

**APPROVED JURISDICTIONAL DETERMINATION FORM**  
U.S. Army Corps of Engineers

**SECTION I: BACKGROUND INFORMATION**

**A. REPORT COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (JD):** 07-Jul-2014

**B. DISTRICT OFFICE, FILE NAME, AND NUMBER:** New York District, NAN-2014-00589-JD1

**C. PROJECT LOCATION AND BACKGROUND INFORMATION:**

**State :** NY - New York  
**County/parish/borough:** Sullivan  
**City:** Bethel  
**Lat:** 41.70179  
**Long:** -74.79578  
**Universal Transverse Mercator**  
 Folder UTM List  
*UTM list determined by folder location*  
 ● NAD83 / UTM zone 18N  
 Waters UTM List  
*UTM list determined by waters location*  
 ● NAD83 / UTM zone 18N  
**Name of nearest waterbody:** Unnamed Tributary to West Branch Mongaup River  
**Name of nearest Traditional Navigable Water (TNW):** Delaware River  
**Name of watershed or Hydrologic Unit Code (HUC):** 02040104

- Check if map/diagram of review area and/or potential jurisdictional areas is/are available upon request.  
 Check if other sites (e.g., offsite mitigation sites, disposal sites, etc.) are associated with the action and are recorded on a different JD form.

**D. REVIEW PERFORMED FOR SITE EVALUATION:**

- Office Determination Date:  
 Field Determination Date(s):  06-Dec-2010

**SECTION II: SUMMARY OF FINDINGS**

**A. RHA SECTION 10 DETERMINATION OF JURISDICTION**

There "navigable waters of the U.S." within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area.

- Waters subject to the ebb and flow of the tide.  
 Waters are presently used, or have been used in the past, or may be susceptible for use to transport interstate or foreign commerce.

Explain:

**B. CWA SECTION 404 DETERMINATION OF JURISDICTION.**

There "waters of the U.S." within Clean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area.

**1. Waters of the U.S.**

a. Indicate presence of waters of U.S. in review area:<sup>1</sup>

Water Name	Water Type(s) Present
Stream 1	Relatively Permanent Waters (RPWs) that flow directly or indirectly into TNWs

b. Identify (estimate) size of waters of the U.S. in the review area:

**Area:** (m<sup>2</sup>)  
**Linear:** (m)

c. Limits (boundaries) of jurisdiction:

based on:  
**OHWM Elevation:** (if known)

**2. Non-regulated waters/wetlands:**<sup>3</sup>

Potentially jurisdictional waters and/or wetlands were assessed within the review area and determined to be not jurisdictional. Explain:

**SECTION III: CWA ANALYSIS**

**A. TNWs AND WETLANDS ADJACENT TO TNWs**

**1. TNW**  
 Not Applicable.

**2. Wetland Adjacent to TNW**  
 Not Applicable.

**B. CHARACTERISTICS OF TRIBUTARY (THAT IS NOT A TNW) AND ITS ADJACENT WETLANDS (IF ANY):**

**1. Characteristics of non-TNWs that flow directly or indirectly into TNW**

(i) General Area Conditions:

**Watershed size:** 37 acres  
**Drainage area:** 2 acres  
**Average annual rainfall:** 46 inches  
**Average annual snowfall:** inches

(ii) Physical Characteristics

(a) Relationship with TNW:

- Tributary flows directly into TNW.
- Tributary flows through [ ] tributaries before entering TNW.

:Number of tributaries

Project waters are 20-25 river miles from TNW.

Project waters are 1 (or less) river miles from RPW.

Project Waters are 15-20 aerial (straight) miles from TNW.

Project waters are 1 (or less) aerial(straight) miles from RPW.

- Project waters cross or serve as state boundaries.

Explain:

Identify flow route to TNW:<sup>5</sup>

Water flows within the channel of a the on-site unnamed tributary to the West Branch Mongaup River. The water then flows off site, into the West Branch Mongaup River, then into the Mongaup River, then into the Delaware River, a TNW.

