APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)
NAVIGABLE WATERS PROTECTION RULE

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): **July 2, 2020**

ORM Number: NAN-2018-00938-WOR

Associated JDs: N/A

Review Area Location¹:

State/Territory: NY City: Plattekill County/Parish/Borough: Ulster County

Center Coordinates of Review Area: Latitude 41.65725 Longitude -74.106877

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list **MUST** be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in section II.D).

B. Rivers and Harbors Act of 1899 Section 10 (§ 10)²

§ 10 Name	§ 10 Size	§ 10 Criteria	Rationale for § 10 Determination

¹ Map(s)/Figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide and included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

			Manual/Regional Supplement and is physically contiguous to an intermittent, unnamed tributary to the Walkill River, located just off site.
Wetland W-2	5.15 acres	(a)(4) Wetland abuts an (a)(1)-(a)(3) water	Wetland W-2 was delineated using the 87 Manual/Regional Supplement and is physically contiguous to an intermittent, unnamed tributary to the Walkill River, located just off site.
Wetland W-5	2.09 acres	(a)(4) Wetland abuts an (a)(1)-(a)(3) water	Wetland W-5 was delineated using the 87 Manual/Regional Supplement and is physically contiguous to an intermittent, unnamed tributary to the Walkill River, located just off site.
Wetland W-6	1.24 acres	(a)(4) Wetland abuts an (a)(1)-(a)(3) water	Wetland W-6 was delineated using the 87 Manual/Regional Supplement and is physically contiguous to an intermittent, unnamed tributary to the Walkill River, located just off site.
Wetland W-8	0.19 acres	(a)(4) Wetland separated from an (a)(1)-(a)(3) water only by an artificial structure allowing a direct hydrologic surface connection between the wetland and the (a)(1)-(a)(3) water in a typical year	Wetland W-8 was delineated using the 87 Manual/Regional Supplement and is separated from an off-site, intermittent stream by an abandoned railroad bed. Water from this wetland flows through a culvert, then into the intermittent, unnamed tributary to the Walkill River.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12))⁴:

Exclusion Name	Exclusion Size	Exclusion ⁵	Rationale for Exclusion Determination
Wetland W-3	0.13 acres	(b)(1) Non-adjacent wetland	Wetland W-3 is not located within a 100-year floodplain. Wetland W-3 is located approximately 300 feet from and 10 feet higher in elevation than Wetland W-2, the nearest water of the United States, with no apparent hydrologic connection.
Wetland W-4	0.6 acres	(b)(1) Non-adjacent wetland	Wetland W-4 is not located within a 100-year floodplain. Wetland W-4 is located approximately 150 feet from and 2 feet higher in elevation than Wetland W-5, the nearest water of the United States, with no apparent hydrologic connection.
