(ii) Chemical Characteristics: Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.). Not Applicable.

(iii) Biological Characteristics. Wetland supports: Not Applicable.

3. Characteristics of all wetlands adjacent to the tributary (if any):

All wetlands being considered in the cumulative analysis: Not Applicable.

Summarize overall biological, chemical and physical functions being performed: Not Applicable.

## C. SIGNIFICANT NEXUS DETERMINATION

A significant nexus analysis will assess the flow characteristics and functions of the tributary itself and the functions performed by any wetlands adjacent to the tributary to determine if they significantly affect the chemical, physical, and biological integrity of a TWW. For each of the following situations, a significant nexus exists if the tributary, in combination with all of its adjacent wetlands, has more than a speculative or insubstantial effect on the chemical, physical and/or biological integrity of a TWW. Considerations when evaluating significant nexus include, but are not limited to the volume, duration, and frequency of the flow of water in the tributary and its proximity to a TWW, and the functions performed by the tributary and all its adjacent wetlands. It is not appropriate to determine significant nexus based solely on any specific threshold of distance (e.g. between a tributary and the facu.) It is within or outside of a floodpiant is not solely determinative of significant nexus.

.

Significant Nexus: Not Applicable

D. DETERMINATIONS OF JURISDICTIONAL FINDINGS. THE SUBJECT WATERS/WETLANDS ARE:

#### 1. TNWs and Adjacent Wetlands: Not Applicable.

2. RPWs that flow directly or indirectly into TNWs:

 Wetland Name
 Flow
 Explain

 Pond/Wetland A
 PERENNIAL
 Water within this wetland complex flows within the channel of a perennial unnamed tributary to the Ramapo River. Aerial photography, the Monroe, NY USGS quadrangle map, field observations and annual rainfall of 47.8 inches, indicate that the stream flows all year.

# Provide estimates for jurisdictional waters in the review area:

Wetland Name	Туре	Size (Linear) (m)	Size (Area) (m <sup>2</sup> )	
Pond/Wetland A	Relatively Permanent Waters (RPWs) that flow directly or indirectly into TNWs	-	8660.27184	
Total:		0	8660.27184	

#### 3. Non-RPWs that flow directly or indirectly into TNWs:<sup>8</sup> Not Applicable.

Provide estimates for jurisdictional waters in the review area:

Not Applicable

4. Wetlands directly abutting an RPW that flow directly or indirectly into TNWs. Not Applicable.

Provide acreage estimates for jurisdictional wetlands in the review area: Not Applicable.

5. Wetlands adjacent to but not directly abutting an RPW that flow directly or indirectly into TNWs: Not Applicable.

Provide acreage estimates for jurisdictional wetlands in the review area: Not Applicable.

6. Wetlands adjacent to non-RPWs that flow directly or indirectly into TNWs: Not Applicable.

Provide estimates for jurisdictional wetlands in the review area: Not Applicable.

7. Impoundments of jurisdictional waters:<sup>9</sup> Not Applicable.

E. ISOLATED [INTERSTATE OR INTRA-STATE] WATERS INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATION OR DESTRUCTION OF WHICH COULD AFFECT INTERSTATE COMMERCE, INCLUDING ANY SUCH WATERS:10

Identify water body and summarize rationale supporting determination: Not Applicable.

#### Provide estimates for jurisdictional waters in the review area: Not Applicable.

### F. NON-JURISDICTIONAL WATERS. INCLUDING WETLANDS

If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements:

Review area included isolated waters with no substantial nexus to interstate (or foreign) commerce:

Prior to the Jan 2001 Supreme Court decision in "SWANCC," the review area would have been regulated based soley on the "Migratory Bird Rule" (MBR):

Waters do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction (Explain):

Other (Explain):

Provide acreage estimates for non-jurisdictional waters in the review area, where the sole potential basis of jurisdiction is the MBR factors (ie., presence of migratory birds, presence of endangered species, use of water for irrigated agriculture), using best professional judgment: Not Applicable.

Provide acreage estimates for non-jurisdictional waters in the review area, that do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction. Not Applicable.

SECTION IV: DATA SOURCES.		
A. SUPPORTING DATA. Data reviewed for JD (listed items shall be included in case file and, where checked and requested, appropriately referen	ce below):	
Data Reviewed	Source Label	Source Description
Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant	-	-
Data sheets prepared/submitted by or on behalf of the applicant/consultant	-	-

Office concurs with data sheets/delineation report	-	-
U.S. Geological Survey map(s).	Monroe, NY	-
USDA Natural Resources Conservation Service Soil Survey.	Orange County, NY	-
National wetlands inventory map(s).	Monroe, NY	-
State/Local wetland inventory map(s):	Monroe, NY	-
Photographs	-	-
Aerial	-	-
Other	-	-

# B. ADDITIONAL COMMENTS TO SUPPORT JD: Not Applicable.

- Boxes checked below shall be supported by completing the appropriate sections in Section III below.
  P-or purposes of this form, an RPW is defined as a tributary that is not a TNW and that typically flows year-round or has continuous flow at least "seasonally" (e.g., typically 3 months).
  Supporting documentation is presented in Section III.F.
  Anote that the instructional Guidebook contains additional information regarding swales, diches, washes, and erosional features generally and in the arid West.
  Flow route can be described by identifying, e.g., tributary a, which flows through the review area, to flow into tributary b, which then flows into TNW.
  An attraid or man-made discontinuity in the OHWM does not necessarily sever jurisdiction (e.g., where the stream temporarity flows underground, or where the OHWM has been removed by development or agricultural practices). Where there is a break in the OHWM that is unrelated to the waterbody. Flow regime (e.g., flow over a rock outcrip or through a culvert), the agencies will look for indicators of flow above and below the treak.
  7- Joid.
  8-see Footnote #3.
  9- To complete the analysis refer to the key in Section III.D.6 of the Instructional Guidebook.
  10- Prior to asserting or declining CWA jurisdiction based soley on this category, Corps Districts will elevate the action to Corps and EPA HQ for review consistent with the process described in the Corps/EPA Memorandum Regarding CWA Act Jurisdiction Following Rapanos.