Tributary Stream Order, if known:

Order	Tributary Name
1	Stream 1

(b) General Tributary Characteristics:

Tributary is:

Tributary Name	Natural	Artificial	Explain	Manipulated	Explain
Stream 1	-	-	-	X	The stream likely existed prior to the construction of the airport as it flows even when the airport drainage pipe does not. The upper portion of the stream appears to have been excavated to direct water from the airport drainage pipe into the stream.

Tributary properties with respect to top of bank (estimate):

Tributary Name	Width (ft)	Depth (ft)	Side Slopes
Stream 1	10	1	4:1 (or greater)

Primary tributary substrate composition:

Tributary Name	Silt	Sands	Concrete	Cobble	Gravel	Muck	Bedrock	Vegetation	Other
Stream 1	X	-	-	X	-	-	-	-	-

Tributary (conditions, stability, presence, geometry, gradient):

Tributary Name	Condition\Stability	Run\Riffle\Pool Complexes	Geometry	Gradient (%)
Stream 1	Lower portion of the stream is eroding.	None.	Relatively straight	12

(c) Flow:

Tributary Name	Provides for	Events Per Year	Flow Regime	Duration & Volume
Stream 1	Seasonal flow	20 (or greater)	Most water that flows through stream channel is storm water from airport property. Stream still appears to include a ground water component.	-

Surface Flow is:

Tributary Name	Surface Flow	Characteristics
Stream 1	Discrete and confined	-

Subsurface Flow:

Tributary Name	Subsurface Flow	Explain Findings	Dye (or other) Test
Stream 1	-	-	-

Tributary has:

Tributary Name	Bed & Banks	OHWM	Discontinuous OHWM <sup>7</sup>	Explain
Stream 1	X	X	-	-

Tributaries with OHWM<sup>6</sup> - (as indicated above)

Tributary Name	OHWM	Clear	Litter	Changes in Soil	Destruction Vegetation	Shelving	Wrack Line	Matted/Absent Vegetation	Sediment Sorting	Leaf Litter	Scour	Sediment Deposition	Flow Events	Water Staining	Changes Plant	Other
Stream 1	X	-	-	X	X	X	-	-	-	-	X	-	-	-	-	-

If factors other than the OHWM were used to determine lateral extent of CWA jurisdiction:

High Tide Line indicated by:

Not Applicable.

Mean High Water Mark indicated by:

Not Applicable.

(iii) Chemical Characteristics:

Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.).

Tributary Name	Explain	Identify specific pollutants, if known
Stream 1	-	-

(iv) Biological Characteristics. Channel supports:

Tributary Name	Riparian Corridor	Characteristics	Wetland Fringe	Characteristics	Habitat
Stream 1	X	-	X	Scrub shrub/85%	-

2. Characteristics of wetlands adjacent to non-TNW that flow directly or indirectly into TNW

(i) Physical Characteristics:

(a) General Wetland Characteristics:

Properties:  
Not Applicable.

(b) General Flow Relationship with Non-TNW:

Flow is:  
Not Applicable.

Surface flow is:  
Not Applicable.

Subsurface flow:  
Not Applicable.

(c) Wetland Adjacency Determination with Non-TNW:

Not Applicable.

(d) Proximity (Relationship) to TNW:

Not Applicable.

(ii) Chemical Characteristics:

Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.).

Not Applicable.

(iii) Biological Characteristics. Wetland supports:

Not Applicable.

3. Characteristics of all wetlands adjacent to the tributary (if any):

All wetlands being considered in the cumulative analysis:

Not Applicable.

Summarize overall biological, chemical and physical functions being performed:

Not Applicable.

C. SIGNIFICANT NEXUS DETERMINATION

A significant nexus analysis will assess the flow characteristics and functions of the tributary itself and the functions performed by any wetlands adjacent to the tributary to determine if they significantly affect the chemical, physical, and biological integrity of a TNW. For each of the following situations, a significant nexus exists if the tributary, in combination with all of its adjacent wetlands, has more than a speculative or insubstantial effect on the chemical, physical and/or biological integrity of a TNW. Considerations when evaluating significant nexus include, but are not limited to the volume, duration, and frequency of the flow of water in the tributary and its proximity to a TNW, and the functions performed by the tributary and all its adjacent wetlands. It is not appropriate to determine significant nexus based solely on any specific threshold of distance (e.g. between a tributary and its adjacent wetland or between a tributary and the TNW). Similarly, the fact an adjacent wetland lies within or outside of a floodplain is not solely determinative of significant nexus.

Findings for: Stream 1

Stream 1 can retain, convert, and cycle pollutants from the airport facilities that would otherwise directly enter the TNW. Furthermore, during large storm events, the water can serve as a flood storage area.

D. DETERMINATIONS OF JURISDICTIONAL FINDINGS. THE SUBJECT WATERS/WETLANDS ARE:

1. TNWs and Adjacent Wetlands:

Not Applicable.

2. RPWs that flow directly or indirectly into TNWs:

Wetland Name	Flow	Explain
Stream 1	SEASONAL	Water within this seasonal stream flows through a culvert, then off the property, and into the West Branch Mongaup River. Aerial photography, field observations clearly showing the on-site seasonal stream, and annual rainfall of 46 inches indicate that the on-site stream flows at least 3 consecutive months.

Provide estimates for jurisdictional waters in the review area:

Wetland Name	Type	Size (Linear) (m)	Size (Area) (m <sup>2</sup> )
Stream 1	Relatively Permanent Waters (RPWs) that flow directly or indirectly into TNWs	-	903.76077312
<b>Total:</b>		<b>0</b>	<b>903.76077312</b>

3. Non-RPWs that flow directly or indirectly into TNWs:<sup>8</sup>

Not Applicable.

Provide estimates for jurisdictional waters in the review area:

Not Applicable.

4. Wetlands directly abutting an RPW that flow directly or indirectly into TNWs.

Not Applicable.

Provide acreage estimates for jurisdictional wetlands in the review area:

Not Applicable.

5. Wetlands adjacent to but not directly abutting an RPW that flow directly or indirectly into TNWs:

Not Applicable.

**Provide acreage estimates for jurisdictional wetlands in the review area:**  
Not Applicable.

**6. Wetlands adjacent to non-RPWs that flow directly or indirectly into TNWs:**  
Not Applicable.

**Provide estimates for jurisdictional wetlands in the review area:**  
Not Applicable.

**7. Impoundments of jurisdictional waters:<sup>9</sup>**  
Not Applicable.

**E. ISOLATED [INTERSTATE OR INTRA-STATE] WATERS INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATION OR DESTRUCTION OF WHICH COULD AFFECT INTERSTATE COMMERCE, INCLUDING ANY SUCH WATERS:<sup>10</sup>**  
Not Applicable.

**Identify water body and summarize rationale supporting determination:**  
Not Applicable.

**Provide estimates for jurisdictional waters in the review area:**  
Not Applicable.

**F. NON-JURISDICTIONAL WATERS. INCLUDING WETLANDS**

- If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements:
- Review area included isolated waters with no substantial nexus to interstate (or foreign) commerce:
- Prior to the Jan 2001 Supreme Court decision in "SWANCC," the review area would have been regulated based solely on the "Migratory Bird Rule" (MBR):
- Waters do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction (Explain):
  
- Other (Explain):

**Provide acreage estimates for non-jurisdictional waters in the review area, where the sole potential basis of jurisdiction is the MBR factors (ie., presence of migratory birds, presence of endangered species, use of water for irrigated agriculture), using best professional judgment:**  
Not Applicable.

**Provide acreage estimates for non-jurisdictional waters in the review area, that do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction.**  
Not Applicable.

**SECTION IV: DATA SOURCES.**

**A. SUPPORTING DATA. Data reviewed for JD**

(listed items shall be included in case file and, where checked and requested, appropriately reference below):

Data Reviewed	Source Label	Source Description
--Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant	-	-
--U.S. Geological Survey map(s).	White Lake, NY	-
--USDA Natural Resources Conservation Service Soil Survey.	Sullivan County, NY	-
--National wetlands inventory map(s).	White Lake, NY	-
--State/Local wetland inventory map(s):	White Lake, NY	-
--Photographs	-	-
----Aerial	-	-
----Other	-	-
--Previous determination(s).	Jurisdictional Determination 2002-00890-YS	Jurisdictional determination letter issued August 29, 2003, including determination of isolation under SWANCC.

**B. ADDITIONAL COMMENTS TO SUPPORT JD:**  
Not Applicable.

<sup>1</sup> Boxes checked below shall be supported by completing the appropriate sections in Section III below.

<sup>2</sup> For purposes of this form, an RPW is defined as a tributary that is not a TNW and that typically flows year-round or has continuous flow at least "seasonally" (e.g., typically 3 months).

<sup>3</sup> Supporting documentation is presented in Section III.F.

<sup>4</sup> Note that the Instructional Guidebook contains additional information regarding swales, ditches, washes, and erosional features generally and in the arid West.

<sup>5</sup> Flow route can be described by identifying, e.g., tributary a, which flows through the review area, to flow into tributary b, which then flows into TNW.

<sup>6</sup> A natural or man-made discontinuity in the OHWM does not necessarily sever jurisdiction (e.g., where the stream temporarily flows underground, or where the OHWM has been removed by development or agricultural practices). Where there is a break in the OHWM that is unrelated to the waterbody's flow regime (e.g., flow over a rock outcrop or through a culvert), the agencies will look for indicators of flow above and below the break.

<sup>7</sup> -Ibid.

<sup>8</sup> See Footnote #3.

<sup>9</sup> To complete the analysis refer to the key in Section III.D.6 of the Instructional Guidebook.

<sup>10</sup> Prior to asserting or declining CWA jurisdiction based solely on this category, Corps Districts will elevate the action to Corps and EPA HQ for review consistent with the process described in the Corps/EPA Memorandum Regarding CWA Act Jurisdiction Following Rapanos.

**APPROVED JURISDICTIONAL DETERMINATION FORM  
U.S. Army Corps of Engineers**

### SECTION I: BACKGROUND INFORMATION

**A. REPORT COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (JD):** 07-Jul-2014

**B. DISTRICT OFFICE, FILE NAME, AND NUMBER:** New York District, NAN-2014-00589-JD2

**C. PROJECT LOCATION AND BACKGROUND INFORMATION:**

**State :** NY - New York  
**County/parish/borough:** Sullivan  
**City:** Bethel  
**Lat:** 41.70179  
**Long:** -74.79578  
**Universal Transverse Mercator**  
 Folder UTM List  
*UTM list determined by folder location*  
 • NAD83 / UTM zone 18N  
 Waters UTM List  
*UTM list determined by waters location*  
 • NAD83 / UTM zone 18N  
**Name of nearest waterbody:** Unnamed Tributary to West Branch Mongaup River  
**Name of nearest Traditional Navigable Water (TNW):** Delaware River  
**Name of watershed or Hydrologic Unit Code (HUC):** 02040104

Check if map/diagram of review area and/or potential jurisdictional areas is/are available upon request.

Check if other sites (e.g., offsite mitigation sites, disposal sites, etc.) are associated with the action and are recorded on a different JD form.

**D. REVIEW PERFORMED FOR SITE EVALUATION:**

Office Determination Date:

Field Determination Date(s):  06-Dec-2010

### SECTION II: SUMMARY OF FINDINGS

**A. RHA SECTION 10 DETERMINATION OF JURISDICTION**

There "navigable waters of the U.S." within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area.

Waters subject to the ebb and flow of the tide.

Waters are presently used, or have been used in the past, or may be susceptible for use to transport interstate or foreign commerce.

**Explain:**

**B. CWA SECTION 404 DETERMINATION OF JURISDICTION.**

There "waters of the U.S." within Clean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area.

**1. Waters of the U.S.**

**a. Indicate presence of waters of U.S. in review area:<sup>1</sup>**

--	--

Water Name	Water Type(s) Present
Wetland B	Isolated (interstate or intrastate) waters, including isolated wetlands
Wetland C	Isolated (interstate or intrastate) waters, including isolated wetlands
Wetland D	Isolated (interstate or intrastate) waters, including isolated wetlands
Wetland E	Isolated (interstate or intrastate) waters, including isolated wetlands

**b. Identify (estimate) size of waters of the U.S. in the review area:**

**Area:** (m<sup>2</sup>)

**Linear:** (m)

**c. Limits (boundaries) of jurisdiction:**

**based on:**

**OHWM Elevation:** (if known)

**2. Non-regulated waters/wetlands:<sup>3</sup>**

**Potentially jurisdictional waters and/or wetlands were assessed within the review area and determined to be not jurisdictional. Explain:**  
Wetland E is isolated, located approximately 300 feet from and 17 feet higher in elevation than the nearest waters of the United States. Wetlands B, C and D are isolated, located approximately 600 feet from and 24 feet higher in elevation than the nearest waters of the United States. All of the above listed waters have no hydrologic connection to waters of the U.S.

### SECTION III: CWA ANALYSIS

#### A. TNWs AND WETLANDS ADJACENT TO TNWs

**1. TNW**

Not Applicable.

**2. Wetland Adjacent to TNW**

Not Applicable.

#### B. CHARACTERISTICS OF TRIBUTARY (THAT IS NOT A TNW) AND ITS ADJACENT WETLANDS (IF ANY):

**1. Characteristics of non-TNWs that flow directly or indirectly into TNW**

**(i) General Area Conditions:**

**Watershed size:**

**Drainage area:**

**Average annual rainfall:** inches

**Average annual snowfall:** inches

**(ii) Physical Characteristics**

**(a) Relationship with TNW:**

Tributary flows directly into TNW.

Tributary flows through [ ] tributaries before entering TNW.

:Number of tributaries

**Project waters are** river miles from TNW.

**Project waters are** river miles from RPW.

**Project Waters are** aerial (straight) miles from TNW.

**Project waters are** aerial(straight) miles from RPW.

Project waters cross or serve as state boundaries.

**Explain:**

**Identify flow route to TNW:<sup>5</sup>**

**Tributary Stream Order, if known:**

Not Applicable.

**(b) General Tributary Characteristics:**

**Tributary is:**

Not Applicable.

**Tributary properties with respect to top of bank (estimate):**

Not Applicable.

**Primary tributary substrate composition:**

Not Applicable.

**Tributary (conditions, stability, presence, geometry, gradient):**

Not Applicable.

**(c) Flow:**

Not Applicable.

**Surface Flow is:**

Not Applicable.

**Subsurface Flow:**

Not Applicable.

**Tributary has:**

Not Applicable.

**If factors other than the OHWM were used to determine lateral extent of CWA jurisdiction:**

**High Tide Line indicated by:**

Not Applicable.

**Mean High Water Mark indicated by:**

Not Applicable.

**(iii) Chemical Characteristics:**

**Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.).**

Not Applicable.

**(iv) Biological Characteristics. Channel supports:**

Not Applicable.

**2. Characteristics of wetlands adjacent to non-TNW that flow directly or indirectly into TNW**

**(i) Physical Characteristics:****(a) General Wetland Characteristics:****Properties:**

Not Applicable.

**(b) General Flow Relationship with Non-TNW:****Flow is:**

Not Applicable.

**Surface flow is:**

Not Applicable.

**Subsurface flow:**

Not Applicable.

**(c) Wetland Adjacency Determination with Non-TNW:**

Not Applicable.

**(d) Proximity (Relationship) to TNW:**

Not Applicable.

**(ii) Chemical Characteristics:****Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.).**

Not Applicable.

**(iii) Biological Characteristics. Wetland supports:**

Not Applicable.

**3. Characteristics of all wetlands adjacent to the tributary (if any):****All wetlands being considered in the cumulative analysis:**

Not Applicable.

**Summarize overall biological, chemical and physical functions being performed:**

Not Applicable.

**C. SIGNIFICANT NEXUS DETERMINATION**

A significant nexus analysis will assess the flow characteristics and functions of the tributary itself and the functions performed by any wetlands adjacent to the tributary to determine if they significantly affect the chemical, physical, and biological integrity of a TNW. For each of the following situations, a significant nexus exists if the tributary, in combination with all of its adjacent wetlands, has more than a speculative or insubstantial effect on the chemical, physical and/or biological integrity of a TNW. Considerations when evaluating significant nexus include, but are not limited to the volume, duration, and frequency of the flow of water in the tributary and its proximity to a TNW, and the functions performed by the tributary and all its adjacent wetlands. It is not appropriate to determine significant nexus based solely on any specific threshold of distance (e.g. between a tributary and its adjacent wetland or between a tributary and the TNW). Similarly, the fact an adjacent wetland lies within or outside of a floodplain is not solely determinative of significant nexus.

Significant Nexus: Not Applicable

**D. DETERMINATIONS OF JURISDICTIONAL FINDINGS. THE SUBJECT WATERS/WETLANDS ARE:****1. TNWs and Adjacent Wetlands:**

Not Applicable.

**2. RPWs that flow directly or indirectly into TNWs:**

Not Applicable.

**Provide estimates for jurisdictional waters in the review area:**

Not Applicable.

**3. Non-RPWs that flow directly or indirectly into TNWs:<sup>8</sup>**

Not Applicable.

**Provide estimates for jurisdictional waters in the review area:**

Not Applicable.

**4. Wetlands directly abutting an RPW that flow directly or indirectly into TNWs.**

Not Applicable.

**Provide acreage estimates for jurisdictional wetlands in the review area:**

Not Applicable.

**5. Wetlands adjacent to but not directly abutting an RPW that flow directly or indirectly into TNWs:**

Not Applicable.

**Provide acreage estimates for jurisdictional wetlands in the review area:**

Not Applicable.

**6. Wetlands adjacent to non-RPWs that flow directly or indirectly into TNWs:**

Not Applicable.

**Provide estimates for jurisdictional wetlands in the review area:**

Not Applicable.

**7. Impoundments of jurisdictional waters:<sup>9</sup>**

Not Applicable.

**E. ISOLATED [INTERSTATE OR INTRA-STATE] WATERS INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATION OR DESTRUCTION OF WHICH COULD AFFECT INTERSTATE COMMERCE, INCLUDING ANY SUCH WATERS:<sup>10</sup>**

Waters Name	Interstate/Foreign Travelers	Fish/Shellfish Commerce	Industrial Commerce	Interstate Isolated	Explain	Other Factors	Explain
Wetland B	-	-	-	-	-	-	-
Wetland C	-	-	-	-	-	-	-
Wetland D	-	-	-	-	-	-	-
Wetland E	-	-	-	-	-	-	-

**Identify water body and summarize rationale supporting determination:**

Water Name	Adjacent To TNW Rationale	TNW Rationale
Wetland B	-	-
Wetland C	-	-
Wetland D	-	-
Wetland E	-	-

**A. SUPPORTING DATA. Data reviewed for JD**

(listed items shall be included in case file and, where checked and requested, appropriately reference below):
